

Heart says Equity
Market says Debt

Balanced Advantage Fund says,
why not both?

Invest in

Mirae Asset Balanced Advantage Fund

(An open-ended dynamic asset allocation investing in debt and equity instrument only*)

August 2026

Investor's Need to Solve Several Complex Questions

Should I buy or sell now?
(Inability to time the markets)

What should I buy?
(Lack of discipline
in asset allocation)

**Have the markets peaked?
Are they going to crash?**
(Inability to time the markets)

**Market Moved Suddenly,
Should I rebalance or wait?**
(Reactive, not proactive)

Investor's Confusion and Asset Allocation

- When to buy & When to sell
- What to buy and at which level
- What to sell and at which level
- What should be the allocation percentage
- Which asset class to buy as per current market scenario

Thus, selecting a fund designed to handle these issues provides better support.

Impact of Taxation on Asset Rebalancing

Scenario 1

Asset Allocation	Market Goes Up	Rebalance Activity	Asset Allocation reinstated	STCG		LTCG	
				Rate	Amount	Rate	Amount
70,000	85,000	-15,000	70,000	20%	-3,000	12.50%	-1,875
30,000	15,000	15,000	30,000	-	-	-	-

Scenario 2

Asset Allocation	Market Goes Down	Rebalance Activity	Asset Allocation reinstated	Taxation (Debt Taxation as per slab rate)	
				Rate	Amount
70,000	55,000	15,000	70,000	-	-
30,000	45,000	-15,000	30,000	30%	-4,500

Doing the rebalancing at the investor's level can be inconsistent, inconvenient and ill-timed; thus, investing in a dynamic asset allocation strategy like Balanced Advantage Fund rebalancing is conducted at the fund level, saving investors the hassle.

.. And Yet Investing in Equities Poses More Challenges

When to enter and exit? Difference between 52 week high and low was 18.89% but the total return for the year is only ~ (-5.78%)

In just 1 yr, markets saw 4-5 different phases

In every phase, almost every trend has reversed – Impacting short term sentiment

Change in events & News flow seems not stop!

In the short term, sentiment drives markets –
In the long term, only corporate earnings matter

Investors **cannot time the markets** – Investing for long term compounds gains and thus is likely to be a defense mechanism!

Harsh Reality of Markets

Timing the markets is almost impossible – especially with course altering events coming more frequently & market cycles shortening

‘Time invested’ & ‘not timing’ delivers higher probability of success

Love it or hate it, but markets are increasingly unpredictable & complex; yet long-term investment in equity is a must for wealth creation

Nifty 50 TRI used for representation purpose. Returns are calculated from peak date to bottom date. Returns are absolute returns. Above numbers are for Illustration purpose only. Past performance may or may not sustain in the future. Data as on August 31, 2026. Source: Internal Calculation, ACEMF.

Choice of Asset Allocation

■ Equity ■ Debt

Conservative

Investment Objective:
Wealth Preservation

Moderately Aggressive

Investment Objective:
Income Generation

Aggressive

Investment Objective:
Wealth Creation

Asset allocation needs to be responsive to prevailing market conditions, while considering the investor's risk profile and investment objectives

Disclaimer: The asset allocation illustrated is indicative and for representation purposes only, depicting a hypothetical investor scenario. It does not constitute investment advice, an offer, or a recommendation to invest. Actual asset allocation should be based on an investor's individual risk appetite, financial goals and investment horizon. Investors should seek guidance from their financial advisor or mutual fund distributor before making any investment decisions.

What is the Right Combination of Equity + Debt?

Need for a 'Dynamic' Solution

Market phases change constantly either due to cyclicality or events – a bull or bear phase can **cause the static portfolios to 'drift' away from original stance.**

Investors tend to 'react' in such situations; such response tends to be expensive as it tends to reflect emotional biases more than being driven by data or research.

Dynamic approach or response based on research **can 'anticipate' the change and 'reduce' the impact of course correction** and even reposition the portfolio for stronger gains.

Balanced Advantage Funds

Part of Dynamic Asset Allocation Funds category under the SEBI Mutual Funds category

Balanced Advantage Funds – Structure

Structure

Dynamic equity & debt allocation aims to:

- Generate equity like returns with lower volatility
- Buy more when markets are cheaper
- Reduce risk when valuations expand
- Avoid emotional allocation decisions; framework driven decision making
- Valuation-aware exposure shifts
- Equity taxation is maintained structurally

Mirae Asset Mutual Fund Offerings Under Hybrid Category

Net Equity	76.11%	38.66%	57.35%	-	56.55%
Arbitrage	-	28.24%	11.25%	79.10%	10.91%
Commodity	-	-	-	-	13.71%
Debt & Others	23.89%	33.10%	31.40%	20.90%	18.83%

The investment Framework stated above may change from time to time without any notice and shall be in accordance with the strategy as mentioned in the Scheme Information Document of the scheme. For Complete asset allocation and Investment Strategy, please refer to the Scheme Information Document of the fund https://www.miraeassetmf.co.in/docs/default-source/sid/sid_mirae-asset-balanced-advantage-fund_06112025.pdf

Why Invest in Balanced Advantage Funds

Presenting Mirae Asset Balanced Advantage Fund

About the Fund

Investments in Fund

Equity and equity related instruments (0% to 100%).
Debt securities (0% to 100%).

Investment Framework ^

Equity: Invest in flexi-cap, large-cap supported by a Business Management Valuation model.

Arbitrage: Balancing asset class, enables equity taxation, and aims to reduce fund volatility.

Debt: Focuses on high-quality, view-driven allocation to provide stability and act as a portfolio anchor.

Why Mirae Asset Balanced Advantage Fund?

