# How to read a Mutual Fund Factsheet?

## Know how your money is managed

The benefits of investing in mutual funds are well known. However, buying them on face value is not enough. Investors should know how their money is managed. They should research as much as possible on a scheme's strategy, performance, risks involved and how the money is invested. Many investors shy away from this exercise as they consider it cumbersome. To make life easy for investors, mutual funds disclose a fund factsheet which details the quintessential information required before investing.

The factsheet is a concise document with a plethora of information about how the fund is managed; it is disclosed on a monthly basis. This article tries to decode the factsheet and explains how investors should use it for making investment decisions.

### Five things to look out for in mutual fund factsheets

## Basic information

The factsheet provides all the general information on the fund – its objective or philosophy, options (growth or dividend), plans (direct and regular), net asset value (NAV) of each plan, minimum investment amount, systematic features (SIP, SWP, STP) and assets under management (AUM) data.

It is important to know about the fund's exit load, as it gets deducted from total gains if the investor exits during a specific period after investment. It is a small penalty charged on prevailing NAV to discourage premature redemption. Different schemes have different exit loads, while few such as Overnight fund generally do not have exit load. Some funds have a fixed exit load and some have a tiered structure. For instance, a fund may have nil exit load if the investor withdraws up to 10% of units per year. For units more than 10%, it charges 3% for exit before 12 months, 2% for exit before 24 months, 1% for exit before 36 months and nil after that.

Investors should look out for the fund's product labeling and riskometer. Product labeling underlines product suitability for investors. It tells about ideal investment time frame required to benefit from the fund and where it invests. Riskometer is a presentation that helps investors measure the risk associated with the fund. It presents six levels of risks - low, Low to Moderate, moderate, moderately High, High and Very High. Since an equity fund typically has high risk involved, needle of the scale points towards moderately high /high, suggesting the fund is meant for investors with a high risk-taking appetite. Examples of equity and liquid funds are listed below:

## Equity Fund

### Product Labeling

**This product is suitable for investors who are seeking:**

- Growth of capital in the long term
- Investment predominantly in equity and equity-related instruments

## Debt Fund

### Product Labeling

**This product is suitable for investors who are seeking:**

- Optimal returns in the short term
- Investment in portfolio of short duration money market and debt instruments

The data used is for illustration purpose only.

## Performance aspects

Although the past performance does not guarantee future trend, investors can get a broad idea on how a fund may perform in future. This section looks at the fund's performance (lump sum as well as SIP) across time frames and compares it with the fund's benchmark and a

market benchmark. Many fund houses provide graphical representation of calendar year performance of funds along with standard SEBI prescribed performance tables.

The data used is for illustration purpose only.

## Performance Report

Period	Returns (CAGR %)			Value of ₹10000 invested (in ₹)		
	Fund A Return	Scheme benchmark*	Additional benchmark**	Fund A Return	Scheme benchmark*	Additional benchmark**
Last 1 year	28.32	22.47	16.88	-	-	-
Last 3 year	21.81	14.17	9.77	-	-	-
Last 5 year	19.76	13.08	11.21	-	-	-
Since Inception	16.63	8.61	7.59	39,891	21,025	19,305
NAV as on 31st March 2020	39.891					
Index Value (31st March 2020)	Index Value of Nifty 100 TRI is 3991.85 and Index value of BSE Sensex is 29620.50					
Date of allotment	4th April, 2008					
Scheme Benchmark	Nifty 100 TRI					
Additional Benchmark	**BSE Sensex					

The data used is for illustration purpose only.

## SIP Performance

SIP Investment	Since Inception	7 Years	5 Years	3 Years	1 Year
Total Amount Invested (In ₹)	1,070,000	840,000	600,000	360,000	120,000
Mkt Value as of 31st March 2020 (In ₹)	2,613,431	1,603,717	997,343	458,533	136,171
Fund Return (%)	19.26%	18.15%	20.45%	16.38%	26.03%
Benchmark Return (%) (Nifty 100 TRI)	11.87%	11.57%	13.45%	10.96%	21.24%
Add. Benchmark Return (%) (BSE Sensex)	9.95%	9.31%	10.19%	7.02%	16.72%

The data used is for illustration purpose only.

