Money market instruments and/or units of debt/liquid schemes of domestic Mutual Funds*	0	5

*Money Market Instruments will include only treasury bills and government securities having a residual maturity upto one year, Tri-party Repo on government securities or T-bills and any other like instruments as specified by the Reserve Bank of India from time to time.

During normal circumstances, the Scheme's exposure to money market instruments will be in line with the asset allocation table. However, in case of maturity of G-Secs in the Scheme portfolio, the reinvestment will be in line with the index methodology.

The scheme will not participate in repo in corporate debt. The scheme will neither make any investment in ADR/ GDR/ Foreign Securities/ Securitized Debt nor will it engage in short selling and securities lending. Further, it shall not take any exposure in derivative instruments. The scheme does not intend to invest into any credit default swaps. The scheme shall not invest in instruments having Special Features as defined in Clause of 12.2 of SEBI Master Circular dated June 27, 2024.

The cumulative gross exposure through Government securities and Money Market instruments / debt securities, Instruments and/or units of debt/liquid schemes of domestic Mutual Funds shall not exceed 100% of the net assets of the scheme or guidelines as may be specified by SEBI from time to time.

#Pursuant to Clause 3.5 SEBI Master Circular dated June 27, 2024 on development of passive funds, replication of the Index by the Scheme shall be as follows:

The Scheme shall be considered to be replicating the underlying index, provided:

- i. The duration of the portfolio of Scheme replicates the duration of the underlying index within a maximum permissible deviation of +/- 10%.
- ii. The following norms for permissible deviation in duration shall apply:
 - a. Either +/- 6 months or +/- 10% of duration, whichever is higher.
 - b. However, at no point of time, the residual maturity of any security forming part of the portfolio shall be beyond the target maturity date of the Scheme.

In accordance with Clause 3.4 of SEBI Master Circular dated June 27, 2024, the underlying index shall comply with the portfolio concentration norms as prescribed.

Debt securities include, but are not limited to, Debt securities of the Government of India, State and Local Governments, Government Agencies, Statutory Bodies, Public Sector Undertakings, Public Sector Banks or Private Sector Banks or any other Banks, Financial Institutions, Development Financial Institutions, and Corporate Entities, collateralized debt securities or any other instruments as may be prevailing and permissible under the Regulations from time to time).

The Debt Securities (including money market instruments) referred to above could be fixed rate or floating rate, listed, unlisted, privately placed, unrated among others, as permitted by regulation.

Further, the Scheme may, for meeting liquidity requirements invest in units of money market/liquid schemes of Mirae Asset Mutual Fund and/or any other mutual fund provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund in accordance with Clause 4 of Seventh Schedule of SEBI (Mutual Funds) Regulations, 1996. The AMC shall not charge any investment management fees with respect to such investment.

The Scheme does not intend to undertake/ invest/ engage in

- Derivatives;
- Short selling of securities;
- Unrated instruments (except TREPs/ Government Securities/ SDL / Repo in Government Securities);
- Foreign securities/ADR/GDR;
- Securitised debts;
- Fund of Fund Schemes;
- Instruments having Special Features as defined in Clause of 12.2 of SEBI Master Circular dated June 27, 2024;

Rebalancing Period:

For rebalancing the portfolio of the Scheme, the following norms shall apply:

- a) In case of change in constituents of the index due to periodic review, the portfolio of Scheme will be rebalanced within 7 calendar days.
- b) In case the rating of any security is downgraded to below the rating mandated in the index methodology (including downgrade to below investment grade), the portfolio be rebalanced within 30 calendar days.

c) In case the rating of any security is downgraded to below investment grade, the said security may be segregated in accordance with in accordance with clause 4.4.4 and 4.4.5 of SEBI Master Circular dated June 27, 2024 on “Creation of segregated portfolio in mutual fund schemes”.

The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible.

The annualized tracking difference averaged over one year period shall not exceed 1.25%. In case the average annualized tracking difference over one year period is higher than 1.25%, the same shall be brought to the notice of trustees with corrective actions taken by the AMC, if any.

Rebalancing of deviation due to short term defensive consideration

In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will rebalance the same within 7 days. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. Any alteration in the investment pattern will be for short-term defensive consideration as per Clause 1.14.1.2 of SEBI Master Circular dated June 27, 2024, the intention being at all times to protect the interests of the Unit Holders.

