How to read a Mutual Fund Factsheet?

Know how your money is managed

The benefits of investing in mutual funds are well known. However, buying them on face value is not enough. Investors should know how their money is managed. They should research as much as possible on a scheme's strategy, performance, risks involved and how the money is invested. Many investors shy away from this exercise as they consider it cumbersome. To make life easy for investors, mutual funds disclose a fund factsheet which details the quintessential information required before investing.

The factsheet is a concise document with a plethora of information about how the fund is managed; it is disclosed on a monthly basis. This article tries to decode the factsheet and explains how investors should use it for making investment decisions.

Five things to look out for in mutual fund factsheets

Basic information

The factsheet provides all the general information on the fund – its objective or philosophy, options (growth or dividend), plans (direct and regular), net asset value (NAV) of each plan, minimum investment amount, systematic features (SIP, SWP, STP) and assets under management (AUM) data.

It is important to know about the fund's exit load, as it gets deducted from total gains if the investor exits during a specific period after investment. It is a small penalty charged on prevailing NAV to discourage premature redemption. Different schemes have different exit loads, while few such as Overnight fund generally do not have exit load. Some funds have a fixed exit load and some have a tiered structure. For instance, a fund may have nil exit load if the investor withdraws up to 10% of units per year. For units more than 10%, it charges 3% for exit before 12 months, 2% for exit before 24 months, 1% for exit before 36 months and nil after that.

Investors should look out for the fund's product labeling and riskometer. Product labeling underlines product suitability for investors. It tells about ideal investment time frame required to benefit from the fund and where it invests. Riskometer is a presentation that helps investors measure the risk associated with the fund. It presents six levels of risks - low, Low to Moderate, moderate, moderately High, High and Very High. Since an equity fund typically has high risk involved, needle of the scale points towards moderately high /high, suggesting the fund is meant for investors with a high risk-taking appetite. Examples of equity and liquid funds are listed below:

Equity Fund

Product Labeling

This product is suitable for investors who are seeking:

- Growth of capital in the long term
- Investment predominantly in equity and equity-related instruments

Debt Fund

Product Labeling

This product is suitable for investors who are seeking:

- Optimal returns in the short term
- Investment in portfolio of short duration money market and debt instruments

The data used is for illustration purpose only.

Performance aspects

Although the past performance does not guarantee future trend, investors can get a broad idea on how a fund may perform in future. This section looks at the fund's performance (lump sum as well as SIP) across time frames and compares it with the fund's benchmark and a

market benchmark. Many fund houses provide graphical representation of calendar year performance of funds along with standard SEBI prescribed performance tables.

The data used is for illustration purpose only.

Performance Report

Period	Returns (CAGR %)			Value of ₹10000 invested (in ₹)

Add. Benchmark Return (%) (BSE Sensex)	9.95%	9.31%	10.19%	7.02%	16.72%

The data used is for illustration purpose only.

Fund manager details

In an investment voyage, mutual fund is the ship and fund manager is the sailor. Success of the voyage depends on the manager's expertise. Hence, it is imperative to know the fund manager well.

The factsheet provides information on the manager's experience and qualification. You can find out their track record by reviewing the performance of all schemes managed by them.

Portfolio aspects

Key portfolio attributes to look for in equity/ hybrid funds

Asset allocation

It highlights the exposure to different asset classes - equity, debt and cash - in a portfolio.

The data used is for illustration purpose only

Company and sector allocation

It informs investors about a fund's concentration level in sectors and stocks. An aggressive fund manager may have high concentration among fewer companies and sectors, which may not be appropriate for investors seeking diversification. Investors should check whether the fund has taken higher-than-prudent exposure to riskier sectors or low quality stocks.

The data used is for illustration purpose only.

Key portfolio attributes to look for in debt funds

Credit quality profile

A debt fund's holdings are classified according to its credit ratings such as AAA, AA+, A1+ (given by credit rating agencies), etc.

Funds with higher exposure to AAA (top rated long-term debt) and A1+ (top rated short-term debt) have lower credit risk and higher credit quality.

Conservative investors should check whether the fund manager in order to boost performance is taking undue exposure to lower rated debt papers as they typically trade at higher yields but are exposed to high credit and liquidity risk vis-à-vis top rated papers.

The data used is for illustration purpose only.

Instrument break-up

It highlights allocation to various debt instruments such as commercial papers (CPs), certificate of deposits (CDs), NCDs and bonds, gilts and cash equivalents.

