Investment Strategy

The Scheme will invest across debt securities and money market instruments.

The investment strategy of this scheme aims to optimize risk adjusted returns through an active management of the portfolio. The Scheme is a medium to long-term investment option that provides the flexibility to respond to continuously changing market scenario by actively managing its portfolio in line with the evolving interest rate scenario. During periods when interest rates are expected to decline, the duration of the portfolio may be increased and during periods when interest rates are expected to harden, duration of the portfolio may be decreased. Similarly, when spreads on corporate bonds are expected to

contract, proportion of corporate bonds in portfolio may be increased and vice-versa. The objective of this active management is to thereby improve on returns as compared to a less active portfolio. The interest rate risk/duration risk of the scheme may change substantially depending upon the outlook on interest rates and other factors like steepness of yield curve and bond spreads. Such outlook will be developed by assessment of various macro factors like economic growth, inflation, credit pick-up, liquidity and other such factors as considered relevant.

Credit portfolio management will be primarily guided by external credit ratings assigned by any of the recognized credit rating agency. The credit quality of the portfolio will be continuously monitored using in-house research capabilities as well as inputs from external sources s including independent credit rating agencies.

The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security/instrument selection.

The bottom up approach will assess the quality of security/instrument (including the financial health of the issuer) as well as the liquidity of the security.

Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification.

RISK CONTROL

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools like but not limited to calculating risk ratios, tracking error etc. The AMC has implemented Bloomberg as the Front Office and Settlement System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and "soft" warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner.

The risk control measures for managing the debt portion of the scheme are:

- Monitoring risk adjusted returns performance of the fund with respect to its peers and its benchmark.
- 2. Tracking analysis of the fund on various risk parameters undertaken by independent fund research / rating agencies or analysts and take corrective measures if needed.
- 3. Interest rate risk is a function of the maturity profile or the tenure of the security in the portfolio. This is proactively monitored by managing average maturity in line with our view on the market.
- 4. Credit analysis plays an important role at the time of purchase of bond and then at the time of regular performance analysis. Our internal research anchors the credit analysis. Sources for credit analysis include Capital Line, CRISIL, ICRA updates etc. Debt ratios, financials, cash flows are analyzed at regular intervals to take a call on the credit risk.
- 5. We have different maturity buckets for corporate bonds. By being in different maturity buckets, we avoid concentration of the portfolio in a maturity bucket. We define individual limits for G Sec, money market instruments, MIBOR linked debentures and corporate bonds exposure, for diversification reasons.

2. Multi-SIP is a facility whereby the Unit holder(s) can register a One Time Mandate to debit their bank account for the sum total of the Multiple SIP(s) amount as applied for under eligible schemes. Cheque amount should be equivalent with total SIP(s)

instalment amount. For any mis-match in the amount application will be liable to be rejected. Under this application, the Investor authorizes the Fund and the bank to debit their bank account for payment towards various purchases through SIP instalments submitted through various modes offered or as may be offered from time to time by Mirae Asset Mutual Fund.

Please refer the "Minimum Application/Number of units" mentioned in the KIM under the section as Applicable to Eligible schemes under this Multi SIP Facility for minimum subscription amount and frequency. Default Option is Growth. In case of Income Distribution Cum Capital Withdrawal (IDCW) option, default option is IDCW-Reinvestment.

In case of ambiguity at Plan level, Application will be processed under Direct Plan as Default option.

Investor shall have the option of choosing any date of the month as the SIP date from 01st to 28th except the last three calendar dates 29th, 30th & 31st. If SIP debit date is not mentioned default date would be considered as 5th of every month. Even If the Investor selects or mentions the SIP dates as 29th, 30th or 31st, the default SIP date would be considered as 05th of every month only.

- 3. This facility is an authorization to the bank, as indicated by the Unit holder(s) in the OTM form, to debit their bank account up to a certain limit in a particular folio per registration per transaction, based on their instruction to the Fund, whenever they choose to invest or start a SIP.
- 4. Maximum amount per OTM is Rupees 1 Crore. Kindly ensure that the Max Amount mentioned has to be greater than the total SIP quantum applied for. Investors are requested to note that if OTM with similar bank account details is already registered under the folio, AMC will endeavor to register the applied SIP(s) with the already existing OTM subject to the total SIP amount (existing plus applied for) being under the maximum limit authorized. In any case, the higher of the max limit will be taken in to consideration.

If the unit holder(s) has changed the max limit amount, then the mandate will be registered as a fresh mandate with the revised details. Further, unit holder(s) will be able to register multiple OTM (up to 5 mandates) of different bank account numbers maintained with the same bank or different banks. If any OTM is submitted outside the already existing 5 mandates, the same shall be liable to be rejected.

- 5. Unless otherwise specified, the term 'mandate' in these terms and conditions refers to the specific bank and bank account number of the investor/s or unit holder/s as mentioned by them in the OTM form (mandate form) to be used for debits for payment towards SIP instalments.
