However, if the asset allocation pattern is to be altered for other reasons, as this is a fundamental attribute, the procedure outlined in the paragraph on fundamental attributes below, shall be followed.</p>
Investment Strategy	<p>The Scheme aims to invest in debt and money market instruments issued by entities such as Scheduled Commercial Banks, Public Financial Institutions (PFIs), Public Sector Undertakings (PSUs), Municipal Corporations and such other bodies. The Scheme shall endeavour to develop a well-diversified portfolio of debt (including securitised debt) and other instruments.</p> <p>The Scheme may also invest in the schemes of Mutual Funds. The Scheme may seek investment opportunity in the Foreign Debt Securities, in accordance with guidelines</p>

	<p>stipulated in this regard by SEBI and RBI from time to time. Investment in Foreign Debt Securities may be done in government securities and in debt/money market instruments issued by Foreign Commercial Banks/PSUs/PFIs/Municipal bodies. The Scheme may also invest in the hybrid securities viz. units of REITs and InvITs for diversification and subject to necessary stipulations by SEBI from time to time.</p> <p>Though every endeavor will be made to achieve the objective of the Scheme, the AMC / Sponsors / Trustee do not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.</p>
<i>Risk Profile of the Scheme</i>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment.</p> <p>The Scheme is subjected to risk factors associated with risks associated with Derivatives, Risks associated with segregated portfolio, Risk Associated with Securitized Debt, Risk Factors Associated with Investments in REITs and InvITS, Risk associated with Securities Lending, Risk associated with short selling</p>
<i>Risk Control measures</i>	<p>RISK CONTROL:</p> <p>The Investment Manager endeavors to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one to one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions etc.</p> <p>RISK MITIGATION MEASURES</p> <p>Concentration Risk</p> <p>The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.</p> <p>Liquidity Risk</p> <p>The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.</p> <p>Credit Risk - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.</p> <p>Risks Associated with Repo in Corporate Debt</p> <p>1) <u>Illiquidity Risk</u></p> <p>The repo market for corporate debt securities is over the counter (OTC) and illiquid. Hence, repo obligations cannot be easily sold to other parties. Therefore, to mitigate such risks, it has been stipulated that gross exposure to Repo in corporate bonds would be limited to 10% of net assets of the concerned scheme. Further, the tenor of repo would be taken based on nature and unit holders' pattern of the scheme.</p>

	<p>2) <u>Counter-party risk</u></p> <p>Credit risk would arise if the counter-party fails to repurchase the security as contracted or if counterparty fails to return the security or interest received on due date. To mitigate such risks, the schemes shall carry out repo transactions with only those counterparties, which has a credit rating of 'A1+' or 'AA- and above'. In case of lending of funds as a repo buyer, minimum haircuts on the value of the collateral security have been stipulated, and we would receive the collateral security in the scheme's account before the money is lent to the counter-party. Overall, we would have a limited number of counter-parties, primarily comprising of Mutual Funds, Scheduled Commercial banks, Financial Institutions and Primary dealers. Similarly, in the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter-party may hurriedly dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Scheme. Thus, the Scheme may suffer losses in such cases. Sufficient funds flow management systems are in place to mitigate such risks.</p> <p>3) <u>Collateral Risk (as a repo buyer)</u></p> <p>Collateral risks arise due to fall in the value of the security (change in credit rating and/or interest rates) against which the money has been lent under the repo arrangement. To mitigate such risks, we have stipulated the minimum credit rating of the issuer of collateral security.</p> <p>('AA' for long-term instruments/A1+ for money market instruments), maximum duration of the collateral security (10 years) and minimum haircuts on the value of the security.</p>
