# Manufacturing in India: Potential to be a major driving force for Indian Economy

---

# Manufacturing: Potential to be a major driving force for Indian economy

## Contribution to GDP

Expected to **increase to ~20%** this decade

## Potential Expansion

PLI to promote companies to **invest over U\$ 20 Bn** in capex

## Medical Devices

Market size may reach **\$50 Bn** by 2025

## Electronics

**Largest allocation in PLI scheme** with focus to increase value addition

## Auto

**Key beneficiary of PLI allocation** with Focus on Battery for EV push

## Government Focus

**~ Rs 2 Tn PLI scheme** push into production activities

# India lags behind in manufacturing: Scope to increase participation

Manufacturing, value added (% of GDP)

Potential economic value for India \$ billion, FY30

**India's Manufacturing share has remained relatively low compared to other economies and government is seeking to focus on this space to remain globally competitive**

Source: World Bank Data as on Dec 2021, McKinsey Global Institute Report, India's Turning Point, August 2020

## Manufacturing may have the potential to be at the forefront of India's \$ 5 trillion GDP goal

\$640 B Construction	\$535 B Food Processing	\$424 B Tourism	\$400 B Electronics	\$350 B IT/BPM	\$304 B Chemicals
\$300 B Auto	\$285 B Roads	\$223 B Textiles	\$200 B Auto Comp	\$192 B Railways	\$180 B Renewables
\$150 B Mining	\$130 B Defence	\$125 B Thermal Power	\$123 B Ports	\$112 B Capital Goods	\$110 B Oil & Gas
\$100 B Biotech	\$100 B Media	\$65 B Pharma	\$30 B Leather	\$25 B Aviation	\$9 B Wellness

**Manufacturing Sector is expected to contribute more than \$1 Trillion in achieving the \$5 Trillion Economy goal.**

# The great manufacturing push: Government initiatives

---

# Indian government initiatives towards manufacturing sector

**Production Linked  
Incentive**

**Make in India**

**National  
Manufacturing Policy**

**Skill India**

**Skill India**

**Samarth Udyog**

**Industry 4.0**

**Increased government support and policies to strengthen manufacturing sector in India**

# Highlights of production linked incentive (PLI) Scheme

---

Production-Linked Incentive (PLI) is a meaningful change in India's industrial policy

- **Rs. 2 Trillion of incentive** over the next five year in 13 sectors
- **Incentives are 5-10% of revenues** if output targets are met
- Rely on **5-10 champions in each sector**/sub-sector instead of spreading the incentive thinly
- **Mobiles:** production could rise from 350mn to 600mn, value-add from 15% to 30%
- **Autos:** Key beneficiary; may incentivize i) Electric Vehicles ii) Passenger Vehicle export iii) component import substitution
- Could add US\$144bn to FY27 sales and US\$70bn to GDP; net exports \$55bn higher, 2.2mn jobs, \$22bn direct capex
- Production linked incentive (PLI) scheme replaces existing Merchandise Exports India Scheme (MEIS) scheme introduced in April 2015. MEIS scheme's were not World Trade Organization (WTO) compliant whereas PLI scheme's are WTO compliant

# PLI Scheme : Focus on manufacturing output

Current focus of Rs. 477 Bn of Merchandise Exports India Scheme

Split of 2.6 Tn under PLI scheme

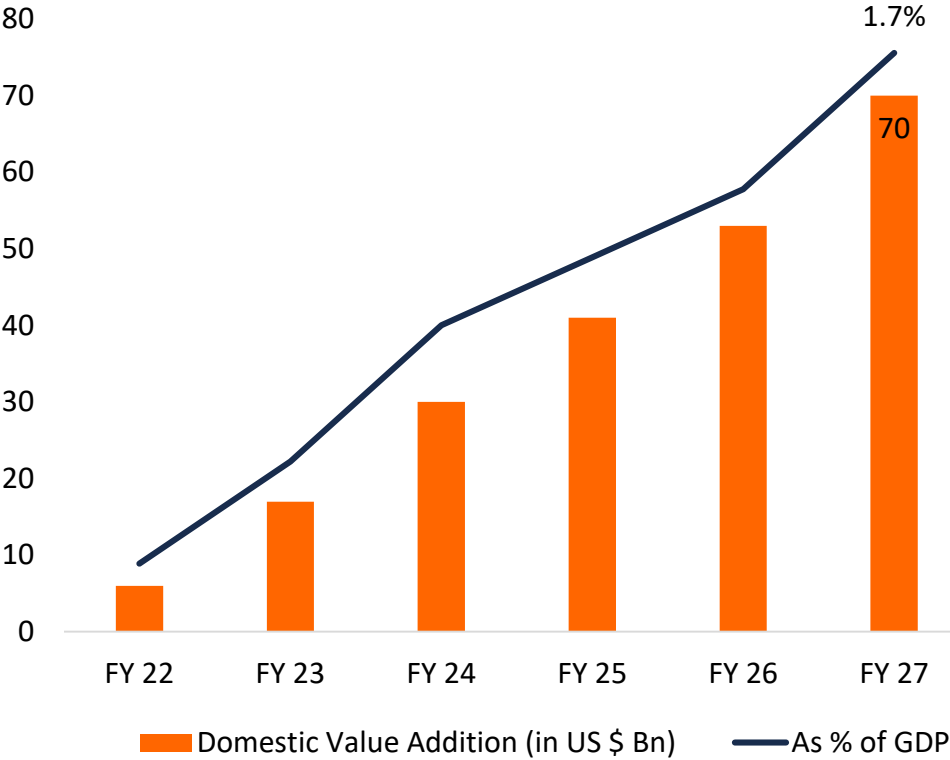

**Production Linked Incentive (PLI) has clearly distinguished itself from previous scheme such as Merchandise Exports India Scheme (MEIS) by focusing on key manufacturing sectors**