Change in Asset Allocation:

The above mentioned investment pattern is indicative and subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may vary from time to time, on account of receipt of maturity proceeds, interest and/or receipt of subscription. As per clause 3.5.3.11 of SEBI Master Circular dated June 27, 2024 the Fund Manager, may deviate from the above investment pattern for short term period on defensive considerations. The same will be rebalanced within 7 Business Days and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time.

Maturity Date of the Scheme:

The Scheme will mature on April 29, 2033. If such a Maturity Date is a non-Business Day, the subsequent Business Day shall be considered as the Maturity Date for the Scheme.

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weights as the securities have in the Underlying Index. However, deviations from the stated index replication may occur due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, delay in purchase or non-availability of underlying securities forming part of the index etc. The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or non- availability of securities which are part of the Index
- Delay in liquidation of bonds which have been removed by the Index
- Due to timing of transactions either on RFQ platforms or in open market
- Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPs
- Due to over-weight / under-weight investment in bonds of issuers at ISIN level which are part of the Index
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.

- Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, or corporate actions or otherwise
- Fees and expenses of the Scheme.
- The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities.
- Interest/Payout of Income Distribution cum capital withdrawal Option.
- Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.

While the intent of the scheme is to track the performance of the underlying index by investing in the bond forming part of the index, due to issues pertaining to liquidity of the debt market in India, the SEBI has prescribed guidelines within which the passive scheme may manage the allocation in the bonds and issuers which may or may not form part of the index, with same or different weightages, in order to decrease the risk replication of the underlying index within the allowed range. This will result in fund portfolio different from the index portfolio with difference in the performance and volatility of the scheme.

B. WHERE WILL THE SCHEME INVEST?

Investment in Government Securities (G-Sec): The Scheme would invest in G-Sec comprising part of CRSIL IBX Gilt Index – April 2033.

Investment in money market instruments: The Scheme may also invest in money market instruments, in compliance with Regulations. Money Market Instruments will include only treasury bills and government securities having a residual maturity up to one year, Tri-party Repo on government securities or T-bills and any other like instruments as specified by the Reserve Bank of India from time to time. The Scheme will not invest in Commercial Paper, Certificate of Deposits, Bill – rediscounting (BRDS).

Detailed definition and applicable regulations/guidelines for each instrument shall be included in Section II.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The AMC uses a “passive” approach to try and achieve Scheme’s investment objective. Unlike other Fund, the Scheme does not try to “beat” the markets. The AMC does not make any judgments about the investment merit of a particular instrument or a particular industry segment nor will it attempt to apply any economic, financial or market analysis.

Subject to the Regulations and the applicable guidelines the Scheme may invest in the schemes of Mutual Funds. The investment strategy shall be in line with the asset allocation mentioned under “Section II (c): How will the Scheme allocate its assets”.

Though every endeavor will be made to achieve the objective of the Scheme, the AMC/Sponsors/Trustee does not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

#Pursuant to Clause 3.5 of SEBI Master Circular dated June 27, 2024, replication of the Index by the Scheme shall be as follows:

The Scheme shall be considered to be replicating the underlying index, provided:

- The duration of the portfolio of Scheme replicates the duration of the underlying index within a maximum permissible deviation of +/- 10%.
- The following norms for permissible deviation in duration shall apply:
 - Either +/- 6 months or +/- 10% of duration, whichever is higher.
 - However, at no point of time, the residual maturity of any security forming part of the portfolio shall be beyond the target maturity date of the Scheme.

During normal circumstances, the Scheme's exposure to money market instruments will be in line with the asset allocation table. However, in case of maturity of G-Secs in the Scheme portfolio, the reinvestment will be in line with the index methodology.

RISK CONTROL

Investments made by the Scheme would be in accordance with the investment objective of the Scheme and provisions of SEBI Regulations.

Since investing requires disciplined risk management, the AMC has adequate safeguards for controlling risk in the portfolio construction process. The risk control process involves reducing risk through portfolio diversification wherever possible, taking care however not to dilute the returns in the process. It is the belief of the AMC that the diversification would help to achieve desired level of consistency in returns.

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weights as the securities have in the Underlying Index. However, deviations from the stated index replication may occur due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, delay in purchase or non-availability of underlying securities forming part of the index etc. The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or non-availability of securities which are part of the Index
- Due to timing of transactions either on RFQ platforms or in open market
- Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPs
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying securities by the Index Provider and AMC's valuation providers.
- Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, or corporate actions or otherwise
- Fees and expenses of the Scheme.
- The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities.
- Interest/Payout of Income Distribution cum capital withdrawal Option.
- Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.

