Investment Strategy	This fund is positioned as a lower risk alternative to a pure equities scheme, while retaining some of the upside potential from equities exposure. The Scheme provides the Investment Manager flexibility to shift allocations within the mentioned asset allocation in the event of a change in view regarding an asset class.		

The Scheme will primarily invest in equity and equity related securities.

Equity:

The fund will invest atleast 65% of its assets in Equity and Equity Related Instruments of the companies. The investment in larger companies will help to provide more stability and less price volatility to the fund. This fund is positioned as a lower risk alternative to a pure equities scheme, while retaining the upside potential from equities exposure. The Scheme provides the Investment Manager flexibility to shift allocations within the mentioned asset allocation in the event of a change in view regarding an asset class however only to a limited extent of upto 35% in Debt & Money market instruments, though predominantly investing in equity and equity related securities. The fund manager may not have any bias towards particular theme or style in picking investment opportunities. However, the fund manager does have the flexibility to follow a focused approach on the investments. The universe of stocks will comprise majorly of companies having a robust business models, enjoying sustainable competitive advantages as compared to their competitors and have high return ratios.

The Scheme will also invest in debt securities and money market instruments. The Scheme does not propose to underwrite issuances of securities of other issuers. There will be no exposure to securitized debt securities in the portfolio.

For the equity portion, to the extent the fund invests in equity shares, the focus would be to build a diversified portfolio of strong growth companies, reflecting our most attractive investment ideas, at all points of time.

The fund manager broadly analyses the macro economy, industry trends and business cycles. He will invest in companies that benefit from macroeconomic, industry and sectoral trends (Top down Theme Overlay) after doing bottom up analysis and due diligence, quality of management in terms of corporate governance and commitment to minority shareholders etc.

The Fund Manager will try to have a large base of stocks in the portfolio to avoid concentration risk and liquidity risk. The Fund Managers will monitor the trading volumes in a particular stock before investment to avoid liquidity risk.

The Scheme will also invest in debt securities and money market instruments.

- The credit quality of the portfolio will be maintained and monitored using in-house research capabilities as well as inputs from external sources such as independent credit rating agencies.
- The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security/instrument selection.
- The bottom up approach will assess the quality of security/instrument (including the financial health of the issuer) as well as the liquidity of the security.
- Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification.

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. The system has incorporated all the investment

	restrictions as per SEBI guidelines and “soft” warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner. RISK CONTROLS Investments made from the net assets of the Scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations. The AMC will strive to achieve the investment objective by way of a judicious portfolio mix comprising of Equity and Equity Related Instruments, Debt and Money Market Instruments, Derivatives and units issued by REITs and InvITS. Every investment opportunity in Debt and Money Market Instruments would be assessed with regard to credit risk, interest rate risk, liquidity risk, derivatives risk and concentration risk. The risk control measures for managing the debt portion of the scheme are: 1. Monitoring risk adjusted returns performance of the fund with respect to its peers and its benchmark. 2. Tracking analysis of the fund on various risk parameters undertaken by independent fund research / rating agencies or analysts and take corrective measures if needed. 3. Credit analysis plays an important role at the time of purchase of bond and then at the time of regular performance analysis. Our internal research anchors the credit analysis. Sources for credit analysis include Capital Line, CRISIL, ICRA updates etc. Debt ratios, financials, cash flows are analysed at regular intervals to take a call on the credit risk. 4. We define individual limits for G Sec, money market instruments, MIBOR linked debentures and corporate bonds exposure, for diversification reasons. The Investment Manager endeavors to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one to one meetings with the managements, attending conferences and analyst meets and also tele-conferences.
