EQUITY UPDATE

- Nifty 50 (+2% MoM) gained back some ground in September 2023 as domestic buying continued, although FPI* selling ramped up. Non-institutional flows kept the index supported as Mid and small-caps were strong (mid-cap index +3.6%, small-cap index +4.5% in September 2023) despite the Small and Mid cap carnage mid-month.
- Sector-wise, PSU (+11%), power (+7%) and metals (+6%) gained the most. None of the sectors closed negative.
- Globally, India (2%) was among the top-performing markets, along with the UK and Philippines, which were up 2.9% and 2.4%, respectively. Rest of the global markets closed in the negative, with Thailand, Russia and S&P 500 declining 6%, 5% and 4.6%, respectively.

Global Macros

- Higher for longer:** Fed in its September 2023 meeting kept the rates unchanged on the expected lines while the selloff seen in US Treasury bonds is due to supply concerns or on "higher for longer" consensus estimate; will only be answered on a sudden weakening of US data. America's increasingly aggressive fiscal policy has been attracting growing attention of late. The fiscal deficit reached 8.6% of GDP in July 2023 on an annualised basis which is not so far off the levels reached in the aftermath of the global financial crisis. Market expectations are that central banks like Fed, European Central Bank and Bank of England are done with rate hikes but have kept the door open for further rate hikes.

- China's economy is slowing down:** China's economic growth is slowing down as policymakers try to fix a property market downturn. Moreover, demand for Chinese exports has been softening as key trading partners have been grappling with rising living costs. And with 70% of Chinese household wealth tied up in real estate, a big slowdown in the sector is trickling through to other parts of the economy.

- Bond yield:** The US 10-year bond yield increased to 4.57% as on September 29, 2023, from 4.11% on August 31, 2023.

- Crude:** Brent crude spot price increased to US\$96.3/bbl as on September 29, 2023 from US\$87.4/bbl as on August 31, 2023.

Domestic Macros

- Inclusion in Bond Index:** JP Morgan to include India in its emerging market debt index, which is benchmarked by US\$236 billion in global funds, paving the way for billions in inflows. India's weight is expected to reach the maximum weight threshold of 10% in the Government Bond Index-Emerging Markets (GBI-EM) Global Diversified. Inclusion will start on June 28, 2024, and extend over 10 months with 1% increments. Foreign investors have net purchased Indian bonds to the tune of \$3.4 billion so far in 2023. Foreign investors own less than 2% of outstanding Indian government debt. There are several benefits in the form of stability in debt flows, positive for bond yields, improvement in Balance of Payment & strong currency.

- GST Collection:** GST revenue collection in the month of August 2023 was at Rs 1.63 lakh crore, up by around 10.2% on an annual basis. With this, the monthly GST revenues has remained over Rs 1.4 lakh crore for 19 months in a row.

- Credit Growth:** As per latest RBI data, system credit growth stood at 19.8% YoY (15.1% YoY excluding the impact of the HDFC-HDFC Bank merger) for the fortnight ended September 8, 2023.

- Inflation:** August 2023 Consumer Price Index inflation dropped to 6.83% (July 2023: 7.44%) - in line with expectations - led mainly by falling vegetable prices. Sequentially, headline CPI inflation contracted by 0.1% (July 2023: +2.9% mom). August 2023 Wholesale Price Index inflation increased by (-)0.5% from (-)1.4% in July 2023 led by led by primary articles and fuel and power inflation.

- Currency:** USD-INR has depreciated to Rs83.04/US\$ (as on September 29, 2023) from Rs82.79/US\$ (as on August 31, 2023) amid a sharp rise in US Dollar strength and likely RBI intervention in the forex space through US Dollar sales to stem a rapid depreciation of the INR. On an average, the INR has depreciated by 0.3% against the US\$ in September 2023.

- Monsoon:** After a very dry August, September 2023 rains ended 13% above normal, shrinking the cumulative season deficit to 6%. That said, special disparities still exist, with the East 18% below normal and the Southern Peninsula 8% below normal. Reservoir levels are 8% below average and 19% below last year, but primary because of pressures in the South.