## Fund manager details

In an investment voyage, mutual fund is the ship and fund manager is the sailor. Success of the voyage depends on the manager's expertise. Hence, it is imperative to know the fund manager well.

The factsheet provides information on the manager's experience and qualification. You can find out their track record by reviewing the performance of all schemes managed by them.

## Portfolio aspects

### Key portfolio attributes to look for in equity/ hybrid funds

#### Asset allocation

It highlights the exposure to different asset classes - equity, debt and cash - in a portfolio.

The data used is for illustration purpose only

#### Company and sector allocation

It informs investors about a fund's concentration level in sectors and stocks. An aggressive fund manager may have high concentration among fewer companies and sectors, which may not be appropriate for investors seeking diversification. Investors should check whether the fund has taken higher-than-prudent exposure to riskier sectors or low quality stocks.

The data used is for illustration purpose only.

### Key portfolio attributes to look for in debt funds

#### Credit quality profile

A debt fund's holdings are classified according to its credit ratings such as AAA, AA+, A1+ (given by credit rating agencies), etc.

Funds with higher exposure to AAA (top rated long-term debt) and A1+ (top rated short-term debt) have lower credit risk and higher credit quality.

Conservative investors should check whether the fund manager in order to boost performance is taking undue exposure to lower rated debt papers as they typically trade at higher yields but are exposed to high credit and liquidity risk vis-à-vis top rated papers.

The data used is for illustration purpose only.

#### Instrument break-up

It highlights allocation to various debt instruments such as commercial papers (CPs), certificate of deposits (CDs), NCDs and bonds, gilts and cash equivalents.

Investors in shorter maturity debt funds such as liquid, ultra short term, short-term debt funds should check whether higher proportion has been allocated to shorter maturity instruments such as CPs and CDs. As long-term debt instruments such as gilts and bonds are typically more sensitive to interest rate changes compared with CPs and CDs, higher exposure to former instruments by liquid or ultra-short term may result in high risk.

The data used is for illustration purpose only.

# Passive Products of Mirae Asset

AUM by Product Category

Our Domestic Fund of Funds invest in underlying ETFs managed by Mirae Asset.

Growth Trends of ETF AUM

## Mirae Asset ETF advantages on exchange

**Exclusive Market Maker**  
Mirae Asset Capital Market, a sister concern, is an exclusive market maker (APs) in our ETFs on exchange at all times

**Low spread on exchange**  
Lower effective spread of around 3 bps after considering STT, brokerage etc. (iNAV +/- 16 bps)

**Continuous Liquidity**  
Market makers provide liquidity on exchange at all times around latest NAV (iNAV), irrespective of market volatility

**Relatively Low cost**  
to trade in Mirae Asset ETFs due to lower spread and lower impact cost even for large orders.

## Spotlight: Funds of the month

### Mirae Asset Nifty India New Age Consumption ETF & Fund of Fund

- Tax cut from Budget 2025 is expected to act as a catalyst for increase in consumer spending. We expect incremental share of discretionary spending to rise further over the long term in India.
- Recent market correction has started to provide a reasonable entry point as long-term outlook for discretionary consumption in India continues to remain constructive.
- Mirae Asset Nifty India New Age Consumption ETF and Fund of Fund is designed to represent industries/sector that are potentially aligned with the rise of spending on discretionary items, focusing on Consumer durables, Auto, E-commerce, Fintech, Tours and Travels, Real estate, AMC & Wealth management etc.
- Investor may invest in a staggered manner from a long term point of view.

### Mirae Asset Nifty500 Multicap 50:25:25 ETF

- Balanced portfolio with reasonable participation in large caps (50%) along with Midcaps and Small caps (25% each), in the current market scenario seems ideal for core allocation and is provided by Nifty500 Multicap 50:25:25 Index.
- Instead of picking a certain market cap segment, investor may ideally prefer a product which participates in multiple segment of the market, so that he or she is taking advantage of the market correction and avoiding the hassle of picking one over the other.
- In current times, Mirae Asset Nifty500 Multicap 50:25:25 ETF which aims to provide broad exposure with reasonable exposure to different market cap segments, may be a simple yet powerful investment option.

