Construction	3.09%	2.85%

MARKET OUTLOOK^

- 2023 was characterised by continual of the rate hike cycle by major central banks barring economies like - China and Japan. While US economy defied expectations of a soft or hard landing, other economies like - Europe and UK grappled with the adverse impact of monetary tightening on the economic growth.
- Containing and bringing inflation within the targeted levels still remains the top priority for US, Europe and UK. While inflation in these economies has moderated significantly, it still remains above their comfort zone. The timing and quantum of rate cuts going into 2024 would be keenly watched by financial markets.
- An extended rate hike cycle may lead to unintended consequences and adversely impact the global economic growth. On the other hand, a premature reversal in rate cycle may lead to the core issue (inflation) remaining unaddressed in entirety.
