The Investment Committee, after examining the root cause for delay may extend the timeline by 30 business days.

#### **Rebalancing Period:**

For rebalancing the portfolio of the Scheme, the following norms shall apply:

- a) In case of change in constituents of the index due to periodic review, the portfolio of Scheme will be rebalanced within 7 calendar days.
- b) In case the rating of any security is downgraded to below the rating mandated in the index methodology (including downgrade to below investment grade), the portfolio be rebalanced within 30 calendar days.
- c) In case the rating of any security is downgraded to below investment grade, the said security may be segregated in accordance with in accordance with clause 4.4.4 and 4.4.5 of SEBI Master Circular dated June 27, 2024 on "Creation of segregated portfolio in mutual fund schemes".

The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible.

The annualized tracking difference averaged over one year period shall not exceed 1.25%. In case the average annualized tracking difference over one year period is higher than 1.25%, the same shall be brought to the notice of trustees with corrective actions taken by the AMC, if any.

#### Rebalancing of deviation due to short term defensive consideration

In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will rebalance the same within 7 days. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. Any alteration in the investment pattern will be for short-term defensive consideration as per Clause 1.14.1.2 of SEBI Master Circular dated June 27, 2024, the intention being at all times to protect the interests of the Unit Holders.

#### **Change in Asset Allocation:**

The above-mentioned investment pattern is indicative and subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may vary from time to time, on account of receipt of maturity proceeds, interest and/or receipt of subscription. As per clause 3.5.3.11 od SEBI Master Circular dated June 27, 2024 the Fund Manager, may deviate from the above investment pattern for short period on defensive considerations. The same will be rebalanced within 7 Business Days and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time.

#### **Tracking Error**

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weights as the securities have in the Underlying Index. However, deviations from the stated index replication may occur due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, delay in purchase or non-availability of underlying securities forming part of the index etc. The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or non-availability of securities which are part of the Index
- Delay in liquidation of bonds which have been removed by the Index
- Due to timing of transactions either on RFQ platforms or in open market
- Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPs
- Due to over-weight / under-weight investment in bonds of issuers at ISIN level which are part of the Index
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.

- Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, or corporate actions or otherwise
- Fees and expenses of the Scheme.
- The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities.
- Interest/Payout of Income Distribution cum capital withdrawal Option.
- Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.

While the intent of the scheme is to track the performance of the underlying index by investing in the bond forming part of the index, due to issues pertaining to liquidity of the debt market in India, the SEBI has prescribed guidelines within which the passive scheme may manage the allocation in the bonds and issuers which may or may not form part of the index, with same or different weightages, in order to decrease the risk replication of the underlying index within the allowed range. This will result in fund portfolio different from the index portfolio with difference in the performance and volatility of the scheme.

#### Investment Strategy

The Scheme follows a passive investment strategy. The Scheme seeks to track the CRISIL-IBX Financial Services 9-12 Months Debt Index subject to tracking error. Accordingly, the Scheme will invest in Commercial Papers (CPs), Certificates of Deposit (CDs) and Corporate Bond Securities, maturing in 9-12 months.

The portfolio of eligible securities invested by the Scheme is expected to have, in aggregate, fundamental characteristics such as modified duration, weighted average maturity, aggregate credit ratings, aggregate Yield to Maturity (YTM) etc. along with other liquidity parameters in line with CRISIL-IBX Financial Services 9-12 Months Debt Index.

The Macaulay Duration of Scheme shall replicate the duration of the index, in line with SEBI Master Circular, subject to maximum permissible deviation of +/- 10%.

The AMC uses a "passive" approach to try and achieve Scheme's investment objective. Unlike other Fund, the Scheme does not try to "beat" the markets. The AMC does not make any judgments about the investment merit of a particular instrument or a particular industry segment nor will it attempt to apply any economic, financial or market analysis.

Subject to the Regulations and the applicable guidelines the Scheme may invest in the schemes of Mutual Funds. The investment strategy shall be in line with the asset allocation mentioned under "Section II (c): How will the Scheme allocate its assets".

Though every endeavour will be made to achieve the objective of the Scheme, the AMC/Sponsors/Trustee does not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

#### Portfolio Turnover

The Scheme is a Constant Maturity Index Fund. Due to its passive nature, the portfolio turnover ratio may vary as the Scheme may change the portfolio according to Asset Allocation to align itself with the objectives of the Scheme and in accordance with the composition of CRISIL-IBX Financial Services 9-12 Months Debt Index. In cases of higher portfolio turnover, there may be higher brokerage and transaction costs.

### Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

#### **Scheme Specific Risk Factors:**

Some of the specific risk factors related to the Scheme include, but are not limited to the following:

  in the securities of the benchmark Index, the Scheme will not be actively managed. The
  Scheme may be affected by a general decline in the Indian markets relating to its
  Underlying Index. The Scheme invests in the securities included in its underlying index
  regardless of their investment merit. The AMC does not attempt to individually select
  securities or to take defensive positions in declining markets.
- Tracking Difference Risk: Tracking difference is the annualized difference of daily returns
  between the Index and the NAV of the Index Fund. The annualized tracking difference
  averaged over one-year period shall not exceed 1.25%. In case the average annualized
  tracking difference over one-year period for Debt ETFs/ Index Funds is higher than 1.25%,
  the same shall be brought to the notice of trustees with corrective actions taken by the
  AMC, if any.