### Mirae Asset Nifty Smallcap 250 Momentum Quality 100 ETF & Fund of Fund

- The Nifty Smallcap 250 Momentum Quality 100 Index aims to track the performance of 100 small cap stocks which are selected based on the combination of momentum and quality factors from Nifty Smallcap 250 Index.
- Average 5 Yr. rolling return for Nifty Smallcap 250 Momentum Quality100 Index stands at 20.8% vis-à-vis 13.3% of Nifty Smallcap 250 Index.
- The parent Nifty Smallcap 250 Index touched its all-time high of 18,623 on 23rd Sep 2024. Since then, due to market correction, the index fell to 13,756 on 03rd March 2025. As on 30th April 2025, the index has recovered ~12% from its low, but continues to be ~ 18% down from its all-time high. While valuations remain elevated, they have come down due to correction. This provides potential opportunity to participate in this fund, via staggered or SIP route, with an ideal investment horizon of 5+ yrs.

SIP - Systematic Investment Plan | AMC - Asset Management Company

## How to Trade in ETF ?

\* Market Makers are assigned by the AMC to provide continuous liquidity on the exchange around real time NAV (INAV). They provide both buy and sell quotes.

\*Creation unit (basket) is the minimum portfolio size which the ETF deploy in the stocks of underlying index to create a replicable portfolio.

As per SEBI Regulation, from 1st July 2022 onwards, minimum purchase order for the transaction through AMC need to be greater than Rs. 25Cr. This limit doesn't apply to Employee Provident Fund Organisation, Recognized Provident Funds, Approved Gratuity Funds and Approved Superannuation Funds under Income Tax Act, 1961

## How to Trade in ETF ?

\* Market Makers are assigned by the AMC to provide continuous liquidity on the exchange around real time NAV (INAV). They provide both buy and sell quotes.

\*Creation unit (basket) is the minimum portfolio size which the ETF deploy in the stocks of underlying index to create a replicable portfolio.

As per SEBI Regulation, from 1st July 2022 onwards, minimum purchase order for the transaction through AMC need to be greater than Rs. 25Cr. This limit doesn't apply to Employee Provident Fund Organisation, Recognized Provident Funds, Approved Gratuity Funds and Approved Superannuation Funds under Income Tax Act, 1961

Source: Nifty Indices & Bloomberg data as on 30 April, 2025. Past performance may or may not sustain in future. The index return is in Total Return Variant. The data shown above pertains to the Index and does not in manner indicate performance of any scheme of the Fund. Exchange rate of FBIL are used for conversion of index value from USD/HKD to INR for international indices. If INR appreciates against the currency in which investments are made then the value of foreign asset declines as a result of which the fund investing in such foreign asset will also bear the impact of it.

# GLOSSARY

---

## ■ Average Maturity:

Average Maturity of the securities in scheme.

## ■ Beta:

Beta of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

## ■ Indexation Benefit:

- | Long Term Capital Gains (holding period of over 3 years) from other than equity oriented and specified mutual funds are taxed at 20% plus applicable surcharge and cess with the benefit of indexation.
- | Government notifies Cost Inflation Index (CII) for each financial year taking into consideration the prevailing inflation levels.
- | The cost of acquisition for computation of tax is adjusted for inflation using CII, there by reducing the capital gains from tax perspective.

## ■ Macaulay Duration (Duration):

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

## ■ Modified Duration:

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

## ■ Portfolio Turnover Ratio:

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

## ■ Portfolio Yield (Annualized Portfolio YTM\*):

Weighted average yield of the securities in scheme portfolio. \*In case of semi annual YTM, it will be annualized.

## ■ Risk Free Return:

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

## ■ Sharpe Ratio:

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

## ■ Specified Mutual Fund:

Specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

## ■ Standard Deviation:

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

## ■ Total Expense Ratio:

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

## ■ Entry Load:

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101.

Note: SEBI has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.
