

# Mirae Asset Nifty SDL Jun 2027 Index Fund

(An open-ended target maturity Index Fund investing in the constituents of Nifty SDL Jun 2027 Index. A scheme with relatively high interest rate risk and relatively low credit risk)

---

What is target maturity passive debt product ?

—

# What is passive debt product ?

Passive debt product like Index funds seeks to track an index and the aim of fund manager is to risk replicate the index in order to generate similar risk and return profile.

# What is target maturity debt product ?

Target Maturity Index Funds are passive investments in debt securities that aims to replicate the composition of the underlying index and have a specified maturity date.

**Target Maturity debt funds differentiates itself from open ended normal mutual funds by having a roll down approach with fixed maturity date making potential returns visible for investor**

*\*Please note the predictability of return doesn't imply guaranteed return or protection of principal. Investments are still subject to credit and market risk. Further, returns will be potentially visible only if the investor continues to hold it till the maturity.*

# Comparison of investment opportunity in fixed income products in India

Features	Target Maturity Fund	Open ended Debt Funds	Bank Deposits	Individual Bonds	Tax Free Bonds	Saving Schemes
Predictability of return*	✓		✓	✓	✓	✓
Liquidity	✓	✓				
Defined Maturity	✓		✓	✓	✓	✓
Tax Efficiency-Indexation	✓	✓		✓		
Accessibility	✓	✓	✓		✓	✓
Lock in			✓		✓	✓
Diversification	✓	✓				

**Target Maturity Funds provides features of several traditional fixed income investments**

*\*Please note the predictability of return doesn't imply guaranteed return or protection of principal. Investment are still subject to credit and market risks. Further, returns will be potentially visible only if the investor continues to hold it till the maturity.*

## Target maturity index funds has relatively higher tax-efficiency

Particular	Traditional Investment	Debt Index Funds SDL - 2027	Tax-Free Bonds
Investment Amount (A)	₹ 1,00,000	₹ 1,00,000	₹ 1,00,000
Return/Yield (Assumed)	5.50%	6.53%	5.00%
No. of Indexation	-	6	-
Assumed Inflation	5%	5%	5%
Value on Maturity (B)	₹ 1,30,696	₹ 1,37,201.75	₹ 1,27,628.16
Indexed Cost (C)	-	₹ 1,34,009.56	-
Taxable Amount (B-C)	₹ 30,696.00	₹ 3,192.18	-
Applicable Tax	₹ 9,208.80*	₹ 638.44**	-
Post Tax Value	₹ 1,21,487.20	₹ 1,36,563.31	₹ 1,27,628.16
Post Tax Return/Yield	3.97%	6.43%	5.00%

**Target Maturity debt products tend to generate relatively higher post tax returns vis-à-vis traditional fixed income investment and tax-free bonds**

Investment horizon is assumed to be 6 Years. Pre tax return/yield are as on 04<sup>th</sup> March 2022, For traditional investment horizon SBI domestic term deposit for non senior citizen up to 2 Cr is used. \*Traditional tax rate investment assumed at the marginal rate of 30%. \*\* Long Term capital gain of 20% applied with indexation benefit

The above computation is merely for illustration purpose and please consult your tax advisor for any investment. SDL : State Development Loans

# Why invest in medium term maturity and State Development Loans (SDLs) ?

---

# What are State Development Loans (SDLs) ?

State Development Loans (SDLs) are sovereign securities (bonds) issued by various State Governments to raise funds from the market at market determined rate using auction mechanism.

**Negligible Credit Risk as securities have implicit sovereign guarantee**

**Carries higher yield than G-sec securities**

**All the states are treated similar in terms of credit quality and RBI servicing\***

**Interest rate of SDLs are determined by Auction generally held fortnightly**

**Over the years liquidity in secondary market for SDL has improved**

**SDLs are eligible for SLR and LAF. Further as per CRAR prudential norms, banks are not required to keep any separate capital for investment in SDL**

# SDLs securities carries relatively lower credit risk

Corporate bonds generally carry higher credit risk vis-à-vis SDL.

Carries implicit sovereign guarantee

**Credit Safety Pyramid**

**Among all the fixed investment options available, SDLs and central government dated securities carry the highest credit safety relatively.**

Please note the investment in State Development Loans (SDL) return doesn't imply guaranteed return or protection of principal. Further, AAA, AA and A are long term credit rating of the bond issuers.

# In medium term ( 5- 6 yr.) yield curve appears to be relatively attractive

**G-Sec Curve appears to be steep in short term and medium term.  
Beyond medium term curve tends to flatten out over the longer investment horizon**

Source: FBIL Valuations, Data as on 31<sup>st</sup> December 2021 & 04<sup>th</sup> March 2022, Yields are based on nodal point denoted by FBIL.  
The Yields mentioned are denoted in semi-annual per annum

# SDLs across curve are offering relatively higher spread over G-Sec across tenure

**With relatively higher spread over G-sec SDL's are offering higher yield over the comparable G-Sec**

Source: FBIL Valuations, Data as on 04<sup>th</sup> March 2022, Yields are based on nodal point denoted by FBIL for G-Sec . In case of SDL maximum yield in the last quarter of respective years to maturity is taken to demonstrated the spread. Please note that yields are denoted semi-annual per annum