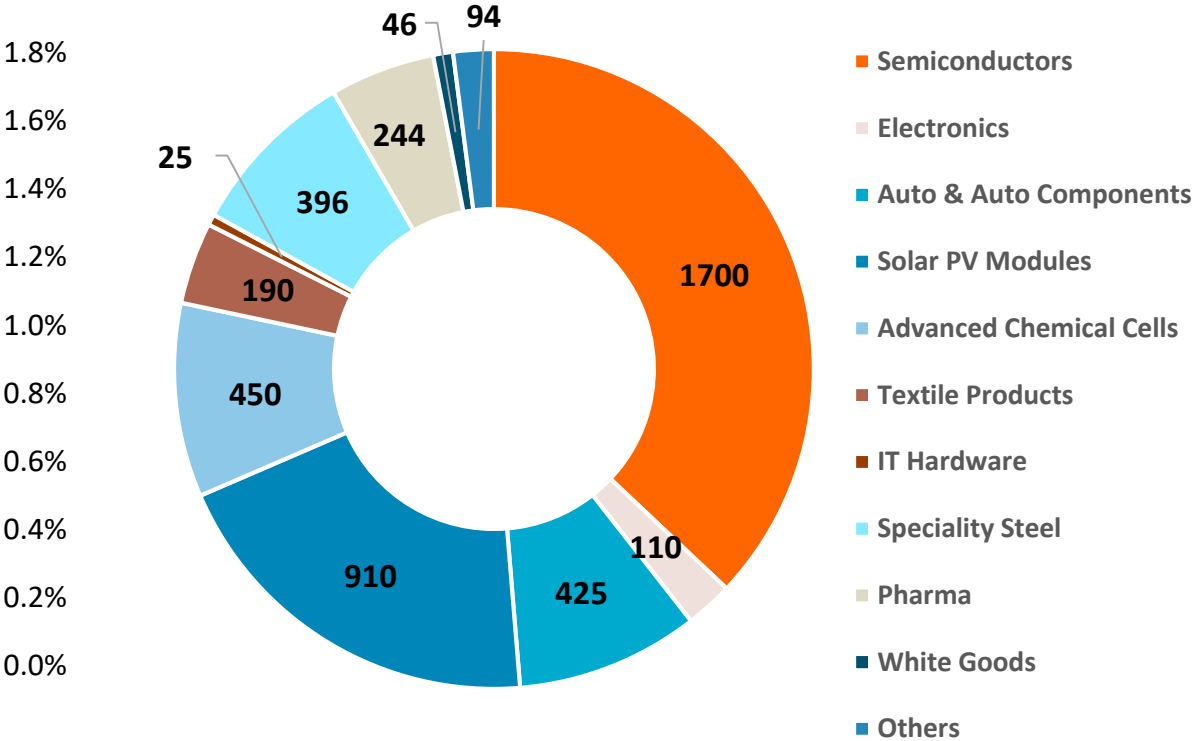

Source: Invest India Government, Ministry of Commerce, Credit Suisse Report PLI Schemes: A new pro-growth template for India's Industrial Policy. Electronic Goods include mobile phone, Data as on March 2022; The split of 2.6 Tn includes the proposed outlay of ₹76,000 for semiconductors under the PLI scheme.

# Production linked incentive (PLI) is expected to add US \$ 70 Bn by FY 2027 in GDP

Estimated GDP impact from the PLI schemes

Projected increase in Capex (₹4.6 Lakh Crs.)

**Production Linked Incentive (PLI) is expected to potentially contribute 1/5<sup>th</sup> of the incremental rise in manufacturing GDP over medium to long-term with focus being Auto, Pharma & Electronic Goods**

Source: Invest India Government , Ministry of Commerce, Credit Suisse Report PLI Schemes: A new pro-growth template for India’s Industrial Policy, Data as on Dec 2020

# Manufacturing: Prospects of key segments

---

## Auto sector: On path to recovery

---

### Recovery on the anvil:

- In CY2022, a strong recovery in PV~ segment (both domestic and global) led by improvement in supply chain scenario is expected.
- In domestic market, CV~~ sector is expected to pick up led by improvement in fleet utilisation levels as well as higher freight rates resulting in improved profitability.
- The recovery seen in the last 12 months was driven by the **rise in the number of First-Time Buyers (FTBs)** due to the increased preference for personal mobility even as replacement demand remains subdued.
- The industry is now in the early stage of an upcycle given the **looming large and suppressed replacement demand, continued buoyancy in the rural economy and a sequential improvement in financing.**
- The medium-term growth outlook for the 2W and PV segments looks healthy with possibility of a high single digit CAGR growth over the next 3 years

### Key growth drivers:

- Increasing per capita income driving higher penetration levels
- Recovery in economic activity resulting in higher freight demand and
- Improvement in supply chain resulting in higher production volumes in PV, LCV and premium motorcycle segments

# PLI scheme can act as tailwind for manufacturing and sales of EV in India

## EV to see higher penetration:

- EV industry is at an inflection with **favourable government policies** and large investments to build the entire supply chain.
- The government has announced **two different PLI schemes for building up the entire EV ecosystem** (incentives will be provided from cell manufacturing to vehicle development).
- Most EV players are seeing a stock out situation with best-selling vehicles have a waiting period of 1-2 months.

