Revenue Split of Nifty IT Index

Indian IT companies derive more than 90% of their revenue from overseas nations

Nifty IT Index - Methodology

Eligibility Criteria for Selection of Constituent Stocks:

Companies should form part of Nifty 500 at the time of review. In case, the number of eligible stocks representing a particular sector within Nifty 500 fall below 10, the deficit number of stocks shall be selected from the universe of stocks ranked within top 800 based on both average daily turnover and average daily full market capitalization based on previous six months period data used for index rebalancing of Nifty 500

Companies should form a part of IT sector

Companies trading frequency should be at least 90% in the last six months and it should have a minimum history of 1 month as on the cutoff date

Final selection of 10 companies shall be done based on the free-float market capitalization. A preference shall be given to companies that are available for trading in NSE's Futures & Options segment at the time of final selection

Weightage of each stock in the index is calculated based on its free-float market capitalization such that no single stock shall be more than 33% and weightage of top 3 stocks cumulatively shall not be more than 62% at the time of rebalancing

Index is re-balanced on semi annual basis. The cut-off date is January 31 and July 31 of each year, i.e For semi-annual review of indices, average data for six months ending the cut-off date is considered. Four weeks prior notice is given to market from the date of change.