## Why equal weighing among SDL securities over short term maturities makes sense ?

Maturity Year	Average YTM	Max YTM	Min YTM	Range for YTM	No. of ISIN
2022	4.20%	4.88%	3.16%	1.7%	210
2023	5.09%	5.32%	4.66%	0.7%	291
2024	5.51%	5.61%	5.39%	0.2%	322
2025	6.07%	6.31%	5.85%	0.5%	349
2026	6.29%	6.45%	6.00%	0.4%	336
2027	6.46%	6.68%	6.30%	0.4%	325
2028	6.90%	7.06%	6.79%	0.3%	327
2029	7.00%	7.22%	6.86%	0.4%	326
2030	7.13%	7.22%	7.02%	0.2%	382
2031	7.13%	7.23%	7.01%	0.2%	269

- For shorter maturities, SDL yield across instruments and issuer differs with relatively wide variation.
- As the maturity increases the yields difference among issuers and instruments relatively reduces resulting in SDL being traded across similar yields for different issuers.
- This makes a good case for having greater number of issuers in portfolio and relatively equal weighing.

**Since SDL yields across instruments and different issuers tends to trade at relatively similar level, an equal weighted portfolio may seem to be a good investment opportunity**

## Mirae Asset Debt Outlook

---

- Inflation though elevated but remains in RBI comfort zone. While there are concerns, in the next round of economic expansions may lead to greater pass through of higher input costs by manufacturing sector.
- Banking system liquidity well in surplus mode, however, the expectations are for gradual normalization of liquidity in H1 of 2022.
- Expect a flattening of yield curve with short term rates moving up more than long term rates
- Mid and long term yields gradually moved up over the course of the year owing to stable macroeconomics and US Treasury
- Uptick in longer end may seem to be comparatively lower than mid and short end.
- As the yields have compressed across the curve, short to medium term is the maturity on curve where compression has not been high and hence it remain the recommended spot.
- Attention last month shifted from COVID-19 to escalated geopolitical tensions between Russia and Ukraine. Apart from the human life damage, there are concerns that rising tension could spark global supply chain disruption resulting in rising input costs dampening investor's appetite for emerging market bonds

# Nifty SDL Jun 2027 Index

---

## About the index

---

Nifty SDL Jun 2027 Index seeks to measure the performance of portfolio of 20 State Development Loans (SDLs) maturing during the twelve month period ending June 15, 2027.

- Twenty (20) states/UTs are selected based on their highest outstanding amount as on January 31, 2022 maturing during the twelve month period ending June 15, 2027
- Each state/UT that is part of the index is given equal weight as on the base date of the index.
- Index will be reviewed and rebalanced at the end of each calendar quarter.
- During the quarterly review if there is an eligible SDL available with a longer maturity of the same state/UT, the existing SDL of that state/UT will be replaced by the available longer maturity SDL
- Proceeds from the maturity of SDL but before the maturity of the index will be re-invested in remaining SDL, followed by T-Bills and finally shall be re-invested in TREPS for subsequent days till the maturity of the index
- The index is computed using the total return methodology including price return and coupon return.

Source: NSE Indices Limited, Portfolio as on 04<sup>th</sup> March 2022, Yields are denoted in semi-annual per annum. Past performance may or may not sustain in future. The data shown above pertains to the Index and does not in manner indicate performance of any scheme of the Fund.

## How the fund will work ?

**The Fund will replicate the index using risk/replication strategy in which it will match the duration and other risk parameter as per SEBI guidelines**

Source: Under risk replication the fund manager aims to keep the duration of the fund within stated range by buying the securities first available in the index. However in case of non-availability of security in the index, the fund manager may buy similar risk profile matching other securities.

## Comparable indices maturing in between June 2026 to June 2027

Name of Nifty Indices	Average YTM	Average Duration	Average Maturity
NIFTY SDL Plus PSU Bond Sep 2026 60:40	6.22%	4.25	3.66
NIFTY PSU Bond Plus SDL Apr 2027 50:50*	6.48%	4.99	4.20
Nifty SDL April 2027 Index	6.39%	4.75	4.05
Nifty SDL Jun 2027 Index	6.53%	-	-
Nifty SDL Apr 2027 Top 12 Equal Weight Index	6.48%	5.07	4.2

**Nifty SDL Jun 2027 Index potentially offers the highest indicative yield among various other similar maturities indices**

# Why invest in Mirae Asset Nifty SDL Jun 2027 Maturity Index Fund ?

---

- A fixed maturity index fund which provides portfolio visibility and reasonably predictable returns at maturity at relatively low cost
- Negligible credit risk as fund seeks to invest in only SDL securities with fund manager seeking to replicate the duration risk and yield profile of the index.
- No lock-in like Fixed Maturity Plans (FMP). Investor has the option to subscribe or redeem anytime during the lifecycle of the fund
- Tax efficient compared to traditional investment avenues. LTCG is taxed at 20% post indexation benefit\*
- Potential to avail 6 indexation benefit depending upon the investors holding period
- Relatively attractive yields with SDL securities currently at relatively higher spread over G-Sec in medium term maturities making it relatively attractive with lower credit risk than comparable corporate bonds.

\* Please consult your tax advisor for any taxation impact on your investment

## Scheme Details
