# How to read a Mutual Fund Factsheet?

### Know how your money is managed

The benefits of investing in mutual funds are well known. However, buying them on face value is not enough. Investors should know how their money is managed. They should research as much as possible on a scheme's strategy, performance, risks involved and how the money is invested. Many investors shy away from this exercise as they consider it cumbersome. To make life easy for investors, mutual funds disclose a fund factsheet which details the quintessential information required before investing.

The factsheet is a concise document with a plethora of information about how the fund is managed; it is disclosed on a monthly basis. This article tries to decode the factsheet and explains how investors should use it for making investment decisions.

# Five things to look out for in mutual fund factsheets

#### **Basic information**

The factsheet provides all the general information on the fund – its objective or philosophy, options (growth or dividend), plans (direct and regular), net asset value (NAV) of each plan, minimum investment amount, systematic features (SIP, SWP, STP) and assets under management (AUM) data.

It is important to know about the fund's exit load, as it gets deducted from total gains if the investor exits during a specific period after investment. It is a small penalty charged on prevailing NAV to discourage premature redemption. Different schemes have different exit loads, while few such as Overnight fund generally do not have exit load. Some funds have a fixed exit load and some have a tiered structure. For instance, a fund may have nil exit load if the investor withdraws up to 10% of units per year. For units more than 10%, it charges 3% for exit before 12 months, 2% for exit before 24 months, 1% for exit before 36 months and nil after that.

Investors should look out for the fund's product labeling and riskometer. Product labeling underlines product suitability for investors. It tells about ideal investment time frame required to benefit from the fund and where it invests. Riskometer is a presentation that helps investors measure the risk associated with the fund. It presents six levels of risks - low, Low to Moderate, moderate, moderately High, High and Very High. Since an equity fund typically has high risk involved, needle of the scale points towards moderately high /high, suggesting the fund is meant for investors with a high risk-taking appetite. Examples of equity and liquid funds are listed below:

### **Equity Fund**

#### **Product Labeling**

### This product is suitable for investors who are seeking:

- Growth of capital in the long term
- Investment predominantly in equity and equity-related instruments

# Riskometer Moderately High Risk RISKOMETER The risk of the benchmark is Moderately High

### **Debt Fund**

### **Product Labeling**

### This product is suitable for investors who are seeking:

- Optimal returns in the short term
- Investment in portfolio of short duration money market and debt instruments

The data used is for illustration purpose only.

# **Performance aspects**

Although the past performance does not guarantee future trend, investors can get a broad idea on how a fund may perform in future. This section looks at the fund's performance (lump sum as well as SIP) across time frames and compares it with the fund's benchmark and a

market benchmark. Many fund houses provide graphical representation of calendar year performance of funds along with standard SEBI prescribed performance tables.

The data used is for illustration purpose only.

The data used is for illustration purpose only.

### **Fund manager details**

In an investment voyage, mutual fund is the ship and fund manager is the sailor. Success of the voyage depends on the manager's expertise. Hence, it is imperative to know the fund manager well. The factsheet provides information on the manager's experience and qualification. You can find out their track record by reviewing the performance of all schemes managed by them.

### **Portfolio aspects**

#### Key portfolio attributes to look for in equity/ hybrid funds

#### **Asset allocation**

It highlights the exposure to different asset classes - equity, debt and cash - in a portfolio.

The data used is for illustration purpose only

# **Company and sector allocation**

It informs investors about a fund's concentration level in sectors and stocks. An aggressive fund manager may have high concentration among fewer companies and sectors, which may not be appropriate for investors seeking diversification. Investors should check whether the fund has taken higher-than-prudent exposure to risker sectors or low quality stocks.

Portfolio Top 10 holdings	% Allocation	Allocation - Top 10 Sectors
<b>Equity Shares</b>		Banks 26.51%
HDFC Bank Ltd	7.05%	
ICICI Bank Ltd	6.34%	Auto 7.62%

Total	100.00%	17.3070
		0% 10% 20% 30% 40%

The data used is for illustration purpose only.

### Key portfolio attributes to look for in debt funds

#### **Credit quality profile**

A debt fund's holdings are classified according to its credit ratings such as AAA, AA+, A1+ (given by credit rating agencies), etc.

Funds with higher exposure to AAA (top rated long-term debt) and A1+ (top rated short-term debt) have lower credit risk and higher credit quality.

Conservative investors should check whether the fund manager in order to boost performance is taking undue exposure to lower rated debt papers as they typically trade at higher yields but are exposed to high credit and liquidity risk vis-à-vis top rated papers.

The data used is for illustration purpose only.

### **Instrument break-up**

It highlights allocation to various debt instruments such as commercial papers (CPs), certificate of deposits (CDs), NCDs and bonds, gilts and cash equivalents.

Investors in shorter maturity debt funds such as liquid, ultra short term, short- term debt funds should check whether higher proportion has been allocated to shorter maturity instruments such as CPs and CDs. As long-term debt instruments such as gilts and bonds are typically more sensitive to interest rate changes compared with CPs and CDs, higher exposure to former instruments by liquid or ultra-short term may result in high risk.

The data used is for illustration purpose only.