Regulatory, policy and market developments

- Equity trading trends:** FPIs sold US\$1.9 billion (until September 27) of Indian equities in the secondary market, whereas DIIs bought US\$2.1 billion (until September 28). After 6 months of inflows September 2023 was the first month of FPI outflows. CY2023 cumulative FPI inflows stood at \$15.3 billion vs \$17 billion outflow in 2022.

Outlook

- Seasonally strong period ahead: Indian economy, typically fairs better in 2H of the financial year, given the multiple festive occasions. This year too, the seasonality should play out, in our view. Further, given the general elections next year, it will be busy on the newsflow front. As an investor, we continue to focus on the datapoints, which for now appears to be strong.

Macros remain strong

- Inflation cooled slightly in Aug'23 by -61 bps MoM to 6.83%, as veggie inflation cools in August'23
- Bank credit growth slightly up and healthy at 15.1%YoY as of 8th Sep'23.
- Power consumption grew 14% YoY, +6% MoM and at 14- month high.
- Railway freight traffic growth at 6% YoY was higher by 4% MoM and at a 11-month high. Diesel consumption growth at 5% YoY was +1% MoM.
- Domestic / International air traffic stayed strong at 22% YoY

Construction cycle strong

- Steel consumption (+17%) & cement production (Aug'23, +19%) remains strong, indicating good construction activity.
- Primary property sales continued ~20% by volume growth in July'23. Housing stats have kept climbing & are nearing historical highs.

Rural soft

- Deficient monsoon rains are a concern for agriculture. Tractor sales were -11% YoY. Monsoon rainfall is -6% vs. normal, with 100% season by rainfall quantum done. Rainfall distribution is somewhat weak with 26% of the country seeing deficient rains. Summer crop sown is flat YoY. Water storage levels are 12% below normal, a potential negative for upcoming winter crop.

- Key things to watch out are:** (a) Oil price trend, (b) rate trajectory by the central banks, (c) Russia-Ukraine war and its impact on global supply chain and (d) Newsflow on Indian elections.

- Indian economy well placed versus other large economies:** In the backdrop of slowing global growth, India will stand out in the near term, given seasonally strong period as well as relatively better growth. While, focus will shift to busy election calendar (state and general next year), underlying economic fundamentals appear strong supported by a) Cyclical upturn in many sectors (Real estate, Auto, Banking, Telecom etc), b) Manufacturing tailwinds led by China+1 & PLI, c) Capex recovery (India Inc. Balance Sheets have strengthened) and d) Consolidation (formalization). Over the medium term, we continue to remain constructive on equities and believe India is on the cusp of achieving robust growth over the next few years.

- Valuation and view:** Mid/Small cap indices have outperformed the Nifty 50 Index by 20% CYTD and could be due to strong flows in funds focused on mid/small caps (at a cyclical high). On the other hand, large cap stocks have seen outflows (flows are at a cyclical low). As a result, Mid/Small cap stocks are trading at a significant premium to Large Cap. Nifty 50 is trading at reasonable valuation of ~19x on FY25 earnings with attractive earnings growth outlook. In this context, currently large cap focused funds appear well placed.

DEBT UPDATE

Executive Summary

“Higher for longer” rates remain central theme as central banks battle to control inflation. Higher interest rates are likely to cause additional volatility.

India continues to show resilience against the backdrop of a challenging global environment. This resilience is underpinned by robust domestic demand, strong public infrastructure investment and a strengthening financial sector.

Global Macros

The underlying growth outlook remains broadly mixed. With most central bank’s hawkish stance and interest rates maintained at multi-year high, directly impacting both short-term and long-term bond yields. This decision sets the tone for the entire yield curve and plays a crucial role in shaping the financial landscape. Bond markets globally have come around to the view that central banks will not quickly ease policy in a world shaped by persistent inflationary pressures driven by supply constraints.

US Q2 CY23 GDP growth was revised lower to 2.1% q-o-q annualised from initial estimate of 2.4%, though still marking a slight increase from the previous quarter. Headline CPI inched up to 3.7% on the back of rising energy prices. Core inflation eased to 4.3% y-o-y, the smallest gain since September 2021. US core PCE inflation came in at 3.9% y-o-y close to expectations, but still showed an impressive deceleration. US Treasury yields surged to 16-year high in Sept-23 post US Fed interest rate decision. The markets continue to adjust to the new higher for longer regime and its implications – especially higher macro volatility.

