Investments in gold (includes physical Gold and other Gold related instruments which may be permitted by Regulator from time to time) would be primarily assessed with regard to its fineness.</p> <p>For detailed investment strategy, refer SID.</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment.</p> <p>The Scheme is subjected to risk factors associated with Risk Factors associated with Exchange traded Schemes, Gold and Gold related instruments, handling, storing and safekeeping of physical gold, Custody of Gold, Lending of physical Gold.</p>
Risk Control measures	<p>Risk Factors associated with Exchange traded Schemes</p> <p>The Scheme is subject to the specific risks that may adversely affect the Scheme's NAV, return and / or ability to meet its investment objective. The specific risk factors related to the Scheme include, but are not limited to the following:</p> <p>Risk factors associated with investing in Gold and Gold related instruments</p> <ul style="list-style-type: none"> • The NAV of the Units relates directly to the value of the gold held by the Scheme minus the expenses incurred in managing of the scheme including but not limited to management fees, Operational expenses, cost incurred to buy and sell, taxes, other charges, tracking error, tracking difference (Positive or negative) and fluctuations in the price of gold could adversely affect investment value of the Units. The factors that may affect the price of gold, <i>inter-alia</i>, include economic and political developments, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, etc. • Actual or perceived disruptions in the processes used to determine the LBMA Gold Price, or lack of confidence in that benchmark, may adversely affect the return on your investment in the scheme (if any). • Future governmental decisions may have significant impact on the price of gold, which may result in a significant decrease or increase in the value of the net assets and the net asset value.

- Because the ETF holds only gold, an investment in the ETF may be more volatile than an investment in a more broadly diversified portfolio.
- To the extent that demand for gold exceeds the available supply at that time, Market Makers may not be able to readily acquire sufficient amounts of gold necessary for the creation of a Basket. Market speculation in gold could result in increased requests for the issuances. It is possible that Market Makers may be unable to acquire sufficient gold that is acceptable for delivery for the issuance of new Baskets due to a limited then-available supply coupled with a surge in demand for the ETF units. In such circumstances, the AMC may suspend or restrict the issuance of Baskets. Such occurrence may lead to further volatility in Share price and deviations, which may be significant, in the market price of the ETF units relative to the NAV.
- The gold market in general has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to factors such as gold's uses in jewelry, technology, and industrial applications, or cost and production levels in major gold-producing countries such as China, Mexico, and Peru. In particular, supply chain disruptions resulting from the COVID-19 outbreak and investor speculation have significantly contributed to recent price and volume fluctuations.
- The formula for determining NAV of the Units is based on the imported (landed) value of gold. The landed value of gold is computed by multiplying international market price by US dollar value. The value of gold or NAV, therefore will depend upon the conversion value of US dollar into Indian rupee and attracts all the risks attached to such conversion and forex volatility.
- There is no Exchange for physical gold in India. The Scheme may have to buy or sell gold from the open market, which may lead to counter party risks for the Scheme for trading and settlement.
- The returns from physical gold in which the Scheme invests may underperform returns from other securities or asset classes.
- There is a risk that part or all of the Scheme's gold could be lost, damaged or stolen. Access to the Scheme's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the Scheme and consequently on investment / redemption in Units.
- The Scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements. The Scheme has to sell gold only to bullion bankers / traders who are authorized to buy gold. Though, there are adequate numbers of players (commercial or bullion bankers) to whom the Scheme can sell gold, the Scheme may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses. The distress sale may affect the redemption value of the units adversely. The Trustee, in general interest of the Unit holders of the Scheme offered under this Scheme Information Document and keeping in view of the unforeseen circumstances / unusual market conditions, may limit the total number of Units, which can be redeemed on any Business Day.
- Any changes in trading regulations by the stock exchange(s) or SEBI may affect the ability of Market Makers to arbitrage resulting into wider premium / discount to NAV. Any changes in the regulations relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the Scheme to buy / sell gold against the purchase and redemption requests received.
- The Scheme is not actively managed. The performance of the Scheme may be affected by a general price decline in the Gold prices. The Scheme invests in the physical Gold regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets.
- For the valuation of gold by the Scheme, indirect taxes like customs duty, VAT, etc. would also be considered. Hence, any change in the rates of indirect taxation / applicable taxes would affect the valuation of the Scheme.
- Gold Exchange Traded Funds (GETFs) are relatively new products and their value could decrease if unanticipated operational or trading problems arise. Mirae Asset Gold ETF, an open ended Exchange Traded Fund, is therefore subject to operational risks.
- Though this is an open-ended scheme, the Scheme would ordinarily repurchase Units in Creation Unit Size. Thus Unit holding less than Creation Unit Size can only be sold through the secondary market on the Exchange. Further, the price received upon the redemption of Units of the Scheme may be less than the value of the gold represented by them.
- A day on which valuation on London Bullion Market Association (LBMA) is not available shall not be a Business day and hence NAV for the said day shall not be available to the Investors.
- Mirae Asset Gold ETF (the Scheme) is a passively managed fund that shall be investing substantial portion of its assets in physical gold and tracking its performance as close as possible to the price of gold. Therefore, irrespective of decline / rise in prices of physical gold, the Scheme shall remain invested in gold and being a passively managed fund, no active calls based on outlook of gold prices will be taken by the Fund.
- Investments by the Scheme are subject to availability of Gold. If favorable investment opportunities do not exist or opportunities have notably diminished, the scheme may suspend accepting fresh subscriptions.

