About the fund

- Mirae Asset Balanced Advantage fund (MABAF) is an open ended dynamic asset allocation fund.
- The fund framework allows it to invest in three asset classes – Equity, Debt and Arbitrage.
- Given the equity taxation, fund needs to keep equity investment (Equity + Arbitrage) at 65%. The net equity range as per our model can be between 30% to 80%, arbitrage between 0% to 35% and debt can be between 20% to 35%.
- The Mirae Asset Balanced Advantage fund model is guided by combination of P/E and P/B valuations of Nifty 50 TRI Index to decide the net equity allocation.
- The fund uses the arbitrage position to reach its total equity position to achieve equity taxation status for the investors.
- The debt position is achieved by taking a duration call and then buy & hold strategy.

Summary About the Internal Model

Qualitative Flexibility

- Regular monitoring of the model with holistic view of the markets & economy
- Driven by Fundamental research to ensure allocation comfort

Balance-sheet Based Valuation

- Based on P/B (relatively higher weightage in model)
- Allows for growth cycles in asset heavy businesses and financials to be better captured in the model
- Anchors the model and prevents it from swinging to extreme in times of euphoria/distress

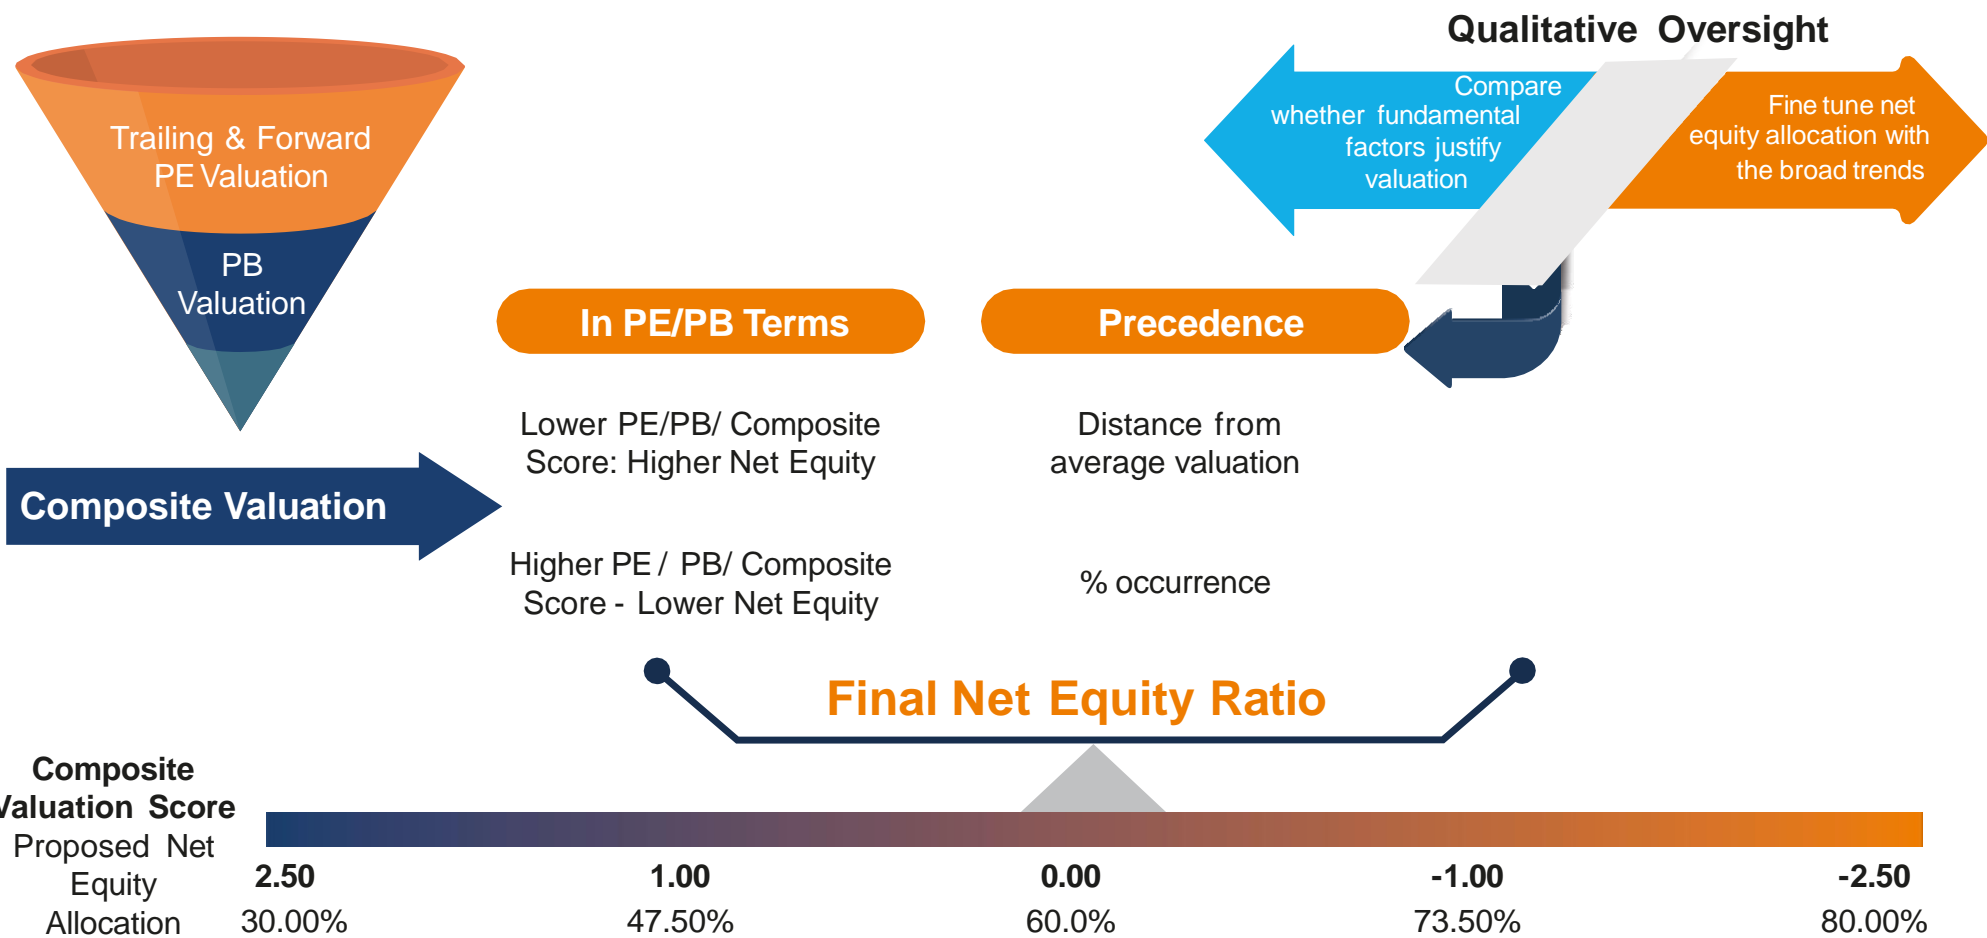

Income Based Valuation

- Measure Based on adjusted P/E (relatively lower weightage in model)
- Keeps the model anchored to business performance and helps normalize extremes and seasonality
- Vital in helping understand income sustainability at given valuation

Outlook on the equity levels of the fund

- The fund was launched on 11th Aug 2022. The portfolio has been constructed in this period in lines of our proposed fund positioning.
