## MARKET SNIPPET

The Indian equity markets have performed well ahead of other global markets over the last 12 months and one can expect some breather in the short term. While the jury is still yet out on the inflation, the near-term market performance could be an interplay between pace of withdrawal of stimulus, any rate action and continuity of corporate earnings growth. India's medium to long term growth prospects seem to be in place. The key blocks for recovery (a) low interest rates, (b) supportive government policies and (c) supportive global macros are largely in place. Reforms like GST, IBC, RERA, labour laws and recent focus on manufacturing exports are medium to long term positive factors.