Investors in shorter maturity debt funds such as liquid, ultra short term, short-term debt funds should check whether higher proportion has been allocated to shorter maturity instruments such as CPs and CDs. As long-term debt instruments such as gilts and bonds are typically more sensitive to interest rate changes compared with CPs and CDs, higher exposure to former instruments by liquid or ultra-short term may result in high risk.

The data used is for illustration purpose only.

Important Sections pertaining to Mutual Funds & Taxation of Mutual Funds which have undergone changes

Section	Impact
50AA	Specified Mutual Fund - (new definition is effective 1st April, 2025) "(ii) "Specified Mutual Fund" means,-- (a) a Mutual Fund by whatever name called, which invests more than sixty-five per cent. of its total proceeds in debt and money market instruments; or (b) a fund which invests sixty-five per cent. or more of its total proceeds in units of a fund referred to in sub-clause (a): Earlier there was no specific definition for a debt mutual fund, it was always referred as other than Equity, now it's clearly defined under Specified Mutual Fund
111A	Short term capital gains (STCG) taxed at 20%
112A	Long term capital gains (LTCG) taxed at 12.5% above the exemption limit of IN 1,25,000/- per financial year
Section 155	Securities Transaction Tax (STT) rates have been revised, come in force from 01 Apr 2026 Options - 0.15% Futures - 0.05%
Section 2 (Clause 42A)	Short Term Definition changed from 36 months to 24 months for all assets except security listed in a recognized stock exchange in India or a unit of the Unit Trust of India established under the Unit Trust of India Act, 1963 (52 of 1963 or a unit of an equity-oriented fund or a zero coupon bond or in case of a share of a company (not being a share listed in a recognised stock exchange)

^ STCG - Short Term Capital Gain | ^LTCG - Long Term Capital Gain | ^^ FOF - Fund Of Fund | ETF - Exchange Traded Fund

SGB buy back by RBI (redeemed to RBI)

Exemptions have been provided only in case of individuals under section 47(viic) of the Income Tax Act, 1961 wherein any gains arising on redemption/ maturity of SGBs is not regarded as "transfer" and hence no capital gains tax shall arise on transfer of such SGBs

As per section 2(42A) any listed security held for more than 12 months will qualify as a long-term asset. We agree the period of holding for SGBs listed on exchange should be 12 months. However, taxability will be as per section 112 and not 112A, i.e 20% with indexation and at 12.5% (without indexation) post Finance Bill 2024. SGBs taxability will not differ if the SGBs are bought from the stock market or from authorized banks / institutions.

This document has been compiled with using the various sections and sub-sections from Income Tax Act 1961 and amendments made to Finance Bill 2026. It would be prudent for investors to consult their tax advisors for further details, clarification and actions.

Follow us on : 

GLOSSARY

■ Average Maturity:

Average Maturity of the securities in scheme.

■ Beta:

Beta of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

■ Indexation Benefit:

- | Long Term Capital Gains (holding period of over 3 years) from other than equity oriented and specified mutual funds are taxed at 20% plus applicable surcharge and cess with the benefit of indexation.
- | Government notifies Cost Inflation Index (CII) for each financial year taking into consideration the prevailing inflation levels.
- | The cost of acquisition for computation of tax is adjusted for inflation using CII, thereby reducing the capital gains from tax perspective.

■ Macaulay Duration (Duration):

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

■ Modified Duration:

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

■ Portfolio Turnover Ratio:

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

■ Portfolio Yield (Annualized Portfolio YTM*):

Weighted average yield of the securities in scheme portfolio. *In case of semi annual YTM, it will be annualized.

■ Risk Free Return:

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

■ Sharpe Ratio:

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

■ Specified Mutual Fund:

"Specified Mutual Fund(s)" means mutual fund scheme(s) in which investment in equity shares of domestic companies does not exceed thirty-five percent (35%) of the total assets of such scheme(s).

■ Standard Deviation:

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

■ Base Expense Ratio:

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

■ Entry Load:

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101.

Note: SEBI has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Past Performance is not an indicator or guarantee of future results.

For computation of since inception returns (%), the allotment NAV has been taken as ₹1000.00 for Mirae Asset Liquid Fund, Mirae Asset Overnight Fund, Mirae Asset Ultra Short to Short Term Fund, Mirae Asset Money Market Fund & Mirae Asset Ultra Short-Term Fund and ₹10.00 for all other Schemes. In case the start/end date of the concerned period is a non-business date (NBD), the NAV of the previous date is considered for computation of returns. Returns (%) for less than 1 year calculated on simple annualized basis, others are CAGR- Compounded Annualized Growth returns. The calculations of returns shall assume reinvestment of all payouts at the then prevailing NAV. NAV (per unit) is at the end of the period.