European Central Bank (ECB) lowered its GDP growth forecast for 2023 citing the impact of tightening interest rates on domestic demand and weakening international trade environment. Inflation forecasts were revised upwards while growth prospects remaining bleak, in this backdrop the ECB is likely to hit the brakes on its current rate hike cycle.

Japan’s Q2 CY23 GDP growth was revised lower to 4.8% from preliminary estimate of 6% (YoY), on the back of a fall in capital expenditure. Inflation stayed above Bank of Japan’s target of 2% for the past 16 months, amidst healthy wage growth, fuelling bets of an exit from its loose monetary policy. 10-year Japanese Government Bond (JGB) yield moved higher, testing BOJ’s new upper ceiling of its yield curve control (YCC) framework.

While last year Russia-Ukraine war sent shockwaves through the globe, currently China conundrum seems to have jumped on the bandwagon. The world’s second-largest economy, home to more than 1.4 billion people, is facing a host of problems – including slow growth, high youth unemployment and a property market in disarray. The growth prospects are no more optimistic for the country as anticipated at the start of 2023. In the first half of the year, Chinese economy grew at 5.5%, well below its historical rate of growth. To up the momentum the government is handing out stimulus to industry and at the same time Peoples Bank of China (PBOC) is decreasing interest rates. It is often said when China sneezes, the world catches a cold. A prolonged slowdown in the country may impact global growth.

Crude oil prices continued their upward trajectory. This surge was driven by production cuts and export bans imposed by various OPEC+ nations, which exerted upward pressure on oil prices. The extension of these restrictions suggests that crude oil prices are unlikely to witness any significant relief soon.

Domestic Macros

Inclusion of Indian government bonds in the JP Morgan Bond Index was a momentous one as it could pave the way for an inflow of \$25-30 billion in Government of India Securities (G-secs).

In terms of inflation, easing in food prices supported the moderation in retail inflation in Aug-23. Food inflation moderated to 9.2% in Aug-23 from 10.6% in July-23 mainly due to softening of vegetable inflation. The CPI print stood at 6.83% YoY, lower than July-23. More importantly, core inflation continued on a downward trajectory easing at 4.8% YoY gave further comfort to the market, the lowest level seen in the last 39 months. However, inflation continued to remain elevated in categories such as cereals and pulses despite the government's efforts to contain the price pressures.

In Sept-23, foreign institutional investors (FIIs) engaged in net selling activities, withdrawing a total of USD 800.2 million. They divested USD 684.6 million in the equity segment from the Indian capital market. They removed USD 142.2 million from the debt market. Foreign investors' activities in the Indian market are closely tied to the yield environment. Their exit from equities and reallocation of funds impact short-term and long-term yields and overall market dynamics.

Debt Outlook

The overall liquidity situation has consistently remained in a deficit. This deficit can be attributed to a combination of factors. The Reserve Bank of India (RBI) has been conducting variable rate reverse repo auctions, essentially to absorb liquidity from the banking system. Also, RBI's likely involvement in selling dollars to counteract the weakening of the Indian Rupee has also played a role in tightening the liquidity situation. While the current liquidity shortage is a short-term issue, there is an expectation that the situation could improve.

The surge in US treasury bond yields, especially in short-term and two-year bonds, directly affects global bond markets, including India. It impacts the relative attractiveness of Indian bonds and impacts short and long-term yields.

How to read a Mutual Fund Factsheet?

Know how your money is managed

The benefits of investing in mutual funds are well known. However, buying them on face value is not enough. Investors should know how their money is managed. They should research as much as possible on a scheme's strategy, performance, risks involved and how the money is invested. Many investors shy away from this exercise as they consider it cumbersome. To make life easy for investors, mutual funds disclose a fund factsheet which details the quintessential information required before investing.

The factsheet is a concise document with a plethora of information about how the fund is managed; it is disclosed on a monthly basis. This article tries to decode the factsheet and explains how investors should use it for making investment decisions.

