The aim of the Investment Manager will be to allocate the assets of the Scheme amongst various fixed income instruments (debt / money market) with the objective of optimizing returns. The actual percentage of investment in various fixed income instruments and the general maturity range for the portfolio will be determined from time to time basis the prevailing macro-economic environment (including interest rates and inflation), market conditions, general liquidity, and fund manager views.

## Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment.

The Scheme is subjected to risk factors associated with risks associated with Debt & Money Market Instruments, Risks Associated with Derivatives, Risks associated with segregated portfolio, Risk Associated with Securitized Debt, Risk Associated

# with structured obligations and credit enhancement, Risk Factors Associated with Investments in REITs and InvITS, Risk associated with Securities Lending, Risk associated with short selling, Risks Associated with Repo in Corporate Debt, Risks associated with investing in Tri-Party Repo through CCIL (TREPS).

## Risk Control measures

## **Concentration Risk**

The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.

## Liquidity Risk

The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.

**Credit Risk** - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.
