# MIRAE ASSET BALANCED ADVANTAGE FUND

An open-ended Dynamic Asset Allocation Fund

As on 31<sup>st</sup> July 2023

### **Fund Details**

MIRAE ASSET BALANCED ADVANTAGE FUND

NET AUM - INR 1179.20 Crore.

INCEPTION DATE - 11-AUG-22.

BENCHMARK - Nifty 50 Hybrid Composite Debt 50:50 INDEX

CATEGORY – An open-ended Dynamic Asset Allocation Fund

Source: Internal. Data as on 31-July-23

### About the fund

- Mirae Asset Balanced Advantage fund (MABAF) is an open ended dynamic asset allocation fund.
- The fund framework allows it to invest in three asset classes Equity, Debt and Arbitrage.
- Given the equity taxation, fund needs to keep equity investment (Equity + Arbitrage) at 65%. The net equity range as per our model can be between 30% to 80%, arbitrage between 0% to 35% and debt can be between 20% to 35%.
- The Mirae Asset Balanced Advantage fund model is guided by combination of P/E and P/B valuations of Nifty 50 TRI Index to decide the net equity allocation.
- The fund uses the arbitrage position to reach its total equity position to achieve equity taxation status for the investors.
- The debt position is achieved by taking a duration call and then buy & hold strategy.

#### AUM in Crs

## **Summary About the Internal Model**

#### **Qualitative Flexibility**

- Regular monitoring of the model with holistic view of the markets & economy
- Driven by Fundamental research to ensure allocation comfort

#### **Balance-sheet Based Valuation**

- Based on P/B (relatively higher weightage in model)
- Allows for growth cycles in asset heavy businesses and financials to be better captured in the model
- Anchors the model and prevents it from swinging to extreme in times of euphoria/distress

#### Income Based Valuation

- Measure Based on adjusted P/E (relatively lower weightage in model)
- Keeps the model anchored to business performance and helps normalize extremes and seasonality
- Vital in helping understand income sustainability at given valuation

Optimal Participation Level Across Market Cycles

The above is the framework currently adopted by the Scheme and is subject to change in accordance with the provisions of the SID & depending on the market conditions.

## **Model Framework**

The above is the framework currently adopted by the Scheme and is subject to change in accordance with the provisions of the SID & depending on the market conditions.

## Outlook on the equity levels of the fund

- The fund was launched on 11<sup>th</sup> Aug 2022. The portfolio has been constructed in this period in lines of our proposed fund positioning.
- The Net equity position as on July 31, 2023, was 51% equity and arbitrage at 15%.
- Equity markets ended positive in July 2023 with Nifty gaining 2.9% during the month.
- The net equity allocation for the fund is model driven. Given the market gained ~3%, we reduced our net equity position from 53% in June to 51% in July. In contrast, in March 2023, when markets corrected, it led to a fall in valuations and hence, we increased our equity weights.
- The Indian equity markets have faced four shocks in the past 2 years which has led to cyclical upturn in many sectors and the private capex cycle is on a recovery mode making, India's macro setup better placed than other emerging markets. While we have flexibility in terms of market cap allocation, given the fund profile; we have kept the portfolio large cap biased with a mix of growth and value opportunities.
- Our key sectors as on 31<sup>st</sup> July 2023 continue to be Banks, Healthcare and Auto.

#### Net Equity Allocation (%) to Top 10 Sectors

Derivatives positions are excluded in computation of the net equity position as on 31-July-23

### **Debt Quants**

Source: Ace MF. Data from Aug-22 to 31-Jul-23.

## Outlook on the debt levels of the fund

- The current debt holdings are a mix of government securities, high quality corporate bonds & certificate of deposits.
- While inflation has come down for most economies, it is still well above target level of 2% for most developed economies and this has led to a hawkish stance by global policy makers. While US Fed increased it's policy rate by 25 basis points (bps) to 5.50%, European Central Bank (ECB) hiked its policy rate by 25 bps to 4.25%. Future policy actions will remain largely data dependent.
- The domestic yields witnessed hardening due to rise in US treasury yields and increasing interest rates in major advanced economies amidst a halt in policy rate hike in India. For now, the yields look range bound.
- The debt component would mostly be a buy and hold strategy, but for periodic adjustment for any significant change in interest rate expectations there could be a change.
- Accordingly, after providing for contingent liquidity requirements, the debt component duration is currently around 2.81 years.
- As the outlook on interest rates improves further and clear signs of rates easing emerges, duration may be increased or vice versa as the data & situation pan out.

Quantitative: Debt (As on 31-July-23)	
Weighted Average Maturity	2.81 years
Modified Duration	2.22 years
Macaulay Duration	2.33 years
Yield To Maturity	7.19%

Debt Instruments	% of Fund (as on 31-July-23)
G-Secs/ Sovereign	10.90%
Public Sector Undertakings/ Corporate Bonds	10.18%
Certificate of Deposits	1.69%
TREPS & Net Receivables	25.75%