- Performance of the Scheme may be affected by political, social and economic developments, which may include changes in government policies, diplomatic conditions, taxation and other policies.
- ETF units are created to reflect, at any given time, the market price of gold. Because the value of ETFs depends on the price of gold, it is subject to fluctuations similar to those affecting gold prices. The price of gold has fluctuated widely over the past several years. If gold markets continue to be characterized by the wide fluctuations that they have shown in the past several years, the price of the ETF units will change widely and in an unpredictable manner. This exposes your investment in ETF units to potential losses if you need to sell your ETF units at a time when the price of gold is lower than it was when you made your investment in ETF units. Even if you are able to hold ETF units for the mid- or long-term you may never realize a profit, because gold markets have historically experienced extended periods of flat or declining prices. Investors should be aware that while gold is used to preserve wealth by investors around the world, there is no assurance that gold will maintain its long-term value in terms of future purchasing power. In the event the price of gold declines, it is expected the value of an investment in the ETFs to decline proportionately.
- During the process of creation or redemption of the Scheme in creation unit size, the AMC will source or sell the physical gold from a counterparty. The price at which the gold is bought or sold at will include a spread also, apart from cost price of the gold, taxes and other transaction cost. Thus cost may vary depending on the source from which gold is bought or sold, due to different cost being charged by the counterparty. This varying buying or selling cost will impact the cost at which units are created for the investor or redeemed for the investor. AMC will most likely be passing on all the cost associated with buying and selling of the physical gold, including spread, transaction cost, taxes etc. on to the investor/investors. This will impact the per unit cost realized by the investor in case of creation or redemption directly with the AMC
- The AMC within the regulatory guidelines and room given in Scheme information document, may use derivative on gold (like Futures) for rebalancing, holding, creation of fresh units or redemption of existing units for the Scheme. The use of derivatives may affect the performance of the scheme and tracking error. It may also impact the value at units are created or redeemed by the scheme.
- If the process of creation and redemption of Baskets encounters any unanticipated difficulties or is materially restricted due to any illiquidity in the market for physical gold, the possibility for arbitrage transactions by Market Makers, intended to keep the price of the ETF units closely linked to the price of gold may not exist and, as a result, the price of the ETF units may fall or otherwise diverge from NAV.

Risks associated with handling, storing and safekeeping of physical gold:

All physical gold procured must follow the LBMA guidelines as per prescribed SEBI guidelines.

