Risk Control measures	<p>Risk Associated With Underlying Schemes</p> <ul style="list-style-type: none"> • Liquidity Risk on account of investments in international funds: The investments are made in international funds, which provide daily liquidity. However there exists a possibility that different settlement cycles and foreign exchange conversion could leads to delay in receipt of redemption proceeds. To mitigate this risk, daily cash management monitoring is performed by the Risk team by taking into consideration future cash flows on account of redemptions as well as subscriptions into/from the domestic fund. The endeavor is to maintain an adequate liquidity cushion in Indian Rupee terms by making investments in very short term money market instruments and/or liquid schemes in India. • Expense Risks associated with investments in international funds: Any increase in the expense structure of the international funds is not expected to have any impact as the aggregate of expenses incurred by the Indian Fund-of-Funds scheme and the underlying international funds is subject to limits prescribed by SEBI. • Portfolio Disclosure Risks associated with investments in international fund: Full portfolio disclosure may not be available at the end of each month. Full portfolio holdings can be obtained from underlying international funds on a quarterly basis. • Investment Policy and/or fundamental attribute change risks associated with investments in International funds: Investments are made in overseas equity ETFs, however there exists possibility that there is a change in the fundamental attributes of the underlying ETF. In such circumstances, the AMC, may take action to safeguard the interest of the unit holders within the purview of the SEBI guidelines

- **Risks associated with investments in overseas equity ETFs – special risk consideration related to international fund:** To the extent of the investments in overseas equity ETFs, the risks of such underlying ETFs will exist. The investors should note that these risks cannot be defeased as this fund is managed by other asset management companies.

Risks Associated with Debt & Money Market Instruments

Credit Risk - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Risks Associated with Repo in Corporate Debt

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached.