Inception date of Mirae Asset Ultra Short to Short Term Fund is March 05 2008; however, since inception returns are calculated from June 26, 2012, as there were no investors in the interim period in the institutional plan.

**Standard benchmark prescribed as per the applicable SEBI circular.

For Mirae Asset Ultra Short to Short Term Fund, the returns are for Regular Savings Plan - Growth Option. Returns for other schemes are provided for Regular Plan Growth Option. Load is not considered for computation of return.

Mirae Asset Nifty200 Momentum 30 Plus 8-13yr G-Sec 75:25 Index Fund and Mirae Asset Nifty200 Momentum 30 Plus 8-13 yr G-Sec 50:50 ETF, Mirae Asset BSE Information Technology Index Fund are in existence for less than 6 Months; as per SEBI regulation, performance of the schemes has not been shown.

Latest available NAV has been taken for return calculation wherever applicable.

Description/Inference of the Quantitative / Risk Measures

Sr. No.	Quantitative Measures/Risk Measures	Brief description/ Inference of the Quantitative measure
1	Standard Deviation	Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.
2	Beta	Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
3	Sharpe Ratio	The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
4	Information Ratio	The information ratio (IR) measures a mutual fund manager's ability to generate extra returns above a benchmark index while tracking the active risk taken.
5	Portfolio Turnover Ratio	The portfolio turnover ratio (PTR) measures how often a mutual fund or investment portfolio buys and sells its securities over a specific period, usually one year.
6	Average Maturity	Average maturity is the weighted average time it takes for all the bonds or debt securities in a portfolio to reach their final repayment dates.
7	Macaulay Duration	Macaulay Duration is a measure of the average time it takes to receive a bond's cash flows. It is calculated by summing up all the multiples of the present values of cash flows and corresponding time periods and then dividing the sum by the market bond price.
8	Modified Duration	Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.
9	Annualized Portfolio Yield:	An annualized portfolio yield measures the weighted average annual return of a group of investments over a year, accounting for compounding and irregular cash flows
10	Yield to Maturity	The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

Fund Manager Experiences

- **Mr. Neelesh Surana** has over 35 years of experience in Financial Services including Fund Management.
- **Mr. Gaurav Misra** has over 29 years of experience in Investment Management and Equity Research Functions.

1.40% on the next ₹ 1,250 crores of the daily net assets

1.25% on the next ₹ 3,000 crores of the daily net assets

1.15% on the next ₹ 5,000 crores of the daily net assets

Base expense ratio reduction of 0.05% for every increase of ₹ 5,000 crores of daily net assets or part there of, on the next ₹ 40,000 crores of the daily net assets

0.70% on the balance of the assets

Base Expense Ratio is Excluding Statutory levies as applicable if any, on the said expenses and transaction cost as specified under regulation.

For Debt Oriented Closed Ended schemes :

Current Monthly Average Expense Ratio for Growth Option (#)
(Effective Date 01st April, 2026)

Regular Plan: 0.80% of the daily net assets

For Direct Plans (Effective Date 01st April, 2026)##:

The above Monthly Average Expense Ratio will also be applicable for Direct Plans except that the Direct Plan shall have a lower Monthly Average Expense Ratio excluding distribution expenses, commission, etc. and no commission for distribution of Units will be paid / charged under Direct Plan.

(#) Any change in the Base Expense Ratio will be updated on AMC Website.

.@The Standard Deviation, Beta, R Squared, Sharpe Ratio & Information Ratio are calculated on returns from the last three years' monthly data points.

Risk-free rate: FBLIovernightMIBOR as on 30th September 2026

^Basis last rolling 12 months.

IDCW is gross IDCW. As per the Income Tax Act, 2025, for the financial year 2026-2027, IDCW from both equity and debt schemes is taxable in the hands of investors. For equity schemes, IDCW is subject to capital gains tax — Short-Term Capital Gains (STCG) at 20% for holdings up to 12 months, and Long-Term Capital Gains (LTCG) at 12.5% for holdings beyond 12 months, with exemption up to ₹1.25 lakh. For debt schemes acquired on or after 1 April 2023, all gains, including IDCW, are treated as short-term and taxed at the investor's applicable income tax slab rate, without indexation benefit.

Kindly refer to the offer documents for the detailed expense ratio for all the schemes: <https://www.miraeassetmf.co.in/downloads/forms>

In view of the individual nature of tax consequences, each investor is advised to consult his/her professional tax advisor.