Risk arises when part or all of the gold held by the Fund could be lost, stolen or damaged and access to gold may be restricted due to natural calamities or human actions, loss or damage directly or indirectly occasioned by, happening through or in consequence of war, invasion, acts of foreign enemies, hostilities (whether war be declared or not), civil war, rebellion, revolution, insurrection, military or usurped power. Loss due to aridity, humidity, exposure to light or extremes of temperature. Hence, the Custodian maintains insurance in regard to the business on terms and conditions and the custodian is also responsible for all costs arising from the insurance policies.

The custodian taking delivery on behalf of the AMC needs to ensure the weight, purity, and the source of gold as specified under the LBMA guidelines.

Since this is paramount to the SEBI guidelines the risk arises in violation of same.

Safekeeping of physical gold requires appropriate vaulting space, conforming to the best global standards. The vaulting agents engaged by the custodian needs to ensure the same.

Risks Related to the Custody of Gold

- The Custodian is responsible for the safekeeping of the gold bullion and also facilitates the transfer of gold bullion into and out of the vault. Although the Custodian is a market maker, clearer and approved weigher under the rules of the LBMA (which sets out good practices for participants in the bullion market), the LBMA is not an official or governmental regulatory body. Accordingly, the ETF is dependent on the Custodian to comply with the best practices of the LBMA and to implement satisfactory internal controls for its gold bullion custody operations in order to keep the gold bullion secure.

	<ul style="list-style-type: none"> • The Custodian is responsible for loss or damage to the gold only under limited circumstances. The Custodian Agreement contemplates that the Custodian will be responsible to the AMC only if it acts with negligence, fraud or in willful default of its obligations under the Custodian Agreement. In addition, the Custodian has agreed to indemnify the Trust for any loss or liability directly resulting from a breach of the Custodian's representations and warranties in the Custodian Agreement, a failure of the Custodian to act in accordance with the instructions or any physical loss, destruction or damage to the gold held for the Trust's account, except for losses due to nuclear fission or fusion, radioactivity, war, terrorist event, invasion, insurrection, civil commotion, riot, strike, act of government or public authority, act of God or a similar cause that is beyond the control of the Custodian for which the Custodian will not be responsible to the AMC. The Custodian's liability to the AMC, if any, will be limited to the value of any gold lost, or the amount of any balance held on an unallocated basis, at the time of the Custodian's negligence, fraud or willful default, or at the time of the act or omission giving rise to the claim for indemnification. • Neither the Shareholders nor any Authorized Participant have a right under the Custodian Agreement to assert a claim against the Custodian. Claims under the Custodian Agreement may only be asserted by the AMC. • The procedures agreed to with the Custodian contemplate that the Custodian must undertake certain tasks in connection with the inspection of gold delivered by Market Makers in exchange for Baskets. The Custodian's inspection includes review of the corresponding bar list to ensure that it accurately describes the weight, fineness, refiner marks and bar number appearing on the gold bars, but does not include any chemical or other tests designed to verify that the gold received does, in fact, meet the purity requirements. Accordingly, such inspection procedures may not prevent the deposit of gold that fails to meet these purity standards. The Custodian will not be responsible or liable to the Trust or to any investor in the event any gold otherwise properly inspected by it does not meet the purity requirements • The AMC does not insure its gold (Underlying gold of the scheme). The Custodian maintains insurance on such terms and conditions as it considers appropriate in connection with its custodial obligations under the Custodian Agreement and is responsible for all costs, fees and expenses arising from the insurance policy or policies. The AMC is not a beneficiary of any such insurance and does not have the ability to dictate the existence, nature or amount of coverage. Therefore, Shareholders cannot be assured that the Custodian maintains adequate insurance or any insurance with respect to the gold held by the Custodian on behalf of the Trust. • Tracking Error Risk: The Fund Manager would not be able to invest the entire corpus in physical gold due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the underlying index and regulatory restrictions, which may result in Tracking Error with the underlying index. The Scheme's returns may therefore deviate from those of the underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. Tracking Difference" is the annualized difference of daily returns between the goods and the NAV of the scheme (difference between fund return and the goods return). Tracking Error and Tracking difference may arise including but not limited to the following reasons:- <ul style="list-style-type: none"> • Expenditure incurred by the Fund. • Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, for corporate actions or otherwise. • Securities trading may halt temporarily due to circuit filters. • Corporate actions such as debenture or warrant conversion, rights issuances, mergers, change in constituents etc. • Rounding-off of the quantity of shares in the underlying index. • Dividend payout. • Index providers undertake a periodical review of the scrips that comprise the underlying index and may either drop or include new scrips. In such an event, the Fund will try to reallocate its portfolio but the available investment/reinvestment opportunity may not permit absolute mirroring immediately. <p>Risk associated with Lending of physical Gold</p> <ul style="list-style-type: none"> ■ Market Trading Risks • Although Units of Scheme described in this Scheme Information Document are listed / to be listed on the Exchange, there can be no assurance that an active secondary market will be developed or be maintained. • Trading in Units of the Scheme on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange Authorities or SEBI, trading in Units of the Scheme is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to the
--	---