% share of EVs in total 2W Sales

% share of EVs in total 4W sales

**EV penetration is increasing with number of new OEMs launching products in India**

## White goods and electronic industry: Focus to scale up

- PLI Push in white goods is expected to be over Rs 6,000 Cr. with **focus on AC and LED**
- Appliances and consumer electronics industry is expected to double and reach Rs. 1.48 lakh crore (US\$ 21.18 billion) by 2025.
- According to India Cellular & Electronics Association (ICEA), India has the potential to achieve a value of US\$ 100 billion in manufacturing of laptops and tablets by 2025.
- The headset market revenue in India is projected to reach >US\$ 77 million by 2027 at a CAGR of 4.7%, driven by rising adoption of wireless headsets among consumers.

Indian Appliances & Consumer Electronic Industry (in US \$ Bn)

Electronic Industry (in US \$ Bn)

## PLI push for large scale electronics manufacturing (mobile & component)

An Outlay of Rs. 40,995 Cr (USD 5.7 Billion) over next 5 year with target segment being mobile phone and its component

Total  
Production  
expected to be  
over **10.5 lakh  
crore in 5 Yr.**

Of the total  
production  
around **60% is  
proposed to be  
exported in 5 Yr.**

**Domestic  
Value addition**  
is expected to  
**increase from  
15% to 30%**

Companies are  
expected to  
make  
**investment of  
Rs. 11,000 Cr**

**Production Linked Incentive (PLI) in large scale electronic manufacturing (mobile & component) is expected to develop India into global manufacturing hub of smartphone and related accessories.**

# Indian Pharma sector: Striding forward as pharmacy of the world

## India has established as pharmacy of the world

India pharmaceutical industry size is USD 41bn and is growing in high single digits.

- **India Pharma market is 3<sup>rd</sup> largest globally** in terms of volumes. India is the 3<sup>rd</sup> largest API market in the world.
- In **generics formulation India is the largest exporter** with 20% share.
- India's **pharmaceutical exports has consistently increased** (8% CAGR in USD terms over FY16-21) with rising trade surplus.
- Indian generic companies have 46% market share in US generics market up from 9% in 2006.

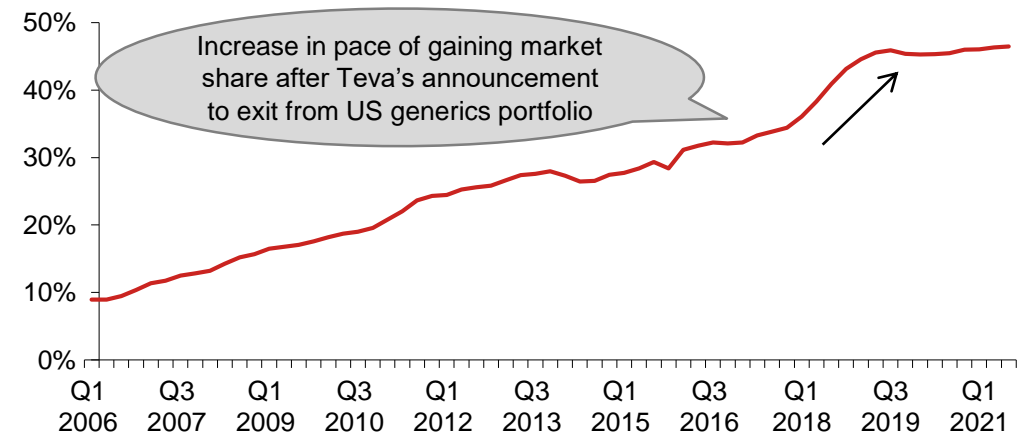

## Regulatory and policy support

- Under PLI, **Pharma Industry will get incentive of INR 219bn over five years** and is expected to yield incremental production of more than USD 40bn over five years.
- India has implemented product patent regime ensuring protection of intellectual property, supporting innovation.

