Portfolio focused on Quality and Liquidity

Quality Factors (Equity Portion)	
Parameter	% of NAV
Exposure to companies ROE* > 12%	57.85
Exposure to companies ROIC\$ > 10%	37.66
Weighted Average Net Debt to Equity Ratio (Ex-Financials)	0.48

Liquidity Analysis (Equity Portion)		
Days to Exit	% of NAV	Number of Stocks
<3 days	60.96	56
3-10 days	10.35	16
> 10 Days	4.84	11

ROE (Return on Equity):

ROE reflects a company's profitability. A higher average ROE indicates that the company has strong sustainable competitive advantage in the sector in which it operates.

ROIC (Return on Invested Capital):

Similar to ROE, ROIC is a profitability measure and measures the percentage return that a company earns on its invested capital. It helps understand how efficiently a company is using its shareholders' funds to generate profits.

Net Debt to Equity Ratio:

Net Debt to Equity Ratio is calculated by dividing the company's total debt minus cash to its total shareholder equity. Generally, a company with a high debt to equity ratio is considered riskier.

Fund Manager – Commentary

- The fund's equity current allocation framework is guided by broader market conditions and portfolio company valuations and has ranged between 68%–75% over the past year. Consistent with the typical hybrid fund investor profile, we aim to maintain a higher allocation toward large-cap stocks to optimise risk-adjusted returns.
- We seek businesses with sizeable growth opportunities, strong returns on invested capital, capable management, and reasonable valuations. Portfolio construction follows a barbell approach — anchored by high-quality compounders at one end and attractively valued deep-value opportunities at the other — with the objective of delivering a diversified, risk-adjusted portfolio through a core-and-tactical framework.
- Corporate earnings in 4QFY26 were ahead of expectations; however, the impact of elevated energy prices on margins may become visible in 1QFY27. Against this backdrop, we marginally trimmed our equity exposure as markets recovered through May 2026.
- Notably, corporate earnings over the last two quarters have improved meaningfully relative to prior periods, reflecting the gradual transmission of policy and monetary reforms into consumption — particularly in sectors such as Automobiles and high-ticket consumer products.
- Beyond near-term headwinds from elevated energy prices and an anticipated below-normal monsoon, we expect growth momentum to re-accelerate in 2HFY27.
- As of 30th September, 2026, our key overweight positions are in Banks, Pharmaceuticals & Biotechnology, and Capital Markets, while we remain underweight on globally linked sectors, specifically Diversified FMCG and IT – Software.
