<p>Investment Strategy</p>	<p>The NIFTY NEXT 50 ETF will be managed passively with investments in stocks in a proportion that match as close as possible to the weights of these stocks in Nifty Next 50 Index. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Index as well as the incremental collections/redemptions in the Scheme. A part of the funds may be invested in debt and money market instruments, to meet the liquidity requirements.</p> <p>Subject to the Regulations and the applicable guidelines the Scheme may invest in the schemes of Mutual Funds. The investment strategy shall be in line with the asset allocation mentioned under “Section II (c): How will the Scheme allocate its assets” of the SID.</p> <p>Though every endeavor will be made to achieve the objective of the Scheme, the AMC/Sponsors/Trustee does not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.</p>
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment.</p> <p>The Scheme is subjected to risk factors associated with risks associated with Exchange traded Schemes, Equity Investments, Debt & Money Market Instruments, Derivatives, processing of transaction through Stock Exchange Mechanism.</p>
<p>Risk Control measures</p>	<p>The scheme aims to track the NIFTY NEXT 50 Index (before expenses) as closely as possible. The index is tracked on a regular basis and changes to the constituent’s or their weights, if any, are replicated in the underlying portfolio with the purpose of minimizing tracking error.</p> <p>ETF being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions. The fund manager would endeavor to keep cash levels at the minimal to control tracking error.</p>
<p>Plans and Options</p>	<p>The Scheme does not offer any Plans/Options for investment.</p> <p>The AMC and the Trustees reserve the right to introduce such other Plans/Options as they deem necessary or desirable from time to time, in accordance with the SEBI Regulations.</p>