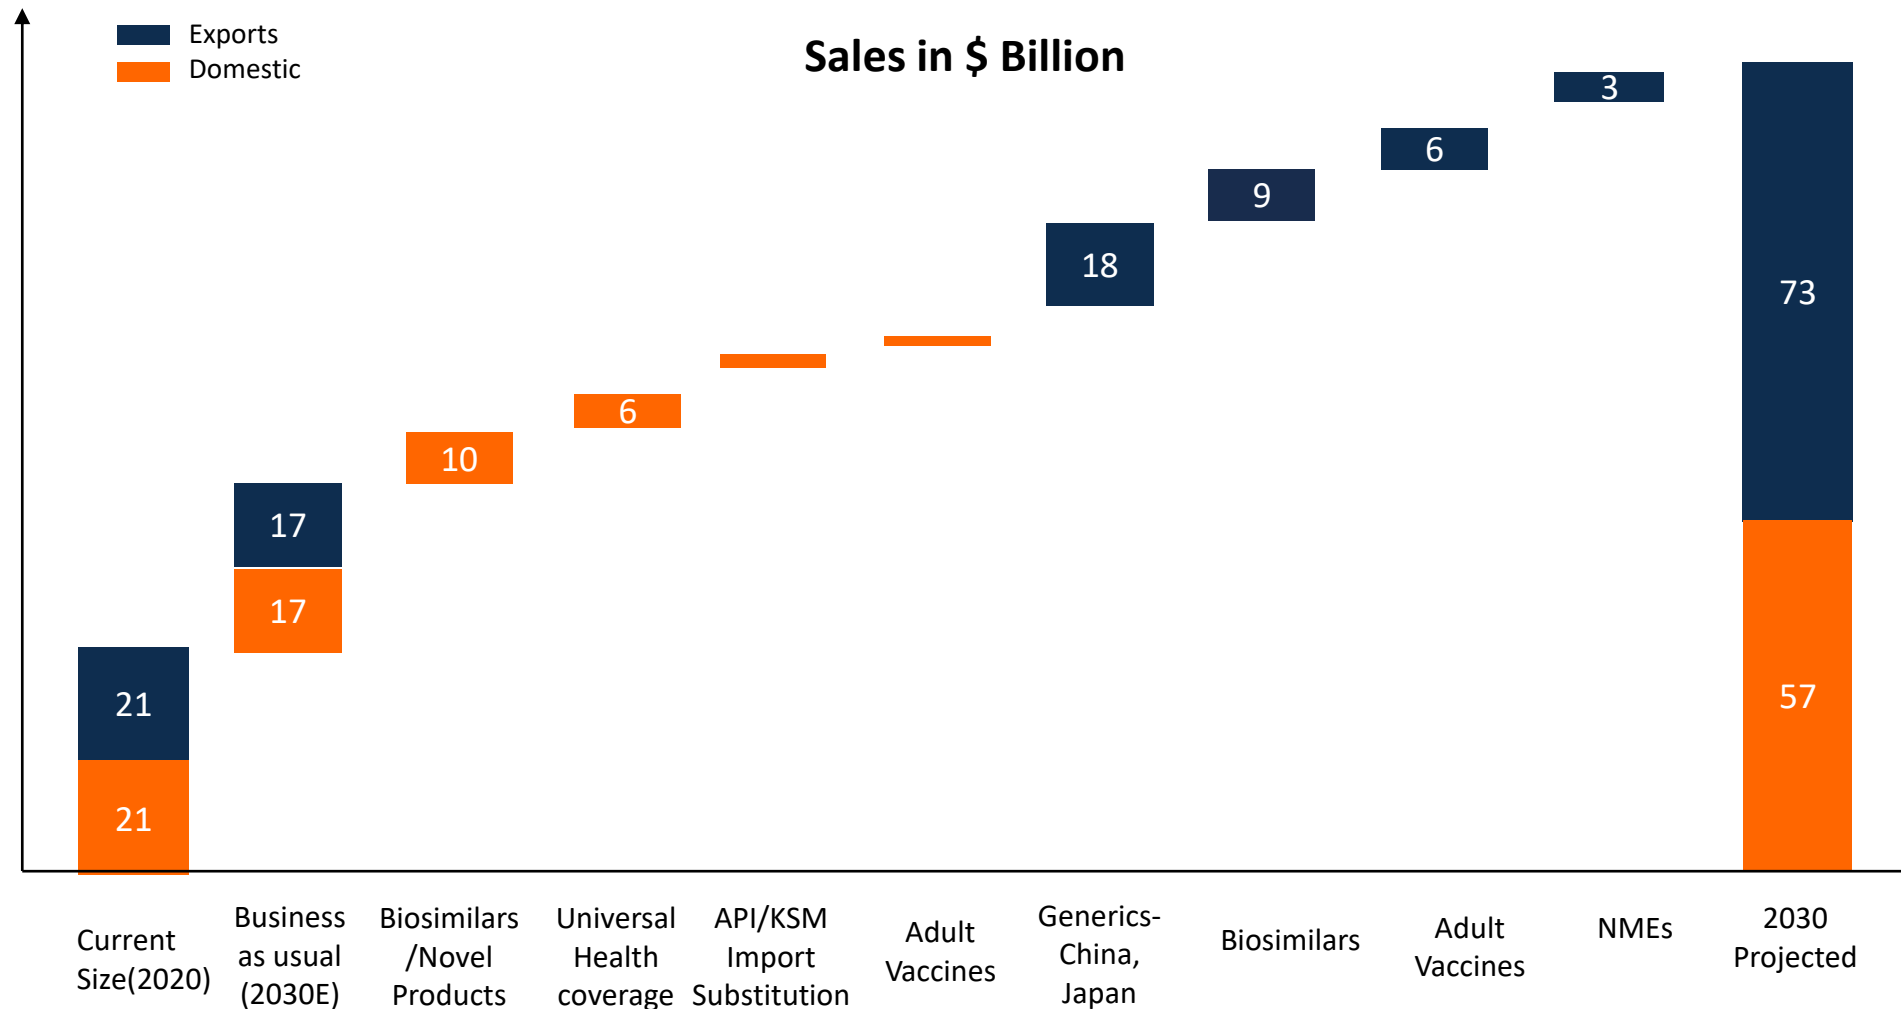

India pharma exports and trade balance (USD bn)

Generic Drug market share for Indian companies in US

# Pharma sector: Industry expected to grow by CAGR of 12% this decade

**India's Pharma Industry is expected to reach \$130 Bn by 2030 at a CAGR of ~12% from 2020 to 2030**

Source: EY, FICCI Pharma Report 2021, API stands for Active Pharmaceutical Ingredients, NME stands for New Molecular Entity; Past performance may or may not be sustained in future.

# Chemical Sector: At an inflection point

The potential drivers of growth for India in chemical segment are :

**Shift to alternate supply sources outside China** – Global MNCs have now started to look beyond China. India with its low labour cost, R&D focus and stringent IP protection laws would be a key beneficiary of this shift.