Five things to look out for in mutual fund factsheets

Basic information

The factsheet provides all the general information on the funds its objective or philosophy, options (growth or dividend), plans (direct and regular), net asset value (NAV) of each plan, minimum investment amount, systematic features (SIP, SWP, STP) and assets under management (AUM) data.

It is important to know about the fund's exit load, as it gets deducted from total gains if the investor exits during a specific period after investment. It is a small penalty charged on prevailing NAV to discourage premature redemption. Different schemes have different exit loads, while few such as Overnight funds generally do not have exit load. Some funds have a fixed exit load and some have a tiered structure. For instance, a fund may have nil exit load if the investor withdraws up to 10% of units per year. For units more than 10%, it charges 3% for exit before 12 months, 2% for exit before 24 months, 1% for exit before 36 months and nil after that.

Investors should look out for the fund's product labeling and riskometer. Product labeling underlines product suitability for investors. It tells about ideal investment time frame required to benefit from the fund and where it invests. Riskometer is a presentation that helps investors measure the risk associated with the fund. It presents six levels of risks - low, Low to Moderate, moderate, moderately High, High and Very High. Since an equity fund typically has high risk involved, needle of the scale points towards moderately high /high, suggesting the fund is meant for investors with a high risk-taking appetite. Examples of equity and liquid funds are listed below:

Equity Fund

Product Labeling

This product is suitable for investors who are seeking:

- Growth of capital in the long term
- Investment predominantly in equity and equity-related instruments

Riskometer

The Benchmark is at Moderately High Risk

Debt Fund

Product Labeling

This product is suitable for investors who are seeking:

- Optimal returns in the short term
- Investment in portfolio of short duration money market and debt instruments

Performance aspects

Although the past performance does not guarantee future trend, investors can get a broad idea on how a fund may perform in future. This section looks at the fund's performance (lump sum as well as SIP) across time frames and compares it with the fund's benchmark and a

market benchmark. Many fund houses provide graphical representation of calendar year performance of funds along with standard SEBI prescribed performance tables.

Fund manager details

In an investment voyage, mutual fund is the ship and fund manager is the sailor. Success of the voyage depends on the manager's expertise. Hence, it is imperative to know the fund manager well.

The factsheet provides information on the manager's experience and qualification. You can find out their track record by reviewing the performance of all schemes managed by them.

Portfolio aspects

Key portfolio attributes to look for in equity/ hybrid funds

Asset allocation

It highlights the exposure to different asset classes - equity, debt and cash - in a portfolio.

The data used is for illustration purpose only.

Company and sector allocation

It informs investors about a fund's concentration level in sectors and stocks. An aggressive fund manager may have high concentration among fewer companies and sectors, which may not be appropriate for investors seeking diversification. Investors should check whether the fund has taken higher-than-prudent exposure to riskier sectors or low quality stocks.

Allocation - Top 10 Sectors

Key portfolio attributes to look for in debt funds

Credit quality profile

A debt fund's holdings are classified according to its credit ratings such as AAA, AA+, A1+ (given by credit rating agencies), etc.

Funds with higher exposure to AAA (top rated long-term debt) and A1+ (top rated short-term debt) have lower credit risk and higher credit quality.

Conservative investors should check whether the fund manager in order to boost performance is taking undue exposure to lower rated debt papers as they typically trade at higher yields but are exposed to high credit and liquidity risk vis-à-vis top rated papers.

The data used is for illustration purpose only.

Instrument break-up

It highlights allocation to various debt instruments such as commercial papers (CPs), certificate of deposits (CDs), NCDs and bonds, gilts and cash equivalents.

Investors in shorter maturity debt funds such as liquid, ultra short term, short-term debt funds should check whether higher proportion has been allocated to shorter maturity instruments such as CPs and CDs. As long-term debt instruments such as gilts and bonds are typically more sensitive to interest rate changes compared with CPs and CDs, higher exposure to former instruments by liquid or ultra-short term may result in high risk.

The data used is for illustration purpose only.

