Investment Strategy

The scheme will seek to achieve its investment objective primarily by employing various strategies which seek to exploit available arbitrage opportunities in markets along with pure equity investments and investments in debt and money market instruments.

Equity:

The fund has the flexibility to invest across market capitalization in portfolio companies.

The fund manager does have the flexibility to follow a focused approach on the investments.

The focus would be to build a portfolio of strong growth companies, reflecting our most attractive investment ideas at all points of time.

The universe of stocks will comprise majorly of companies having robust business models, enjoying sustainable competitive advantages as compared to their competitors and have high return ratios.

The Fund Manager will try to have a large base of stocks in the portfolio to avoid concentration risk and liquidity risk. The Fund Managers will monitor the trading volumes in a particular stock before investment to avoid liquidity risk.

Equity Derivatives:

In pursuance of Investment Objective of the Scheme, the Scheme would use derivatives to generate income through arbitrage opportunities between cash and derivative market and arbitrage opportunities within the derivative segment subject to SEBI (MF) Regulations. The Scheme intends to take position in derivative instruments like Index Futures, Stock Futures, Index Options and such other derivative instruments as may be permitted by SEBI from time to time.

Debt securities:

The Scheme will also invest in high quality debt securities with portfolio duration based on interest rate view and money market instruments.

- The credit quality of the portfolio will be maintained and monitored using in-house research capabilities as well as inputs from external sources such as independent credit rating agencies.
- The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security/instrument selection.
- The bottom up approach will assess the quality of security/instrument (including the financial health of the issuer) as well as the liquidity of the security.
- Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment.

The Scheme is subjected to risk factors associated with risks associated with Equity Investments, Debt & Money Market Instruments, Derivatives, risk factors associated with potential change in tax structure, Securities Lending, risks associated with investing in Tri-Party Repo through CCIL (TREPS) etc, as detailed in the SID.

Risk Control measures

Concentration Risk

The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.

Liquidity Risk

The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity

corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.

Risks Associated with Equity Investments:

The scheme has a diversified portfolio to counter the volatility in the prices of individual stocks. Diversification in the portfolio reduces the impact of high fluctuations in daily individual stock prices on the portfolio.

Risks Associated with Debt & Money Market Instruments

<u>Credit Risk</u> - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools like but not limited to calculating risk ratios, tracking error etc. The AMC has implemented Quantis as the Front Office and Settlement System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and "soft" warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner.

The risk control measures for managing the debt portion of the scheme are:

- 1. Monitoring risk adjusted returns performance of the fund with respect to its peers and its benchmark.
- 2. Tracking analysis of the fund on various risk parameters undertaken by independent fund research / rating agencies or analysts and take corrective measures if needed.
- 3. Credit analysis plays an important role at the time of purchase of bond and then at the time of regular performance analysis. Our internal research anchors the credit analysis. Sources for credit analysis include Capital Line, CRISIL, ICRA updates etc. Debt ratios, financials, cash flows are analysed at regular intervals to take a call on the credit risk.
- 4. We define individual limits for G-Sec, money market instruments, MIBOR linked debentures and corporate bonds exposure, for diversification reasons.

The Scheme does not propose to underwrite issuances of securities of other issuers.

TERMS AND CONDITIONS

- 1. One Time Mandate (OTM) is a facility (herein after referred as 'facility') whereby the Unit holder(s) can register a One Time Mandate to debit their bank account up to a certain limit per transaction, as per their choice, with Mirae Asset Mutual Fund ('Fund') and authorizing the Fund and the bank to debit their bank account for payment towards various purchases or SIP instalments submitted through various modes offered or as may be offered from time to time by Mirae Asset Mutual Fund.
- This facility is an authorization to the bank, as indicated by the Unit holder(s) in the OTM form, to debit their bank account up to a certain limit in a particular folio per registration per transaction, based on their instruction to the Fund, whenever they choose to invest or start a SIP
- 3. Unless otherwise specified, the term 'mandate' in these terms and conditions refers to the specific bank and bank account number of the investor/s or unit holder/s as mentioned by them in the OTM form (mandate form) to be used for debits for payment towards SIP instalments..
- 4. The Application Form should be completed in ENGLISH and in BLOCK LETTERS only.
- 5. Investors who have already submitted a One Time Mandate (OTM) form or already registered for OTM facility should not submit OTM form again as OTM registration is a one-time process only for each bank account. However, if such investors wish to add a new bank account towards OTM facility may fill the form.
- 6. Investors, who have not registered for OTM facility, may fill the OTM form and submit duly signed with their name mentioned.