**Import substitution opportunities** –India’s net chemical imports amounted to ~USD11bn in FY20 which could be a huge substitution opportunity for domestic companies. Many mid and small size companies have now started investing in basic chemical facilities

**Ecosystem is gradually becoming conducive** –Chemicals sector is bound to benefit from increased demand due to PLI implementation in various end use industries.

**Domestic companies are not shying away from investing in growth** – Companies in the listed space have announced capex plans over the next couple of years indicating opportunities and robust underlying demand for the sector

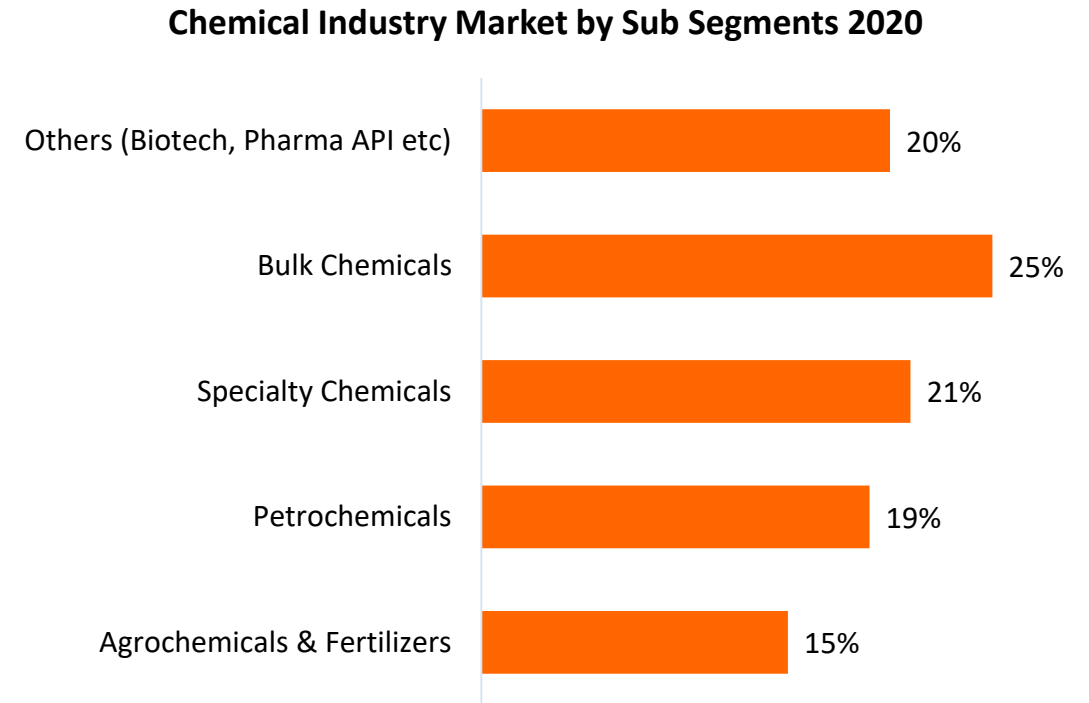

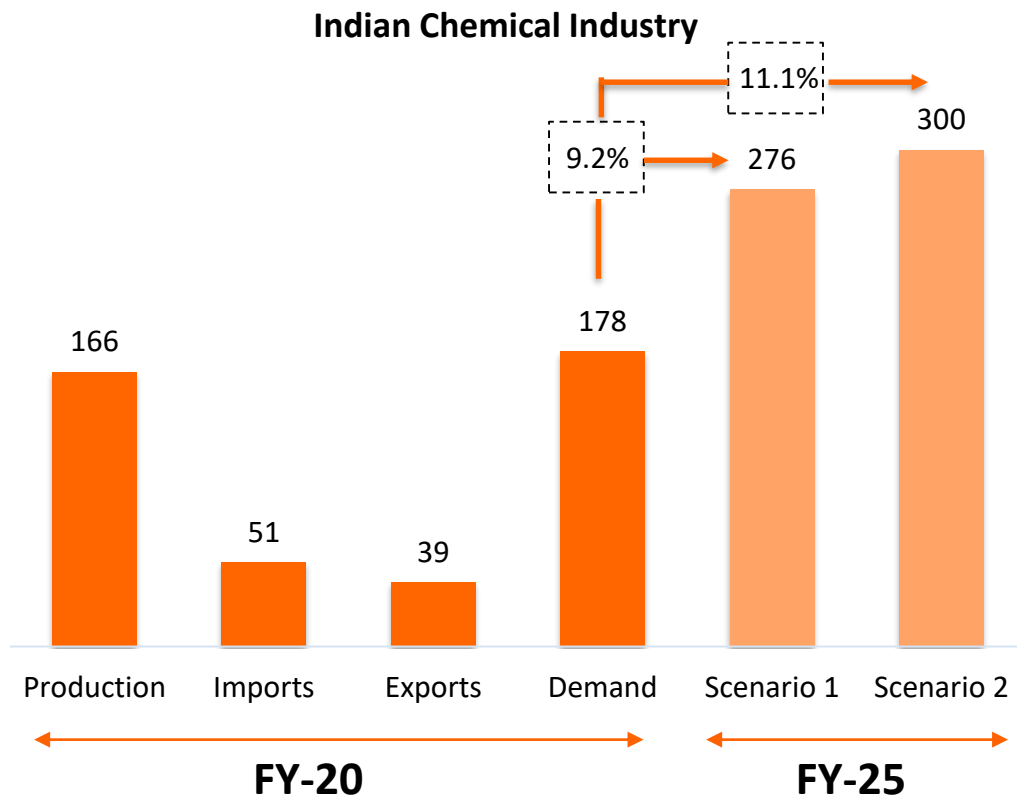

Chemicals Trade Balance (Rs tn)