- The Net equity position as on Jan 31, 2024, was 52% equity and arbitrage at 16.8%.
- Equity markets ended flat in Jan 2024 with Nifty 50 closing at 21,726 at the month end.
- The net equity allocation for the fund is model driven. Model is Valuation centric and hence, any change in valuation leads to a change in net equity allocation for the fund.
- The Indian equity markets have faced four shocks in the past 2 years which has led to a cyclical upturn in many sectors and the private capex cycle is on a recovery mode making, India's macro setup better placed than other emerging markets. While we may have flexibility in terms of market cap allocation, given the fund profile; we have kept the portfolio large cap biased with a mix of growth and value opportunities.
- The Fund is OW Discretionary, Industrials and Financials and UW Energy, IT and Staples as of 31st January 2024..

Outlook on the debt levels of the fund

- The current debt holdings are a mix of government securities, high quality corporate bonds & certificate of deposits.
- While global Inflation is expected to remain sticky, labour markets continue to remain firm. However, growth is expected to show signs of weakness going ahead.
- Domestic yields are expected to track global yields as domestic macroeconomic data continues to remain comfortable while global trends remain volatile.
- The debt component would mostly be a buy and hold strategy, but for periodic adjustment for any significant change in interest rate expectations there could be a change.
- Accordingly, after providing for contingent liquidity requirements, the debt component duration is currently around 2.62 years.
- As the outlook on interest rates improves further and clear signs of rates easing emerges, duration may be increased or vice versa as the data & situation pan out.