Tax Reckoner

Snapshot of Income Tax rates specific to Mutual Funds

The Income Tax rates are applicable to financial year 2023-24 as per Finance Act, 2023
Income-tax implications on income with respect to units of Mutual Fund

Type of Investor	Resident***	NRI
Withholding tax rate	10%*	20%** or rate as per applicable tax treaty*** (whichever is lower)

* Tax not deductible if income in respect of units of a mutual fund is below Rs. 5,000 in a financial year.

** The base tax is to be further increased by surcharge at the rate of:

- 37% on base tax where income or aggregate of such income exceeds Rs. 5 crore;
- 25% where specified income exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where income or aggregate of such income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

In case investor is opting for 'New Regime' as mentioned on page 2, the rate of surcharge not to exceed 25%.

Further, "Health and Education Cess" is to be levied at 4% on aggregate of base tax and surcharge.

*** The income distributed by mutual fund to unitholders is unlikely to fall within the definition of dividend under the tax treaty. Given this and the language of the newly inserted provision to section 196A, claiming tax treaty benefit in respect of income distributed by mutual fund to unitholders for withholding tax purpose may not be possible.

**** As per section 139AA of the Income tax Act, 1961 ("the Act") read with rule 114AAA of the Income-tax Rules, 1962, in the case of a resident person, whose PAN has become inoperative due to PAN -Aadhaar not being linked on or before 30 June 2023, it shall be deemed that he has not furnished the PAN and tax could be withheld at a higher rate of 20% as per section 206AA of the Act. For linking PAN with Aadhaar after 30 June 2022, fees of Rs 1,000 thereafter has been prescribed.

Other than equity oriented schemes (except specified mutual fund schemes)		30% [^]	10%*** (for unlisted) & 20% [§] (for listed)
Specified mutual fund schemes - Note 1		30% [^]	Not applicable

Note 1 - Capital gains from transfer of units of "specified mutual fund schemes" acquired on or after 1st April 2023 are treated as short term capital gains taxable at applicable slab rates as provided above irrespective of the period of holding of such mutual fund unit. For this purpose, "specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

Note 2 - For "Fund of Fund investing in Domestic Equity ETFs", following provisions of Income Tax Act 1961, may be applicable on this scheme. As per the Section 112A of the Act, this scheme (which invest at least 90% in domestic equity ETF, where such ETF invest at least 90% in domestic equity shares) falls under the category of "equity oriented fund", however, as per the newly introduced Section 50AA by Finance Act, 2023, any "specified mutual fund", by whatever name called, where not more than 35 percent of its total proceeds is invested in the equity shares of domestic companies, any gains on transfer / redemption of units if such specified mutual funds acquired on or after 1 April 2023 shall be deemed to be short-term capital gains. A view may be adopted that sale of this scheme may be classified as "specified mutual fund" under the Act and should be taxable at the rate of 15% (plus applicable surcharge and cess). For further details, clarification and action, please consult your tax advisor.

* Income-tax at the rate of 10% (without indexation benefit and foreign exchange fluctuation) to be levied on long-term capital gains exceeding Rs. 1 lakh provided transfer of such units is subject to Securities Transaction Tax (STT).

§ Surcharge to be levied at:

- 37% on base tax where specified income*** exceeds Rs. 5 crore;
- 25% where specified income** exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

In case total income includes income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes, the rate of surcharge on the said type of income not to exceed 15%. In case investor is opting for 'New Regime' as mentioned on page 3, the rate of surcharge not to exceed 25%.

*** Specified income - Total income excluding income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes. Further, Health and Education Cess to be levied at the rate of 4% on aggregate of base tax and surcharge.

@ Surcharge at 7% on base tax is applicable where total income of domestic corporate unit holders exceeds Rs 1 crore but does not exceed 10 crores and at 12% where total income exceeds 10 crores. However, surcharge at flat rate of 10 percent to be levied on base tax for the companies opting for lower rate of tax of 22%/15%. Further, "Health and Education Cess" to be levied at the rate of 4% on aggregate of base tax and surcharge.

Short term/ long term capital gain tax (along with applicable Surcharge and Health and Education Cess) will be deducted at the time of redemption of units in case of NRI investors. Tax treaty benefit can be claimed for withholding tax on capitals gains subject to fulfillment of stipulated conditions.