Capex (Rs bn)

# Chemical Sector: Demand expected to continue

**Demographic Dividends, Low per capita consumption, increasing export demand and enabling government initiatives are the key growth drivers for the chemicals industry**

# Metals & petrochemicals: Focus on capacity expansion

## Petrochemical

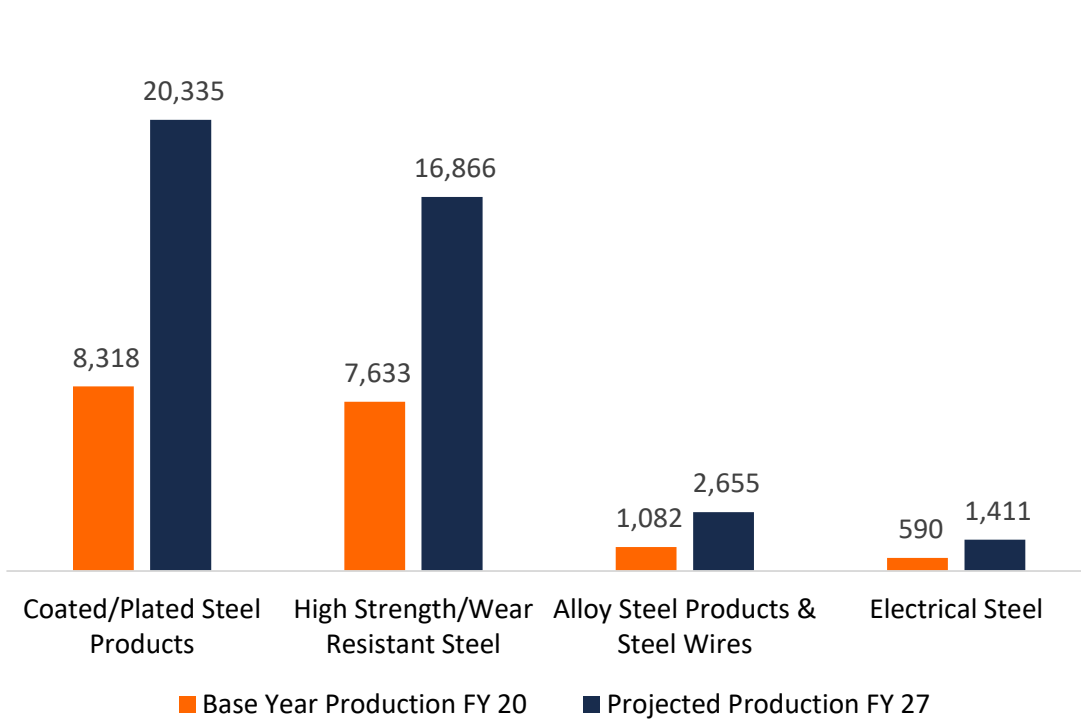

- India's cumulative **refining capacity has increased by 3%** over the last decade to 255 mn tons currently and is **expected to grow at double the pace over the next 5 years** driven by capacity expansions across both the PSU and private refineries.
- **The OMC's have plans to set up over 22,000 EV charging stations over the next 5-7 years stations**, which drive incremental capex in the medium term.

## Metals

- China's commitment towards decarbonization promises to keep supply and exports from China under control. This should support prices and margins outside China
- **Metal companies have deleveraged balance sheets to a sustainable level** such that existing earnings can now support growth investments without additional leverage
- **Government has imposed various trade barriers** like import duty on steel, export duty on iron ore and constantly reviews dumping by other countries **to ensure a healthy operating environment for domestic steel industry.**
- With a stronger balance sheet and buoyant outlook on the cycle, **the metal companies plan to increase capital expenditure by ~70% over next 4 years. We estimate the major metal companies to spend ~US\$8bn capex annually over the next 4 years versus US\$4.6bn spent in the last 4 years**

# Steel sector: Stands to benefit from capacity expansion

Speciality Steel Sector(in '000 Tonnes)

Steel Sector Output(in ₹Cr)

- The projected production of the specialty steel grades is expected to more than double by 2026-27. India steel producers now plan to add ~30 mtpa new capacity in the next 4-5 years to support domestic demand
- Projected export is expected to become more than 3 times the present volume.

## Capital goods: Vocal for local

Capital Goods sector is back to pre-Covid volume levels. After a decade long down cycle, deleveraging focus and capital squeeze, corporate commentary has turned bullish on private capex recovery. Expect double digit volume growth, operating leverage led margin/ RoE improvements starting 2022. Key drivers of future growth:

- **Government thrust in Infra augurs well for Capital Goods**– Assuming India achieves 9.5% nominal GDP growth in FY22 and 10.5% thereafter through FY25, a 6.0% infra spend to GDP would imply ~Rs85tn capex, ~24% below NIP target. Even this outcome implies a healthy 10% CAGR of infra spend on FY19 base
- **India Inc. focusing on local manufacturing** – As manufacturing capacity utilization levels increase, tendering for private sector capex will pick up in 2022. PLI key driver for capex in private sector.
- **Localization push in Defense to continue**
- **More RE post COP26**– In bid to show progress towards India’s 2070 net-zero emissions target, expect clamp down on new coal-based power units. See continued RE push to attain 450GW (500GW incl. large hydro) 2030 target.

