

Mirae Asset Arbitrage Fund

(An open ended scheme investing in arbitrage opportunities)

October 2025

Aim to use price difference to your advantage

BUY
₹100

SELL
₹110

What is Arbitrage

The act of buying a security in one market and simultaneously selling it in another market for a price differential is called Arbitrage.

The Price differential that exist in the equity and derivative segments for the same asset is called as the spread and can also be attributed to market inefficiencies

What make Arbitrage Risk Free

Arbitrage is simultaneous buying and selling the same underlying security or its derivatives in different market segments to make risk free profits.

For Illustration

Buy a stock at Rs 100 and Sell the 1 month future of the same at Rs.101 at the end of Month

Stock price rises to Rs. 105

Gain on cash position
 $5(105-100)$

loss on Future position
 $4(101-105)$

Net Profit = 1 ($5-4$)

Stock price Remain same
as at Rs. 100

Gain on cash position
 $0(100-100)$

Gain on Future position
 $1(101-100)$

Net Profit = 1 ($0+1$)

Stock price fall to Rs. 95

Gain on cash position
 $5(95-100)$

Gain on Future position
 $6(101-95)$

Net Profit = 1 ($-5+6$)

An arbitrage transaction may seek to capture riskless profit

Factors Affecting Arbitrage Spread

Arbitrage Strategies

1. Exchange Arbitrage

Exchange arbitrage is taking advantage of price difference of the same security in tow stock exchange.

For instance

	NSE	BSE
Price of Stock A	Rs 100	Rs 101
Action	Buy	Sell
Profit	Rs 1 (101-100)	

Excludes all cost

The above is only meant for understanding the concept of arbitrage. The above illustration should not be taken as any indication of future returns of the scheme.

2. Cash and Carry Arbitrage

Cash and Carry Arbitrage is taking advantage of price difference of the same security in cash market and current future series of same security. It is the most common arbitrage strategy used by Arbitrage Mutual Funds.

Scenario Analysis of Cash and Carry Arbitrage

	On F&O Expiry Price of Stock		
	Stock Prices goes up to 1900	Stock Prices goes down to 1700	Stock Prices remains 1785
Buy the Stock @ 1785	115	-85	0
Sell the Stock Future @ 1800	-100	100	15
Profit	15	15	15

The above data is for illustration purpose only. *Excludes all costs F&O stands for Future and Options
The above is only meant for understanding the concept of arbitrage. The above illustration should not be taken as any indication of future returns of the scheme.

3. Reverse Arbitrage

Reverse Arbitrage is reversing the arbitrage position wherein since the premium in the futures market is low or negative you sell the stock in the cash market and simultaneously buy the future of the same stock

4. Index and Basket of Stock Arbitrage

Index and Basket of stock arbitrage is similar to Cash and carry arbitrage, the only difference is that instead of a single stock here the arbitrage is for the index

For instance

	Cash Market	F&O Market
Security	Stock constituting Nifty 50 index in the same proportion as the index	Nifty 50 index
Action	Buy	Sell
Price	Rs.9,275	Rs.9,300
Profit*	Rs.25 (9300-9275)	

The above is only meant for understanding the concept of arbitrage. The above illustration should not be taken as any indication of future returns of the scheme.

5. Corporate Driven Arbitrage

Right Issues

This is announced for a company's existing investors when it needs more capital. The company gives an option or 'rights' to an existing investor to buy new shares at a discounted price during a certain period. This offers an arbitrage opportunity as the investor can buy shares at a discount and sell the same when it matches the market price.

Mergers and acquisitions (M&A)

When a company goes through merger, amalgamation, hive off, demerger etc., there could be opportunities due to price differential in the cash and the derivative market.

Buy-Back Arbitrage

When the company announces the buy back of its own shares, there could be opportunities due to price differential in buyback price and trade price.

