An open-ended fund of fund scheme predominantly investing in Mirae Asset Nifty 100 ESG Sector Leaders ETF
(Formerly known as Mirae Asset ESG Sector Leaders Fund of Fund)

What is ESG?

Investment philosophy is changing

This is how it used to happen

Traditional Investing

Analysis based on financial parameters

Focus on profitability

This is where it is shifting to

Sustainable Investing

Analysis based on financial parameters

+
Focus on Environmental, Social and Governance

Focus on profitability

+
Sustainable business model

Increasing stakeholder activism and globalization is shifting company and investor focus towards sustainable growth and development.

Sustainable Investing: Invest in companies with sustainable business models

Sustainable Investing incorporates Environmental, Social and Governance (ESG) factors into investment decisions as a mean to contribute towards the sustainable development of the community, better manage company specific risk and potentially enhance long-term returns.

**Sustainable Investing also includes positive/best-in-class screening, norm-based screening, corporate engagement and shareholder action etc.*

Focus now on how money is made: Integrate ESG in ethos of the company

How company makes money

How much money company makes

Focus on ESG factors: Increasing importance of non-financial parameters

Focus now on environmental, social and governance (ESG) factors to make companies grow sustainably with positive impact on internal and external stakeholders.

Companies facing increased exposure to ESG factors

Environmental

Rise in Air Pollution

Deforestation and Mining

Water Contamination

Climate Change

Waste Management

Social

Increasing labor strike

Sexual Harassment

Affordable Housing Scheme

Data Privacy

Eco - friendly product

Governance

Increasing regulatory issues

Whistleblower complaints

Money laundering & corruption

Rise in financial frauds

Resignation of Independent Directors

ESG Trend Analysis

2015

1 5

- Interstate conflict
- Extreme weather events (ESG)
- Failure of national governance
- State collapse/crisis
- Unemployment/underemployment

ESG Impact

- Minimal integration in investment decisions.
- Limited ESG reporting, mostly voluntary.

2017

3 5

- Extreme weather events (ESG)
- Large-scale involuntary migration
- Major natural disasters (ESG)
- Terrorist attacks
- Massive incident of data fraud/theft (ESG: Social)

ESG Impact

- Early adopters began ESG reporting.
- Investors started considering ESG risks.

2019

4 5

- Extreme weather events (ESG)
- Failure of climate change mitigation (ESG)
- Natural disasters (ESG)
- Data fraud/theft (ESG: Social)
- Cyber-attacks

ESG Impact

- Investors began demanding ESG disclosures.
- Companies faced reputational risks from environmental and social controversies.

2021

4 5

- Infectious diseases
- Climate action failure (ESG)
- Extreme weather events (ESG)
- Human environmental damage (ESG)
- Biodiversity loss (ESG)

ESG Impact

- Surge in ESG fund launches and investments.
- Companies with strong ESG practices showed resilience during the pandemic.

2023

4 5

- Cost of living crisis (ESG: Social)
- Natural disasters and extreme weather events (ESG)
- Geoeconomic confrontation
- Failure to mitigate climate change (ESG)
- Erosion of social cohesion and societal polarization (ESG: Social)

ESG Impact

- ESG scores influenced access to capital and insurance.
- Companies faced penalties for greenwashing and poor disclosures.

2025

3 5

- Extreme weather events (ESG)
- AI-generated misinformation
- Societal/political polarization (ESG: Social)
- Cost-of-living crisis (ESG: Social)
- Cybersecurity failures

ESG Impact

- Companies with strong ESG performance access global capital, enjoy lower cost of borrowing, and command higher valuations.
- Poor ESG performers face regulatory action, investor exits, and reputational damage.

Future Outlook : ESG in India and Globally

World Map: ESG Regulatory Intensity by Region

Objective: Illustrate the varying levels of ESG regulatory enforcement across key regions.

Europe: **Dark Orange** – High regulatory intensity. Despite some rollbacks, the EU maintains robust ESG frameworks like the Corporate Sustainability Reporting Directive (CSRD) and the upcoming Corporate Sustainability Due Diligence Directive.

Asia (India): Medium Orange – Strengthening regulations. SEBI's phased implementation of ESG disclosures and introduction of Green Credit mechanisms signify progressive steps.

United States: **Light Orange** – Regulatory retreat. Under the Trump administration, there's a notable pullback from ESG commitments, with major firms reducing support for ESG proposals.

Timeline: SEBI ESG Regulatory Milestones (2024–2025)

Objective: Provide a chronological overview of SEBI's ESG regulatory developments.

Mandatory ESG disclosures for top 250 listed entities.
FY 2024-2025

Extension of ESG disclosures to top 500 entities; mandatory value chain disclosures deferred to this period.
FY 2025-2026

April 2024

SEBI introduces Green Credit disclosures under BRSR.

April 2025

Guidelines issued for withdrawing ESG ratings under specific conditions.

Companies and investors both are flocking for sustainable investments

Source: US SIF 2024 Trends Report, KPMG Survey of Sustainability Reporting 2024, SEBI BRSR Reporting, G&A Institute 2024 Research, SGX ESG Reporting, RIAA Responsible Investment Benchmark Report 2024. Data as on 30th April, 2025. This is the latest available data.

