Such changes in the investment pattern will be for short term and for defensive consideration only. In the event of deviations, portfolio rebalancing will be carried out within 30 calendar days. Where the portfolio is not rebalanced within 30 calendar Days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.</p>
<b>Investment Strategy</b>	<p>The Scheme shall be constructed and actively managed according to the investment objective. The Scheme seeks to generate returns through investments in a range of debt and money market instruments with Macaulay duration of the portfolio between 1 year to 3 years. The fund will be managed according to the investment objective, thereby seeking to generate reasonable returns commensurate with low risk.</p> <p>The Scheme may also invest in securities issued by corporate (both private sector and public sectors) including banks and financial institutions and Money Market Instruments across maturities / yield curve and ratings. The fund may also invest in government securities across maturities / yield curve. The fund may also look for opportunities from credit spreads among the range of available debt &amp; money market instruments. The investment strategy of this scheme aims to optimize risk adjusted returns. The Scheme has a short term duration investment option that provides the flexibility to respond to continuously changing market scenario by managing its portfolio in line with current yield curve.</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The credit quality of the portfolio will be maintained and monitored using in-house research capabilities as well as inputs from external sources such as independent credit rating agencies.</li> <li><input type="checkbox"/> The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security / instrument selection.</li> <li><input type="checkbox"/> The bottom up approach will assess the quality of security / instrument (including the financial health of the issuer) as well as the liquidity of the security.</li> <li><input type="checkbox"/> Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification techniques.</li> </ul> <p>The Scheme does not propose to underwrite issuances of securities of other issuers.</p> <p>The Scheme shall not invest in unrated debt instruments and derivatives. The Scheme shall not advance any loans. The Scheme does not invest in overseas/foreign securities. The scheme does not intend to participate in Stock Lending. The Scheme shall not participate in short lending, credit default swaps and Securities Lending &amp; Borrowing.</p> <p>The Scheme may invest in fixed income derivatives instruments like forward rate agreements, interest rate swaps etc. to the extent permitted under and in accordance with the applicable Regulations, including for the purposes of portfolio hedging and portfolio balancing to optimize the returns. The Scheme does not propose to underwrite issuances of securities of other issuers.</p> <p>The <b>Macaulay duration</b> is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.</p> <p>Macaulay duration can be calculated:</p>

	$\sum_{t=1}^n \frac{t \cdot C}{(1+y)^t} + \frac{n \cdot M}{(1+y)^n}$ <p style="text-align: center;">P</p> <p>Where:  t = respective time period  C = periodic coupon payment  y = periodic yield  n = total number of periods  M = maturity value  P = market price of bond</p> <p>Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk , Reinvestment Risk , Pre-payment Risk, Regulatory Risk Concentration, etc. Whilst such risks cannot be eliminated, they may be minimized through diversification. The Scheme shall aim to generate better returns than bank fixed deposits and government securities and may follow an accrual based strategy. The Scheme shall be based on Accrual strategy.</p>
<b>Risk Profile of the Scheme</b>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment.</p> <p>The Scheme is subjected to risk factors associated with risks associated with Debt &amp; Money Market Instruments like Securitized Debt, price/interest rate risk, credit risk, liquidity risk, reinvestment risk, pre-payment risk, spread risk, concentration risk, regulatory Risk, etc, risk Factors Associated with Investments in REITs and InvITS REITs and InvITS, risks Associated with Repo in Corporate Debt and risks associated with investing in Tri-Party Repo through CCIL (TREPS).</p>
<b>Risk Control measures</b>	<p>Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying &amp; measuring the risk through various Risk Measurement Tools like but not limited to calculating risk ratios, tracking error etc. The AMC has implemented Quantis as the Front Office and Settlement System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and “soft” warning alerts at appropriate levels for preemptive monitoring. The system enables identifying &amp; measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner.</p> <p>The risk control measures for managing the debt portion of the scheme are:</p> <ol style="list-style-type: none"> <li>1. Monitoring risk adjusted returns performance of the fund with respect to its peers and its benchmark.</li> <li>2. Tracking analysis of the fund on various risk parameters undertaken by independent fund research / rating agencies or analysts and take corrective measures if needed.</li> <li>3. Interest rate risk is a function of the maturity profile or the tenure of the security in the portfolio. This is proactively monitored by managing average maturity in line with our view on the market.</li> <li>4. Credit analysis plays an important role at the time of purchase of bond and then at the time of regular performance analysis. Our internal research anchors the credit analysis.</li> </ol>

	<p>Sources for credit analysis include Capital Line, CRISIL, ICRA updates etc. Debt ratios, financials, cash flows are analysed at regular intervals to take a call on the credit risk.</p> <p>5. We have different maturity buckets for corporate bonds. By being in different maturity buckets, we avoid concentration of the portfolio in a maturity bucket. We define individual limits for G Sec, money market instruments, MIBOR linked debentures and corporate bonds exposure, for diversification reasons.</p> <p><b>RISK MITIGATION MEASURES:</b></p> <p><b><u>Concentration Risk:</u></b> The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.</p> <p><b><u>Liquidity Risk</u></b></p> <p>The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.</p> <p><b><u>Risk of investing in unlisted securities</u></b></p> <p>As per SEBI guidelines, not more than 10% of the portfolio can be invested in unlisted securities. Rigorous due diligence is undertaken before any investments are made by the portfolio in unlisted securities, if any.</p> <p><b><u>Risks Associated with Debt &amp; Money Market Instruments</u></b></p> <p><b><u>Credit Risk</u></b> - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.</p>				
<b>Plans and Options</b>	<p>The Scheme will have Regular Plan and Direct Plan** with a common portfolio and separate NAVs. Investors should indicate the Plan for which the subscription is made by indicating the choice in the application form.</p> <p>Each of the above Regular and Direct Plan under the scheme will have the following Options / Sub-options: (1) Growth Option and (2) Income Distribution cum capital withdrawal option (IDCW). The Income Distribution cum capital withdrawal option shall have 2 sub options: (a) Payout of Income Distribution cum capital withdrawal option (“Payout of IDCW”) (b) Reinvestment of Income Distribution cum capital withdrawal option (“Reinvestment of IDCW”).</p> <p>The default option for the unitholders will be Regular Plan - Growth Option if he is routing his investments through a distributor and Direct Plan – Growth option if he is a direct investor.</p> <p>If the unit holders selects IDCW option but does not specify the sub-option then the default sub-option shall be Reinvestment of IDCW..</p> <p>Investors subscribing under Direct Plan of the Scheme will have to indicate “Direct Plan” against the Scheme name in the application form i.e. “MIRAE ASSET SHORT TERM FUND - Direct Plan”.