While the intent of the scheme is to track the performance of the underlying index by investing in the securities forming part of the index, due to issues pertaining to liquidity of the debt market in India, the SEBI has prescribed guidelines within which the passive scheme may manage the allocation in the securities which may or may not form part of the index, with same or different weightages, in order to decrease the risk replication of the underlying index within the allowed range. This will result in fund portfolio different from the index portfolio with difference in the performance and volatility of the scheme.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the scheme will be benchmarked to the CRISIL IBX Gilt Index – April 2033.

Rationale for adoption of benchmark:

The Trustees have adopted CRISIL IBX Gilt Index – April 2033 as the benchmark for the scheme.

The benchmark has been chosen as the Scheme will invest in securities which are constituents of CRISIL IBX Gilt Index – April 2033. Thus, the composition of the aforesaid benchmark is such that it is most suited for comparing the performance of the Scheme.

* from inception (20-Oct-22 to 31-Mar-3)

Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments.

As per the SEBI standards for performance reporting, the returns are calculated at allotment NAV. For this purpose, the inception date is deemed to be the date of allotment. The calculations of returns shall assume reinvestment of all payouts at the then prevailing NAV. The absolute graph of is computed from the Date of Allotment/1st April, as the case maybe, to 31st March of the respective financial year.

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under the Options there under can be calculated as shown below:

(Market or Fair Value of Scheme's investments + Current assets including Accrued Income - Current Liabilities and provisions including accrued expenses)

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments + Current assets including Accrued Income - Current Liabilities and provisions including accrued expenses}}{\text{No. of Units outstanding under the Scheme/Option.}}$$

The NAV, the sale and repurchase prices of the Units will be calculated and announced at the close of each working day. The NAVs of the Scheme will be computed and units will be allotted upto 4 decimals.

Computation of NAV will be done after taking into account Income Distribution Cum Capital Withdrawal paid, if any, and the distribution tax thereon, if applicable.

The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Illustration on Computation of NAV:

If the net assets of the Scheme are Rs. 10,65,44,345.34 and units outstanding are 1,00,00,000 then the NAV per unit will be computed as follows:

$$10,65,44,345.34 / 1,00,00,000 = \text{Rs. } 10.6544 \text{ p.u. (rounded off to four decimals)}$$

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

- **Ongoing Price for subscription (purchase)/ switch-in (from other schemes/ plans of the mutual fund) by investors. (This is the price you need to pay for purchase/ switch-in):**

The Sale Price for a valid purchase will be the Applicable NAV.

i.e. Sale Price = Applicable NAV

For a valid purchase request of Rs. 10,000 where the applicable NAV is Rs. 11.1234, the units allotted will be:

$$= \frac{10,000 \text{ (i.e. purchase amount)}}{11.1234 \text{ (i.e. applicable NAV)}}$$

$$= 899.0060 \text{ units (rounded to four decimals)}$$

Transaction charges and other charges/expenses, if any, borne by the investors have not been considered in the above illustration.

- **Ongoing Price for redemption (sale)/ switch-outs (to other schemes/plans of the mutual fund) by investors. (This is the price you will receive for redemptions/ switch-outs):**

The Repurchase Price for a valid repurchase will be the applicable NAV reduced by any exit load (say 1%).
i.e. applicable NAV - (applicable NAV X applicable exit load).

For a valid repurchase request where the applicable NAV is Rs. 12.1234, the repurchase price will be:

$$= 12.1234 - (12.1234 \times 1.00\%)$$

$$= 12.1234 - 0.1212$$

$$= \text{Rs. } 12.0022$$

Therefore, for a repurchase of 899.006 units, the proceeds received by the investor will be -

$$= 899.006 \text{ (units)} \times 12.0022 \text{ (Repurchase price)}$$

$$= \text{Rs. } 10,790.0490 \text{ (rounded to four decimals)}$$

Transaction charges and other charges/expenses, if any, borne by the investors have not been considered in the above illustration.