- The fund follows a fundamental approach to assess equity market valuations at any given point of time to ascertain the desired net equity position of the fund.
- The fund therefore endeavors to provide an optimum equity market participation for an investor. The net equity and arbitrage position exposure helps to achieve equity capital gains taxation for the investor at all points of time. The debt exposure endeavors to provide an income approach to the fund.
- The fund attempts to provide a risk-adjusted return experience while smoothing volatility by actively managing the net equity position in the fund.

^The investment Framework stated above may change from time to time without any notice and shall be in accordance with the strategy as mentioned in the Scheme Information Document of the scheme.

For detailed AAUM disclosure, please visit: [https://www.miraeassetmf.co.in/docs/default-source/other-disclosure/average-assets-under-management-\(aaum\)-disclosure-\(monthly\)-august-2026.xlsx](https://www.miraeassetmf.co.in/docs/default-source/other-disclosure/average-assets-under-management-(aaum)-disclosure-(monthly)-august-2026.xlsx)

Investment Framework*

- Dynamic Asset Allocation fund aims at generating equity-like returns with lower volatility
- The fund framework allows it to invest in three asset classes – Equity, Debt and Arbitrage. Where, based on a pre-defined asset allocation model, the allocation varies between Equity and Debt.
- Given the equity taxation, the fund needs to keep equity investment (Equity + Arbitrage) at 69%. The net equity range, as per our model, can be between 30% to 80%, arbitrage between 0% to 35% and debt can be between 20% to 35%.

Investment Framework

Current Fund Positioning

Historic Trend of Asset Allocation

Portfolios may or may not change. This is the current investment framework which may change in future without prior notice.
Source: Internal; Above data as on August 31, 2026. *Portfolios may or may not change. For complete portfolio of the scheme please visit https://www.miraeassetmf.co.in/docs/default-source/portfolios/mabaf_aug2026.xlsx
Pursuant to Clause 3.9 of Part IV of the SEBI Master Circular dated March 20, 2026, the universe of 'Large Cap' shall consist of the top 100 entities, 'Mid Cap' shall consist of the 101st to 250th entities, and 'Small Cap' shall consist of the 251st and onwards entities in terms of full market capitalization.

Equity– Active & Efficient(net) Allocation to Address Rising Macro Risk

Since Inception Avg Net Equity (%): 51.70

Since its launch, the fund has seen longer periods managing market risk.

Despite relatively low Avg Equity exposure, it has captured ~71% of upside while protecting against 42% of downside.

Source: AceMF. For their standard disclaimer, please visit https://www.miraeassetmf.co.in/docs/default-source/portfolios/mabaf_aug2026.xlsx
Net equity levels are as of month-ends. The portfolio is subject to changes within the provisions of the Scheme Information Document of the scheme. Please refer to the SID for investment pattern, strategy & risk factors. Data as on August 31, 2026.

Outlook on the Equity Parameters of the Fund

- Amid recent volatility and geopolitical uncertainty, we raised equity weights by ~4%, in line with our internal model.
- 4QFY26 earnings beat expectations, though higher energy prices may pressure margins in 1QFY27. As markets recovered from mid-May 2026, we marginally trimmed our equity position.
- Earnings in the last two quarters beat prior periods as policy and monetary reforms revive consumption, notably in Auto and high-ticket consumer products.
- Beyond near-term disruption from higher energy prices and a weaker expected monsoon, we see growth momentum resuming in 2HFY27.
- Despite flexibility on market-cap allocation, the fund profile keeps us large-cap biased with a mix of growth and value. Large-cap share is currently higher on relatively attractive valuations.

Sectors	OW/UW Jul-26	OW/UW Aug-26

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and the Fund may or may not have any future position in these sector(s)/stock(s)/issuer(s).

Outlook on the Debt Levels of the Fund

- Debt holdings are a mix of government securities, high-quality corporate bonds and certificates of deposit.
- The debt component is largely buy-and-hold, adjusted periodically for significant shifts in interest-rate expectations.
- RBI held the repo rate unchanged while announcing measures to attract foreign flows amid a pressured currency. These measures would be able to potentially draw up to USD 100 billion. Owing to this, calls for a rate hike to defend the currency have abated.
- Post-policy, benchmark yields fell ~15 bps and 3-5 year corporate bonds ~35-40 bps.
- Policy measures are expected to boost index-inclusion prospects, improve system liquidity while reducing PSU supply. Our duration outlook stays positive.
- Accordingly, the fund's duration was increased ahead of the RBI policy.
- Positioning stays focused on 2-5 year corporate bonds, with tactical allocations to government securities.

Past performance may or may not be sustained in future

Who is this Fund For?

Why Invest in Mirae Asset Balanced Advantage Fund?

Mirae BAF = Framework-driven,
risk-aware equity participation

Fund that thrives on cyclical volatility
& protects from event-based volatility

Tax efficiency

Built to create and preserve
wealth across cycles

All weather friend for portfolio – Reduce risk in Falling
Markets while Participating fully in Rising markets

Fund Snapshot

Framework Driven

- Lower PE Based
- Higher PB Based
- View based Flexibility to FM

Allocation

- Net Equity based on valuations
- Closely tracks Nifty 50 TRI
- Smoothens Volatility

Participation

- Seeks to protect downside
- Aims to provide effective upside participation
- Aims to provide risk adjusted performance

Equity

- Business Management Valuations Approach
- Proposed Flexi Cap Strategy
- Prefer Large Cap Bias

Debt

- Buy and Hold
- Acts as anchoring element
- Proposed Active Interest & Duration call

Arbitrage

- Balancing asset class
- Enables equity taxation
- Aims to reduce fund volatility