Dividend Arbitrage

Dividend arbitrage is intended to create a risk-free profit by hedging the downside of a dividend-paying stock while waiting for upcoming dividends to be issued.

What are the Arbitrage Funds

Arbitrage funds are equity-oriented funds under the hybrid category that simultaneously invest (buy in cash and sell in future) in the same stock in two different markets (cash and futures) to generate returns.

The Minimum exposure to equity is 65% of the asset while the balance portion is invested into debt segment.

Minimum exposure of 65% in equity arbitrage is required for the scheme to be eligible for equity taxation. The remaining 35% is invested in debt and money market instruments

Reasons to invest in an arbitrage

Mirae Asset Arbitrage Fund

(An open ended scheme investing in arbitrage opportunities)

Investments in Fund

Arbitrage Fund is taking advantage of a price difference between two or more markets

Investment Framework

Invest predominantly in completely hedged arbitrage opportunities (simultaneous transactions of a long position in cash and exactly short position in futures) A small portion will be invested in other arbitrage opportunities

Aims to provide relatively risk-free returns without any directional equity risk

Why Mirae Asset Arbitrage Fund?

The fund aim's to provide minimal risk.
These may be an alternative to debt-oriented mutual funds

Fund Manager

Mr. Jignesh Rao
(Equity Portion)
(Since June19,2020)

Mr. Jigar Sethia
(Equity Portion)
(Since June19,2020)

Mr. Krishnpal Yadav*
(Debt Portion)
(Since 22nd Sept,2025)

Fund Inception	Category	Benchmark
19 th June 2020	Arbitrage Fund	NIFTY 50 Arbitrage Index
Goal	Ideal Investment Horizon	Risk Profile
 Regular Income	 3 months and above	 Low

Source: Internal, Data as on 31st Oct, 2025 This framework may or may not change in the future.
*Pursuant to notice cum addendum no.63/2025 the Fund Manager of the scheme has changed with effect from 22nd September,2025.
Please refer to 'Average Assets Under Management (AAUM) Disclosure (Monthly)' on the website for further AUM break up.
<https://www.miraeassetmf.co.in/downloads/statutory-disclosure/other-disclosure> (Ctrl+Click to follow link)

Our Investment Framework

- 1** Investments are predominantly completely hedged arbitrage opportunities (simultaneous transactions of a long position in cash and exactly short position in futures)
- 2** A small portion might be invested in other arbitrage opportunities (corporate driven event driven)
- 3** The fund aims to provide relatively low risk returns without any directional equity risk
- 4** The scheme might largely be invested in arbitrage but may allocate a higher proportion occasionally towards debt (high quality low duration debt securities or money market instruments) when returns look more favourable compared to arbitrage but ensuring at all times that the taxation status is not compromised.
- 5** The margin money requirement for the derivative exposure may be held in the form of G-sec, T-bills, CDs and CPs.

Key Strategies of Fund

Normally the position might be held until expiry of the futures contract when the offsetting position is converged and profit is locked.

However if the price converges before the expiry we may wind up the Position and could invest in other opportunities available

At times the arbitrage positions could be rolled over the next cycle

Largely the fund will try and follow the cash and carry arbitrage strategy but could also consider other strategies depending on the opportunities available.

Where might the Fund Invest

Asset Type	Investment decision
Arbitrage Opportunities	Yes
Margin Fixed Deposits	Yes
Out-right Equity Exposures	No
Equity IPO	No
Debt & Money Market Instruments	Yes
Credit Risk	Low
Duration Risk	Low

This is the current investment framework which may or may not change in the future these are based on the Fund Manager's outlook and are subject to change.

Historic Portfolio Composition

Historic portfolio composition of Mirae Asset Arbitrage Fund(In %)

- Since the Inception of the Fund, Asset Allocation has remained in line with the portfolio mandate.
- Since the past few months allocation towards G-secs have reduced while allocations towards other debt instruments have increased leading to the improvement in fund performance.

This framework may or may not change in the future.