	<p>Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of Units of the Scheme will continue to be met or will remain unchanged.</p> <ul style="list-style-type: none"> Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of market maker to arbitrage resulting into wider premium / discount to NAV. The Units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Units of the Scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Scheme. The Units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund during liquidity window depends upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control. Governments, central banks and related institutions worldwide, own a significant portion of the aggregate world gold holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world gold prices, the price of Units of the Scheme will be adversely affected. The Scheme provides for the creation and redemption of Units in Creation Unit Size directly with the Fund and therefore, it is expected that large discounts or premiums to the NAV of the Units of the Scheme will not sustain due to arbitrage opportunity available. Conversion of underlying physical gold into the Units of the Scheme may attract capital gain tax depending on acquisition cost and holding period. <p>Risk factors associated with investing in Gold Monetisation Scheme (GMS) and Gold Deposit Scheme (GDS)</p> <p>The ETF shall, as permitted by SEBI, may invest a part of its pool of physical gold assets in Gold Monetisation Scheme/Gold Deposit Scheme run by Banks. Under the GMS/GDS, the ETF will deposit its physical gold assets as principal with the Banks which offer such facility ("the issuer"). A situation could arise where the issuer is unable to return the principal physical gold to ETF upon maturity or in case of an early redemption. Such inability to return physical gold could arise on account of liquidity problems or general financial health of the issuer. A default by the issuer under a GMS /GDS may result in losses to the Unit holders of the ETF. GMS/GDS being an unlisted and non-transferrable security can be Redeemed only with the issuer and hence, is subject to the risk of an issuer's inability to meet principal and interest payments on the obligation (credit risk). Credit Risk means that the issuer of a Security may default on interest payments or even paying back the principal amount on maturity (i.e. the issuer may be unable to make timely principal and interest payments on the Security) which may result in losses to the Unitholders of the ETF.</p> <p>Risks Associated with Debt & Money Market Instruments</p> <p>While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.</p>
Creation Unit Size	<p>'Creation Unit Size' is the number of Units of the Scheme, which is exchanged against a predefined quantity and purity of physical Gold called the Portfolio Deposit and / or a Cash Component. For redemption of Units it is vice versa i.e. a fixed number of Units of Scheme are exchanged for Portfolio Deposit and Cash Component. The Portfolio Deposit and Cash Component may change from time to time and is discussed separately under this Scheme Information Document.</p> <p>Portfolio Deposit: Portfolio Deposit consists of pre-defined quantity and purity of physical gold and announced by AMC from time to time.</p> <p>Cash Component: Cash component represents the difference between the applicable net asset value of a creation unit and the market value of the Portfolio deposit.</p> <p>The Portfolio Deposit and Cash Component may change from time to time due to change in NAV and will be announced by the AMC on its website. The Creation Unit size for the scheme shall be 1,10,000 units. The Portfolio Deposit and the cash component will change from time to time as decided by AMC. The Creation Unit size may be changed by the AMC at their discretion and the notice of the same shall be published on website of Mutual Fund (www.miraeassetmf.co.in)</p>