Renewable Energy Growth

Record Renewable Energy Growth

- India's installed renewable energy capacity reached 220.10 GW as of March 31, 2025, up from 198.75 GW in FY 2023-24, marking a 15.8% year-on-year growth.
- Solar energy led the expansion with 23.83 GW added in FY 2024-25, raising total solar capacity to 105.65 GW (47% of total RE capacity). Wind capacity also grew steadily, reaching 50 GW, supported by policy reforms and domestic manufacturing incentives.
- The renewable energy pipeline includes over 169 GW of projects under implementation and 65 GW tendered, including emerging technologies like hybrid and round-the-clock power systems.

National Green Hydrogen Mission

- The Government allocated Rs. 19,744 crore (approx. \$2.5 billion) up to 2029-30 to develop India as a global hub for green hydrogen production and export.
- Targets include producing 5 million metric tonnes (MMT) of green hydrogen annually by 2030, supported by 125 GW (Forecast) of renewable capacity addition.
- Expected forecasted outcomes: over 6 lakh jobs created, fossil fuel import reduction worth Rs. 1 lakh crore, and abatement of nearly 50 MMT CO₂ emissions annually.
- Green hydrogen is positioned as a key solution for decarbonizing hard-to-abate sectors like steel, refining, and transport.

National Infrastructure Pipeline (NIP) and ESG Implications

- India's NIP aims to invest over Rs. 111 lakh crore (~\$1.4 trillion) in infrastructure projects by 2025-26, with a strong focus on sustainable and climate-resilient development.
- ESG considerations are increasingly integrated into project appraisal and financing, emphasizing renewable energy, green transport, water management, and waste reduction.
- The NIP supports India's commitments to net-zero emissions by 2070 (Forecast) and aligns with global climate goals, enhancing investor confidence and enabling access to green finance.

Does ESG create value for investor?

Not just risk avoidance: ESG creates positive impact on companies

Sustainable business model with ESG focus can give quick access and approval in domestic and foreign market, leading to growth in top line.

Strong ESG can lead to effective utilization of resource leading to cost saving.

Reduce regulatory and government intervention and increased support.

Retain, attract and motivate employees which may uplift their productivity.

Improve brand image and retain and attract customers.

By allocating capital to more promising & sustainable business, an organization can enhance project return.

ESG focused companies aims to create more wealth for Investor

Better Risk Management & Lower Volatility

Example: HDFC Bank integrates strong governance and social initiatives such as financial inclusion and carbon emission reduction targets (it is forecasted 30-35% by 2030). This reduces regulatory, reputational, and operational risks, resulting in more stable stock performance and lower volatility for investors.

Access to Growth in Emerging Sustainable Sectors

Example: Reliance Industries is building India's largest Green Energy Giga Complex, targeting 20 GW solar module capacity by 2025. This expansion in renewable energy and green hydrogen aligns with India's clean energy transition and fuels long-term growth.

Attraction of International & Domestic ESG Capital

Example: ICICI Bank raised \$500 million via sustainable bonds and allocated ₹194 billion in green loans under its ESG lending framework. Strong sustainability disclosures make it a preferred choice for global ESG-focused investors.

Regulatory Compliance Leading to Competitive Advantage

Example: TCS's robust ESG disclosures and governance practices comply with SEBI's BRSR mandates, giving it an edge in regulatory approvals and investor confidence. This reduces compliance costs and risks, supporting sustainable profitability and growth.

Benefit of ESG Investing: Get ready for the future

Sustainable investing aims to generate long term wealth along with positive impact on the society.

Mirae Asset ESG Sector Leaders offerings

A product created with expertise of multiple specialized entities.

ESG Research

Research analysis by Sustainalytics, one of the leading global ESG research provider.

Index Research

NSE has created NIFTY 100 ESG Sector Leaders Index with robust methodology and more ESG focused portfolio.

ETF Construction

With an aim to bring innovative ETF offering which may create long-term wealth, Mirae Asset Mutual Fund collaborated for product development.

About NIFTY 100 ESG Sector Leaders Index

The scheme will aim to track the performance of NIFTY 100 ESG Sector Leaders Index.

New Index by NSE which incorporates the latest research methodology by Sustainalytics, one of the global leaders in ESG research.

Index comprises of companies which have scored well on management of Environmental, Social and Governance (ESG) Factors.

Avoid taking exposure into companies engaged in the business of tobacco, gambling, alcohol and controversial weapon.

Avoid Investments in companies with controversies on E, S and G pillar.

Compared against the best of the world.

Aims to generate similar sector exposure as NIFTY100 index with investment only in companies with leading ESG practices.

How is ESG Integrated in this product?

Each company is assessed on E,S and G factors relevant to its industry and itself.
Companies are also assessed for any controversy and product involvement.

How is NIFTY100 ESG Sector Leaders Index constructed?

A robust new methodology results in creation of portfolio with companies having superior ESG performance, no major controversy and no involvement in questionable businesses*.

Source: NSE Indices Limited, * - The ESG scoring and controversy assessment methodology was earlier provided by Sustainalytics, then by Stakeholder Empowerment Services, and is now based on the framework developed by NSE Sustainability Ratings & Analytics
