How does Fund allocate assets in underlying ETF's?

The allocation in selected ETFs at all-time shall be reflective of the market condition. The allocation at no time shall change much from the current Market capitalization based weightage of the market cap segment/ ETF. The base case of the allocation is the free float market cap-based representation of NIFTY 50 Index, NIFTY Next 50 Index and Nifty Midcap 150 Index in Large and Midcap space. The over and under allocation is done in a range bound manner to preserve the fundamentally passive nature of the scheme.

The current limit of the over and under allocation is based +/- 10% of NIFTY 50 Index representation, which is then proportionally distributed between Nifty Next 50 Index and Nifty Midcap 150 Index also. As on June 30, 2023, NIFTY 50 Index had 69.9% representation in Large cap space and hence maximum allocation allowed to NIFTY 50 Index is 78.4% (71.2 % + 7.2%) and minimum allocation allowed is 65% (72.3% - 7.2%).