GFCF as % of GDP (Source: CMIE)

Mfg. Capacity utilization (%) (Source: RBI)

## Defense and heavy industrial manufacturing: The make in India push

- Government formulated the 'Defense Production and Export Promotion Policy 2020' with an aim to achieve a turnover of Rs. 1 lakh 75 thousand crore (US\$ 25 billion), including an export of Rs. 35 thousand crore (US\$ 5 billion) in the aerospace and defense goods and services by 2025.
- Government of India changed the automatic route limit for FDI limit in defense sector to 74%
- The engineering sector is the largest of the industrial sectors in India. It accounts for 27% of the total factories in the industrial sectors and represents 63% of the overall foreign collaboration

Defence Production in India (US \$ Billion)

Engineering & Capital Goods (US \$ Billion)

## Summary on manufacturing in India

---

- India is expected to be a key candidate to capitalize on becoming new manufacturing location of choice.
- What might work in India's favor is the potential for significant domestic demand, Government's drive to encourage manufacturing and a distinct demographic edge.
- The manufacturing sector could outpace overall GDP growth by approximately 4%, leading to an incremental contribution opportunity of about \$300 - \$500 billion from the manufacturing sector to the economy in 2030. In this scenario, the manufacturing sector's share towards India's GDP in 2030 could potentially reach around 20%.
- India is expected to become key manufacturing hub specially in electronic and automobile manufacturing specially post Production Linked Incentive (PLI) scheme
- Unlike previous scheme the Production Linked Incentive (PLI) scheme is not subsidy but more in the nature of investment with an total outlay of Rs. 2 Tn.
- PLI scheme is alone expected to contribute to one-fifth of the rise of Indian manufacturing sector share in overall GDP in the medium and long term