& After providing indexation.

*** Without indexation.

^ Assuming the investor falls into highest tax bracket.

^^ If total turnover or gross receipts in the financial year 2021-22 does not exceed Rs. 400 crores.

^^^ This lower rate is optional and subject to fulfillment of certain conditions as provided in section 115BAA.

^^^^ This lower rate is optional for companies engaged in manufacturing business (set-up & registered on or after 1 October 2019) subject to fulfillment of certain conditions as provided in section 115BAB.

- Further, the domestic companies are subject to minimum alternate tax (except for those who opt for lower rate of tax of 22%/15%) not specified in above tax rates.
- Transfer of units upon consolidation of mutual fund schemes of two or more schemes of equity oriented fund or two or more schemes of a fund other than equity oriented fund in accordance with SEBI (Mutual Funds) Regulations, 1996 is exempt from capital gains.
- Transfer of units upon consolidation of plans within mutual fund schemes in accordance with SEBI (Mutual Funds) Regulations, 1996 is exempt from capital gains.
- Relaxation to non-residents from deduction of tax at higher rate (except income distributed by mutual fund) in the absence of PAN subject to them providing specified information and documents.
- Tax to be deducted at twice the applicable rate in case of payments to specified person (except non-resident not having permanent establishment in India or person who is not required to furnish the return of income as notified by the Central Government) who has not furnished the return of income for the assessment year relevant to previous year immediately preceding the financial year in which tax is required to be deducted:
 - For which time limit for filing return has expired; and
 - The aggregate of tax deducted at source in his case is Rs. 50,000 or more in the said previous year.
- Additionally, if provisions of section 206AA are also applicable then tax to be deducted at higher of the two rates provided i.e. rate as per section 206AB or section 206AA.

Bonus Stripping: The loss due to sale of original units in the schemes, where bonus units are issued, will not be available for set off; if original units are: (A) bought within three months prior to the record date fixed for allotment of bonus units; and (B) sold within nine months after the record date fixed for allotment of bonus units. However, the amount of loss so ignored shall be deemed to be the cost of purchase or acquisition of such unsold bonus units.

■ Average Maturity:

Average Maturity of the securities in scheme.

■ Beta:

Beta of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

■ Indexation Benefit:

- Long Term Capital Gains (holding period of over 3 years) from other than equity oriented and specified mutual funds are taxed at 20% plus applicable surcharge and cess with the benefit of indexation.
- Government notifies Cost Inflation Index (CII) for each financial year taking into consideration the prevailing inflation levels.
- The cost of acquisition for computation of tax is adjusted for inflation using CII, thereby reducing the capital gains from tax perspective.

■ Macaulay Duration (Duration):

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

■ Modified Duration:

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

■ Portfolio Turnover Ratio:

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

■ Portfolio Yield (Annualized Portfolio YTM*):

Weighted average yield of the securities in scheme portfolio. *In case of semi annual YTM, it will be annualized.

■ Risk Free Return:

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

■ Sharpe Ratio:

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

■ Specified Mutual Fund:

Specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

■ Standard Deviation:

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

■ Total Expense Ratio:

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

■ Tracking Error:

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

\$ For computation of since inception returns (%) the allotment NAV has been taken as ₹1000.00 for MACMF, MASF MAOF, & MAMMF and ₹10.00 for all other Schemes. In case, the start / end date of the concerned period is a non-business date (NBD), the NAV of the previous date is considered for computation of returns.

Returns (%) for less than 1 year calculated on simple annualized basis. The calculations of returns shall assume reinvestment of all payouts at the then prevailing NAV.

CAGR - Compounded Annualised Growth returns. NAV (per unit) is at the end of the period.

**Standard benchmark prescribed as per the applicable SEBI circular.

For MASF the returns are for Regular Savings Plan - Growth Option. Returns for others scheme are provided for Regular Plan Growth Option. Load is not considered for computation of return.

Mirae Asset Silver ETF, Mirae Asset Nifty Bank ETF, Mirae Asset Nifty 1D Rate Liquid ETF and Mirae Asset Multicap Fund are in existence for less than 6 Month, as per SEBI regulation performance of the schemes has not been shown.
