	Risks Associated with Debt & Money Market Instruments

	Key Information Memorandum - Mirae Asset FSG Sector Leaders Fund of Fund

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Risk Mitigation measures

- The FoF will invest in ETFs, which in cumulation will endeavor to have a diversified equity portfolio comprising stocks across various sectors of the economy to reduce sector specific risks. All the underlying ETF scheme related risk factors will apply to the Fund of Fund.
- Any investments in debt securities would be undertaken after assessing the associated credit risk, interest rate risk and liquidity risk.

The Scheme will also invest in debt securities and money market instruments.

- The credit quality of the portfolio will be maintained and monitored using in-house research capabilities as well as inputs from external sources such as independent credit rating agencies.
- The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security/instrument selection.
- The bottom up approach will assess the quality of security/instrument (including the financial health of the issuer) as well as the liquidity of the security.
- Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification.

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations.
