An open-ended Fund of Fund scheme investing in Mirae Asset Gold ETF

Why to Invest?

Gold is considered to be one of the reliable asset classes across time periods which may conserve & create wealth over long term.

A low correlation between gold and other asset classes helps in diversification with an aim to reduce overall portfolio risk.

Gold is considered to act as hedge against inflation and is known as one of the safe investment option during the times of turmoil.

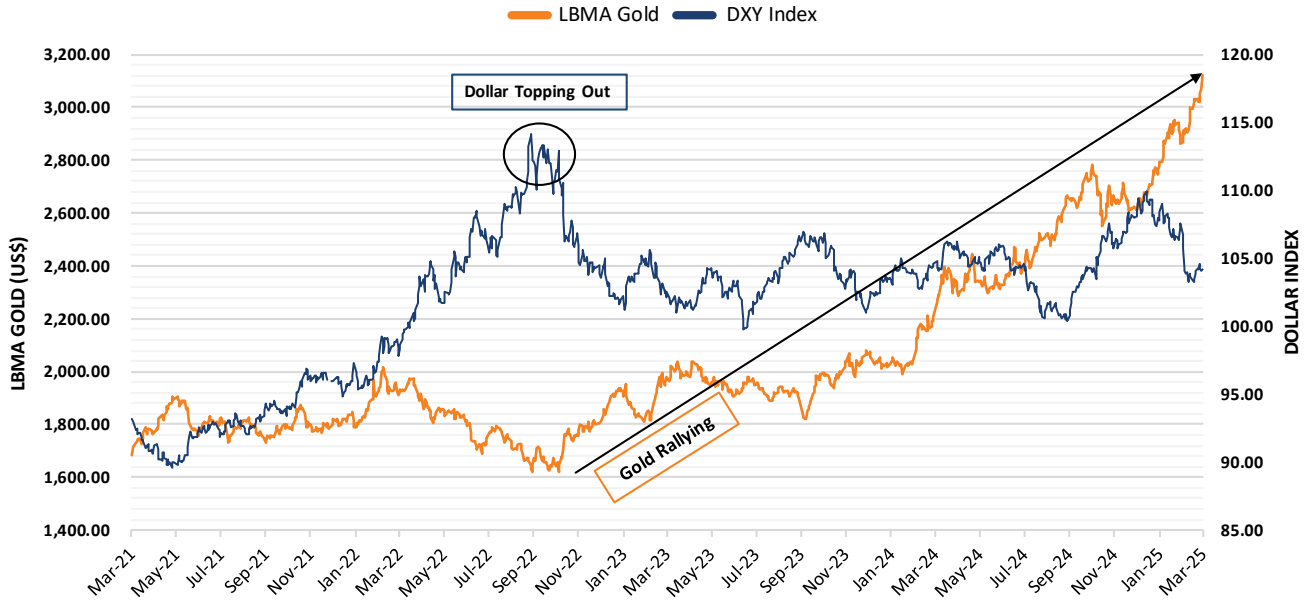

ETF* is a relatively low-cost and a highly liquid option to take exposure in gold which provides convenience of transaction on stock exchange just like stocks.

The risk of theft and lower quality is eliminated as units of Gold ETF are held in DEMAT account of the investors.

Gold performs when US Dollar weakens

Gold typically rallies post topping out of Dollar index, which shows inverse relationship between Gold and Dollar index. Softening in US Dollar is expected to support Gold prices