# Nifty India Manufacturing Index

---

## About Nifty India Manufacturing Index

---

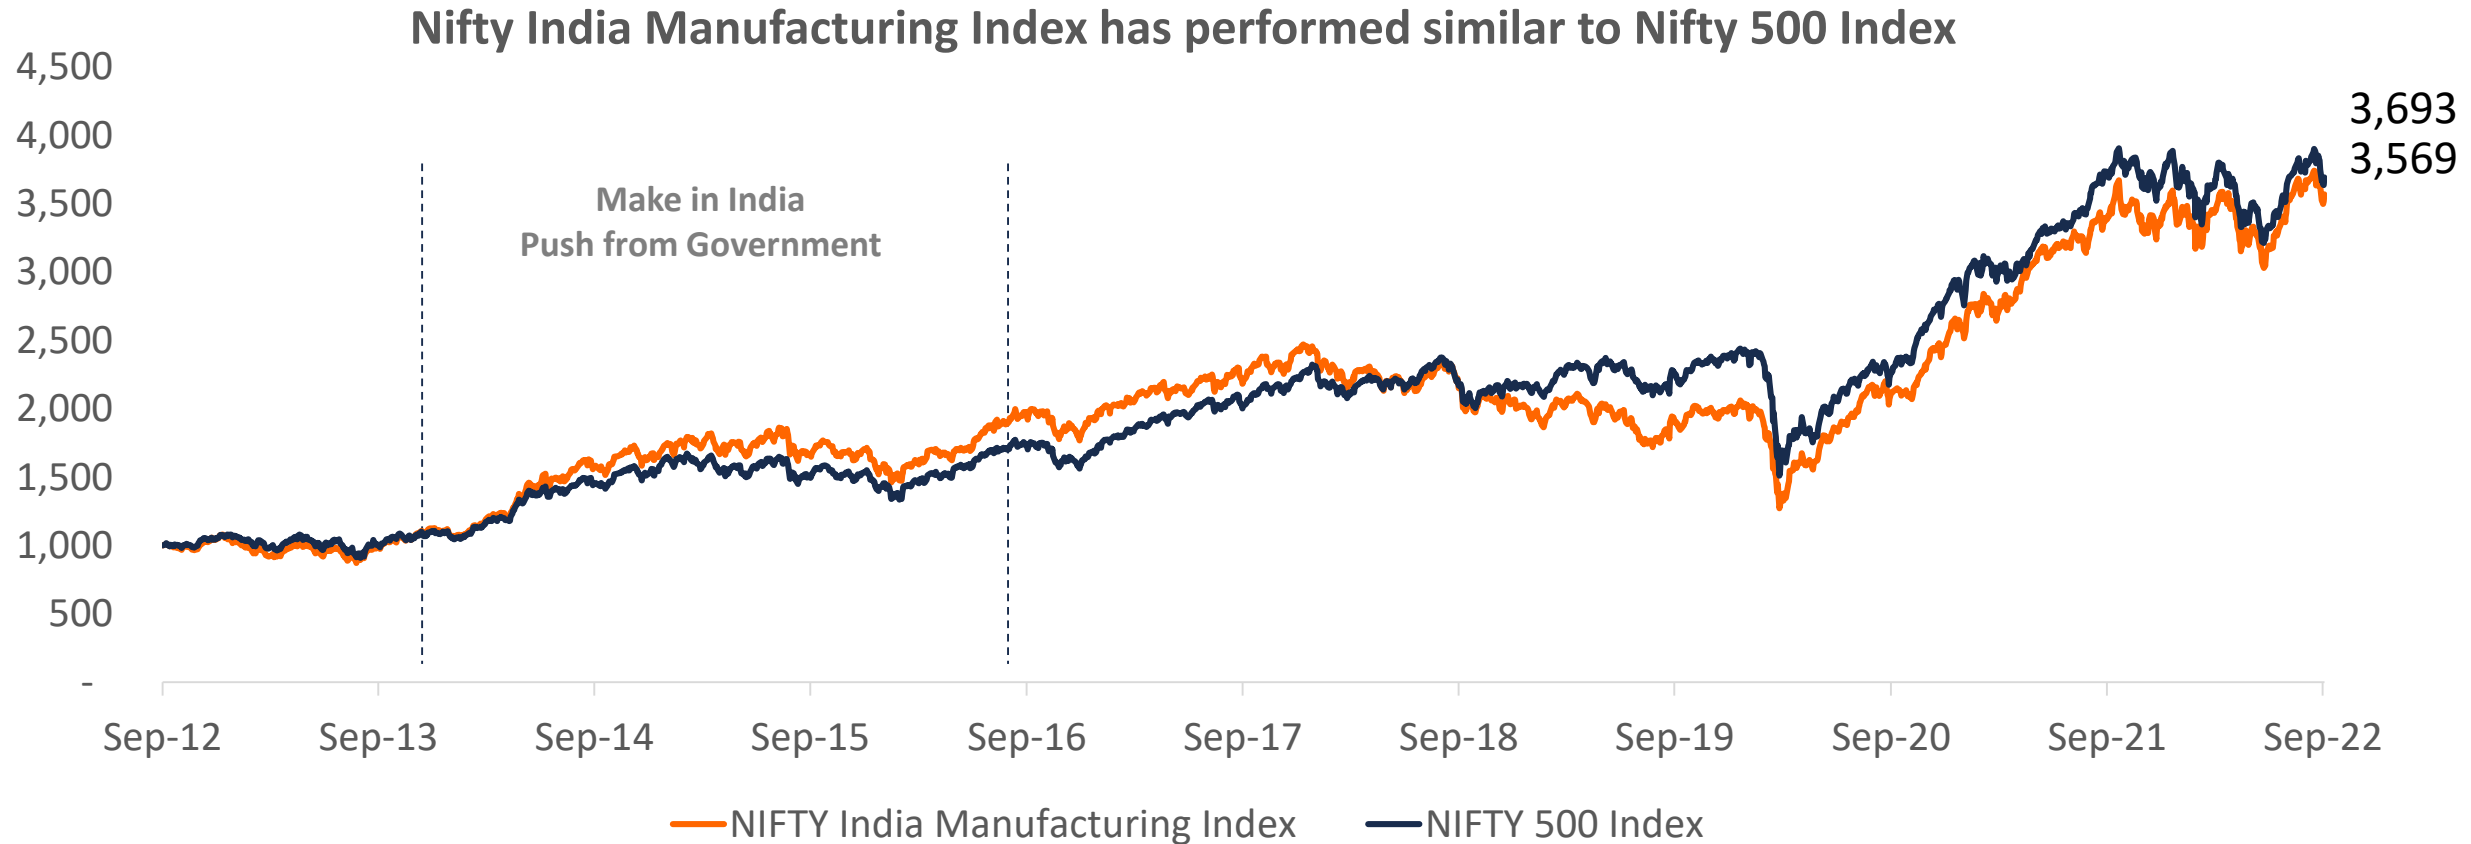

The Nifty India Manufacturing Index aims to track the performance of stocks that represent manufacturing sectors in India.

- Stocks should form part of Nifty 100 Index, Nifty Midcap 150 Index and Nifty Smallcap 50 Index
- Stocks forming part of the eligible shortlisted 'basic industry' based on AMFI classification shall be eligible (*Please refer to the list in annexure*)
- Provides ~75% coverage by Free Float Market Cap of eligible stocks within each eligible basic industry

The weight of each stock in the index is based on its free float market capitalization

- Maximum weight of each stock is capped at 5%
- Minimum weight to certain manufacturing sectors shall be 20% (Industrial Manufacturing & Automobile)
- All the stocks forming part of Nifty100 Index that satisfy the eligibility criteria is compulsory included
- Index is reconstituted and rebalanced semi-annually.

## Nifty India Manufacturing Index has exhibited similar performance vis-à-vis Nifty 500 Index

**Nifty India Manufacturing Index has performed relatively similar without IT and Financial Services and has outperformed Nifty 500 Index during period of economy recovery & Make in India push**

Source: NSE Indices Limited, Data as on Sep 30, 2022, Past performance may or may not sustain in future. The index return are in Total Return Variant. The data shown above pertains to the Index and does not in manner indicate performance of any scheme of the Fund.

## Why Mirae Asset Nifty India Manufacturing ETF and Fund of Fund ?

---

- Aims to provide potential broad exposure to the key manufacturing segments of Indian Economy
- May potentially allow investor to participate in the growth of key manufacturing segments, which are the focus areas of the government through various initiatives like Production Linked Incentive (PLI) Scheme
- Potential benefit from emerging spaces like Electric Vehicles, Defense, Electronics etc.
- Low overlap with NIFTY 50 and majority of active funds will potentially help investor diversify their portfolio.
- Has outperformed NIFTY 50 Index, in last 6 out of 8 calendar years (2014-2021) (Slide 32)
- Provides relatively low cost and rule based investment approach to take exposure in manufacturing theme