This document has been compiled with using the various sections and sub-sections from Income Tax Act 1961 and amendments made to Finance Bill 2024. It would be prudent for investors to consult their tax advisors for further details, clarification and actions.

# Important Sections pertaining to Mutual Funds & Taxation of Mutual Funds which have undergone changes

Section	Impact
	Specified Mutual Fund – (new definition is effective 1st April, 2025)
	'(ii) "Specified Mutual Fund" means,— (a) a Mutual Fund by whatever name called, which invests more than sixty-five per cent. of its total proceeds in debt and money market instruments; or
50AA	(b) a fund which invests sixty-five per cent. or more of its total proceeds in units of a fund referred to in sub-clause (a):
	Earlier there was no specific definition for a debt mutual fund, it was always referred as other than Equity, now it's clearly defined under Specified Mutual Fund
111A	Short Term Capital Gains rate has been changed from 15% to 20% w.e.f July 23,2024
	Exemption limit for Long Term Capital Gains has increased from INR 100,000 to INR 125,000
112A	Long Term Capital Gains (LTCG) increased from 10% to 12.5%
	Securities Transaction Tax (STT) rates have been revised, come in force from 01 Oct 2024
Section 155	Options – 0.1% Futures – 0.02%
	Short Term Definition changed from 36 months to 24 months for all assets except
Section 2 (Clause 42A)	security listed in a recognized stock exchange in India or a unit of the Unit Trust of India established under the Unit Trust of India Act, 1963 (52 of 1963) or
(Clause 42A)	a unit of an equity-oriented fund or a zero coupon bond or in case of a share of a company (not being a share listed in a recognised stock exchange)

<sup>^</sup> STCG - Short Term Capital Gain | ^LTCG - Long Term Capital Gain | ^^ FOF - Fund Of Fund | ETF - Exchange Traded Fund

SGB buy back by RBI (redeemed to RBI)

Exemptions have been provided only in case of **individuals under section 47(viic)** of the Income Tax Act, 1961 wherein any gains arising on redemption/ maturity of SGBs is not regarded as "transfer" and hence no capital gains tax shall arise on transfer of such SGBs

As per section 2(42A) any listed security held for more than 12 months will qualify as a long-term asset. We agree the period of holding for SGBs listed on exchange should be 12 months. However, taxability will be as per section 112 and not 112A, i.e 20% with indexation and at 12.5% (without indexation) post Finance Bill 2024. SGBs taxability will not differ if the SGBs are bought from the stock market or from authorized banks / institutions.

Mutual fund investments are subject to market risks, read all scheme related documents carefully.

Please consult your financial advisor or mutual fund distributor before investing.

# **GLOSSARY**

#### Average Maturity:

Average Maturity of the securities in scheme.

#### Beta:

Beta of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

#### Indexation Benefit:

- | Long Term Capital Gains (holding period of over 3 years) from other than equity oriented and specified mutual funds are taxed at 20% plus applicable surcharge and cess with the benefit of indexation.
- | Government notifies Cost Inflation Index (CII) for each financial year taking into consideration the prevailing inflation levels.
- | The cost of acquistion for computation of tax is adjusted for inflation using CII, there by reducing the capital gains from tax perspective.

#### Macaulay Duration (Duration):

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

#### Modified Duration:

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

#### Portfolio Turnover Ratio:

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

#### Portfolio Yield (Annualized Portfolio YTM\*):

Weighted average yield of the securities in scheme portfolio. \*In case of semi annual YTM, it will be annualized.

### Risk Free Return:

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

#### Sharpe Ratio:

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

#### Specified Mutual Fund:

Specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

### Standard Deviation:

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

#### **■ Total Expense Ratio:**

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

#### **Entry Load:**

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101.

Note: SEBI has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

	Key Features	Mirae Asset Large Cap Fund	Mirae Asset Large & Midcap Fund* Formerly Known as Mirae Asset Emerging Bluechip Fund	Mirae Asset Great Consumer Fund

### Past Performance may or may not sustained in future..

For computation of since inception returns (%) the allotment NAV has been taken as ₹1000.00 for Mirae Asset Liquid Fund, Mirae Asset Low Duration, Fund Mirae Asset Overnight Fund & Mirae Asset Money Market Fund and ₹10.00 for all other Schemes. In case, the start / end date of the concerned period is a non-business date (NBD), the NAV of the previous date is considered for computation of returns.

Returns (%) for less than 1 year calculated on simple annualized basis. The calculations of returns shall assume reinvestment of all payouts at the then prevailing NAV. CAGR - Compounded Annualised Growth returns. NAV (per unit) is at the end of the period. \*\*Standard benchmark prescribed as per the applicable SEBI circular.

For Mirae Asset Low Duration Fund the returns are for Regular Savings Plan - Growth Option. Returns for others scheme are provided for Regular Plan Growth Option. Load is not considered for computation of return.

Mirae Asset CRISIL-IBX Financial Services 9-12 Months Debt Index Fund, Mirae Asset Income plus Arbitrage Active FoF, Mirae Asset Multi Factor Passive FOF and Mirae Asset Gold Silver Passive FoF are in existence for less than 6 Months, as per SEBI regulation performance of the schemes has not been shown.

Latest available NAV has been taken for return calculation wherever applicable.
