Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. The exposure to derivatives will be rebalanced to align with the underlying index changes in weights or constituents. Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading positions. Exposure to such derivatives will be restricted to 20% of net assets of the scheme. The above deviation shall not exceed for more than 7 days for the asset allocation table. The Scheme may invest in derivatives upto 20% of the net assets of the Scheme for non- hedging purposes.

In accordance with para 13.8 of SEBI Master Circular dated March 20, 2026, the cumulative gross exposure through equity, derivatives, debt instruments and money market instruments including debt/liquid schemes of domestic mutual fund, Government of India bonds, other permitted securities/assets and such other securities/assets as may be permitted by the SEBI from time to time, subject to regulatory approvals, if any, shall not exceed 100% of the net assets of the scheme.

Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. SEBI vide letter dated November 3, 2021 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities having residual maturity of less than 91 days.

In accordance with Para 4.3 and 4.4 of SEBI Master Circular dated March 20, 2026, the underlying index shall comply with the portfolio concentration norms as prescribed.

Debt securities include, but are not limited to, Debt securities of the Government of India, State and Local Governments, Government Agencies, Statutory Bodies, Public Sector Undertakings, Public Sector Banks or Private Sector Banks or any other Banks, Financial Institutions, Development Financial Institutions, and Corporate Entities, collateralized debt securities or any other instruments as may be prevailing and permissible under the Regulations from time to time).

The Debt Securities (including money market instruments) referred to above could be fixed rate or floating rate, listed, unlisted, privately placed, unrated among others, as permitted by regulation.

The Scheme may, for meeting liquidity requirements invest in units of overnight/money market/liquid schemes of Mirae Asset Mutual Fund and/or any other mutual fund provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund in accordance with Clause 3 of Sixth Schedule of SEBI (Mutual Funds) Regulations, 2026. The AMC shall not charge any investment management fees with respect to such investment.

Pending deployment of funds of a Scheme in securities in terms of investment objectives of the Scheme a mutual fund can invest the funds of the Scheme in short term deposits of scheduled commercial banks in terms of Para 13.7 of SEBI Master Circular dated March 20, 2026.

With respect to Debt portion, pursuant to clause 4.4.6 of SEBI Master Circular dated March 20, 2026 replication of the Index by the Scheme shall be as follows:

- The Scheme shall be considered to be replicating the underlying index, provided:
- i. The duration of the portfolio of Scheme replicates the duration of the underlying index within a maximum permissible deviation of +/- 10%.
 - ii. ETFs/Index Funds replicating a Constant Maturity index may invest in securities with residual maturity within +/-10% of maturity range of the index

The scheme may invest in Government of India Bonds in accordance with the risk and maturity replication guidelines for tracking the underlying debt index. Based on the availability of issuances, it is expected that the portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said broad risk parameters of the portfolio of the Scheme such as credit rating, weighted average YTM, weighted average maturity, asset allocation etc. are expected to be similar to the Underlying Index.

Any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

In the event of involuntary corporate action, the Scheme shall dispose the security not forming part of the underlying index within 7 calendar Days from the date of allotment/ listing.

Rebalancing of deviation due to short term defensive consideration:

Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. As per para 1.9.1 of SEBI Master Circular dated March 20, 2026, such changes in the investment pattern will be for short term and for defensive consideration only.

The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 Calendar days from the date of occurrence of deviation. Where the portfolio is not rebalanced within 7 Calendar Days, justification for the same including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee, after examining the root cause for delay may extend the timeline by 30 business days.

Tracking Error

The Scheme, in general, will hold all the securities that constitute the underlying Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances such tracking error is not expected to exceed 2% p.a for daily 12 month rolling return. However, in case of events like, dividend received from underlying securities, and market volatility during

	<p>rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the Scheme is an exchange traded fund, it will endeavor that at no point of time the Scheme will deviate from the index.</p>
