# Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment.

The Scheme is subjected to risk factors associated with Debt & Money Market Instruments, Risks associated with segregated portfolio, Risks associated with investing in Tri-Party Repo through CCIL (TREPS), risks associated with investing in underlying schemes.

## Risk Control measures

#### **Concentration Risk**

The Scheme will try and mitigate this risk by investing in large number of companies so as to maintain optimum diversification and keep stock-specific concentration risk relatively low.

#### **Liquidity Risk**

As such the liquidity of stocks that the fund invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks.

#### **Risks Associated with Equity Investments:**

The scheme has a diversified portfolio to counter the volatility in the prices of individual stocks. Diversification in the portfolio reduces the impact of high fluctuations in daily individual stock prices on the portfolio.

#### **Risks Associated with Debt & Money Market Instruments**

<u>Credit Risk</u> - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated
