	<p>investments will be within the limits specified under SEBI (MF) Regulations. The AMC shall not charge any investment management fees with respect to such investment.</p> <p>Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive consideration only. In the event of deviations, portfolio rebalancing will be carried out within 30 calendar days. Where the portfolio is not rebalanced within 30 calendar Days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.</p> <p>Investments other than in equity will be made for managing liquidity in the normal market circumstances. The preferred instruments will be debt and money market instruments include commercial papers, commercial bills, treasury bills, Government securities, CBLO or notice money, certificate of deposit and any other like instruments as specified by Reserve Bank of India from time to time.</p>
<p>Investment Strategy</p>	<p>The Scheme will primarily invest in equity and equity related securities.</p> <p>The fund will invest atleast 65% of its assets in Equity and Equity Related Instruments of the companies. The investment in larger companies will help to provide more stability and less price volatility to the fund. This fund is positioned as a lower risk alternative to a pure equities scheme, while retaining the upside potential from equities exposure. The Scheme provides the Investment Manager flexibility to shift allocations within the mentioned asset allocation in the event of a change in view regarding an asset class however only to a limited extent of upto 35% in Debt & Money market instruments, though predominantly investing in equity and equity related securities. The fund manager may not have any bias towards particular theme or style in picking investment opportunities. However, the fund manager does have the flexibility to follow a focused approach on the investments. The universe of stocks will comprise majorly of companies having a robust business models, enjoying sustainable competitive advantages as compared to their competitors and have high return ratios.</p> <p>The Scheme will also invest in debt securities and money market instruments. The Scheme does not propose to underwrite issuances of securities of other issuers. There will be no exposure to securitized debt securities in the portfolio.</p> <p>For the equity portion, to the extent the fund invests in equity shares, the focus would be to build a diversified portfolio of strong growth companies, reflecting our most attractive investment ideas, at all points of time.</p> <p>The fund manager broadly analyses the macro economy, industry trends and business cycles. He will invest in companies that benefit from macroeconomic, industry and sectoral trends (Top down Theme Overlay) after doing bottom up analysis and due diligence, quality of management in terms of corporate governance and commitment to minority shareholders etc.</p> <p>The Fund Manager will try to have a large base of stocks in the portfolio to avoid concentration risk and liquidity risk. The Fund Managers will monitor the trading</p>

	<p>volumes in a particular stock before investment to avoid liquidity risk.</p> <p>The Scheme will also invest in debt securities and money market instruments.</p> <ul style="list-style-type: none"> • The credit quality of the portfolio will be maintained and monitored using in-house research capabilities as well as inputs from external sources such as independent credit rating agencies. • The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security/instrument selection. • The bottom up approach will assess the quality of security/instrument (including the financial health of the issuer) as well as the liquidity of the security. • Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification. <p>Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools like but not limited to calculating risk ratios, tracking error etc. The AMC has implemented Quantis as the Front Office and Settlement System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and “soft” warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner.</p> <p>The risk control measures for managing the debt portion of the scheme are:</p> <ol style="list-style-type: none"> 1. Monitoring risk adjusted returns performance of the fund with respect to its peers and its benchmark. 2. Tracking analysis of the fund on various risk parameters undertaken by independent fund research / rating agencies or analysts and take corrective measures if needed. 3. Credit analysis plays an important role at the time of purchase of bond and then at the time of regular performance analysis. Our internal research anchors the credit analysis. Sources for credit analysis include Capital Line, CRISIL, ICRA updates etc. Debt ratios, financials, cash flows are analysed at regular intervals to take a call on the credit risk. 4. We define individual limits for G Sec, money market instruments, MIBOR linked debentures and corporate bonds exposure, for diversification reasons.
<p><i>Risk Profile of the Scheme</i></p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>The Scheme is subjected to risk factors associated with investments in Equity Investments, risks associated with Debt & Money Market Instruments like price/interest rate risk, credit risk, liquidity risk, reinvestment risk, pre-payment risk, spread risk, concentration risk, risk associated with Derivative etc.</p>

The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner.</p> <p><u>Concentration Risk</u> The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.</p> <p><u>Liquidity Risk</u> The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimise liquidity risk by investing in securities having a liquid market.</p> <p><u>Risks Associated with Equity Investments:</u> The scheme has a diversified portfolio to counter the volatility in the prices of individual stocks. Diversification in the portfolio reduces the impact of high fluctuations in daily individual stock prices on the portfolio.</p> <p><u>Risks Associated with Debt & Money Market Instruments</u> <u>Credit Risk</u> - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.</p> <p>The risk control measures for managing the debt portion of the scheme are:</p> <ol style="list-style-type: none"> 1. Within the Total Expense Limit chargeable to the Scheme, following will be charged to the Scheme:

(a) GST on other than investment and advisory fees, if any, (including on brokerage and transaction costs on execution of trades) shall be borne by the Scheme;

(b) Investor education and awareness initiative fees of at least 2 basis points on daily net assets of respective Scheme.

Any expenditure in excess of the SEBI regulatory limits shall be borne by the AMC or the Sponsor.

The current expense ratios will be updated on the AMC website <https://miraeassetmf.co.in/downloads/regulatory>.

Further, the notice of change in base TER (i.e. TER excluding additional expenses provided in Regulation 52(6A) (b) and 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996) in comparison to previous base TER charged to the scheme will be communicated to investors of the scheme through notice via email or SMS at least three working days prior to effecting such change.

However, any decrease in TER due to decrease in applicable limits as prescribed in Regulation 52 (6) (i.e. due to increase in daily net assets of the scheme) would not require issuance of any prior notice to the investors. Further, such decrease in TER will be immediately communicated to investors of the scheme through email or SMS and uploaded on the AMC website.

The above change in the base TER in comparison to previous base TER charged to the scheme shall be intimated to the Board of Directors of AMC along with the rationale recorded in writing.

The changes in TER shall also be placed before the Trustees on quarterly basis along with rationale for such changes.

**Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc and no commission for distribution of Units will be paid / charged under

	<p>Direct Plan. The TER of the Direct Plan will be lower to the extent of the abovementioned distribution expenses/ commission which is charged in the Regular Plan.</p> <p>The purpose of the above table is to assist the investor in understanding the various costs & expenses that the investor in the Scheme will bear directly or indirectly. There is no assurance or guarantee that the investment objective of the scheme will be realized	Types of Instruments	Indicative allocation		Risk Profile	The scheme will seek to achieve its investment objective primarily by employing various strategies which seek to exploit available arbitrage opportunities in markets. If suitable arbitrage opportunities are not available in the opinion of the Fund Manager, the scheme may predominantly invest in debt and money market securities. The market provides opportunities to the investor to derive returns from the implied cost of carry between the underlying cash market and the derivatives market. This provides for opportunities to generate returns that are possibly higher than short term interest rates with minimal active price risk on equities. Implied cost of carry and spreads across the spot, futures and options markets can potentially lead to profitable arbitrage opportunities. The Scheme would carry out arbitrage strategies, which would entail taking offsetting positions in the various markets simultaneously. The arbitrage strategy can also be on account of buy-back of shares announced by a company and/or differences in prices between two exchanges/markets. In this case the arbitrage strategy will not include an offsetting derivatives transaction.	7,012	385.05