The Mutual Fund may charge the load within the stipulated limit of 5% and without any discrimination to any specific group. The Repurchase Price however, will not be lower than 95% of the NAV.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. Details of source for meeting these expenses may be disclosed. NFO expenses were borne by the AMC. No NFO expenses were charged to the Scheme.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the Scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated the following recurring expenses, as detailed in table related to maximum permissible expense below. The expenses are estimated have been made in good faith as per the information available to the AMC based on past experience and are subject to change inter se. The purpose of the below table is to assist the investor in understanding the various costs and expenses that an investor in the scheme will bear directly or indirectly.

The recurring expenses of operating the Scheme on an annual basis, which shall be charged to the Scheme, are estimated to be as follows (each as a percentage per annum of the daily net assets)

Particulars	% p.a. of daily net assets
Investment Management & Advisory Fee	Upto 1.00%
Trustee fee	
Audit fees	
Custodian fees	
RTA Fees	
Marketing & Selling expense incl. agent commission**	
Cost related to investor communications	
Cost of fund transfer from location to location	
Cost of providing account statements and redemption cheques and IDCW warrants	
Costs of statutory Advertisements	
Cost towards investor education & awareness (1 bps)	
Brokerage & transaction cost over and above 12 bps for cash market transactions	
GST on expenses other than investment and advisory fees	
GST on brokerage and transaction cost	
Other Expenses*	
Maximum total expense ratio (TER) permissible under Regulation 52 (6) (c) (i) and (6) (a)	Upto 1.00%
[^] Additional expenses under regulation 52 (6A) (c) Upto 0.05%	Upto 0.05%
Additional expenses for gross new inflows from specified cities***	Upto 0.30%

*Other expenses: Any other expenses which are directly attributable to the Scheme, may be charged with approval of the Trustee within the overall limits as specified in the Regulations except those expenses which are specifically prohibited.

[^] In terms of Clause 10.1.7 of SEBI Master Circular dated June 27, 2024, in case exit load is not levied / not applicable, the AMC shall not charge the said additional expenses.

For the actual current expenses being charged, the investor should refer to the website of the Mutual Fund.

The purpose of the above table is to assist the investor in understanding the various costs & expenses that the investor in the Scheme will bear directly or indirectly. These estimates have been made in good faith as per the information available to the AMC and the above expenses (including investment management and advisory fees) are subject to inter-se change and may increase/decrease as per actual and/or any change in the Regulations, as amended from time to time.

All scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of the Asset Management Companies (AMC), its associate, sponsor, trustee or any other entity through any route.

All fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a regular plan.

******The TER of the Direct Plan will be lower to the extent of the distribution expenses/commission which is charged in the Regular Plan and no commission for distribution of Units will be paid / charged under the Direct Plan.

In addition to the limits as specified in Regulation 52(6) of SEBI (Mutual Funds) Regulations 1996 [‘SEBI Regulations’] or the Total Recurring Expenses (Total Expense Limit) as specified above, the following costs or expenses may be charged to the scheme namely:-

Additional expenses for gross new inflows from specified cities:

(a) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by SEBI from time to time are at least -

(i) 30 per cent of gross new inflows in the scheme, or;

(ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the Scheme shall be charged on proportionate basis.

Provided further that, expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities.

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the Scheme in case the said inflows are redeemed within a period of one year from the date of investment.

Currently, SEBI has specified that the above additional expenses may be charged for inflows from beyond ‘Top 30 cities.’ The top 30 cities shall mean top 30 cities based on Association of Mutual Funds in India (AMFI) data on ‘AUM by Geography – Consolidated Data for Mutual Fund Industry’ as at the end of the previous financial year.

Provided further that, additional TER can be charged based on inflows only from retail investors from B30 cities in terms of clause 10.1 of SEBI Master circular dated June 27, 2024.

‘Retail investors’ are defined as individual investors with an inflow of an amount upto Rs 2,00,000/- per transaction.

******* Note: SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023 and AMFI letter dated No. 35P/ MEM-COR/ 85/ 2022-23 dated March 02, 2023 has directed AMC’s to keep B-30 incentive structure in abeyance with effect from March 01, 2023 till further notice.

(b) GST payable on investment and advisory service fees (‘AMC fees’) charged by Mirae Asset Investment Managers (India) Private Limited (‘Mirae Asset AMC’);

Within the Total Expense Limit chargeable to the Scheme, following will be charged to the Scheme:

(a) GST on other than investment and advisory fees, if any, (including on brokerage and transaction costs on execution of trades) shall be borne by the Scheme;

(b) Investor education and awareness initiative fees of 1 basis points on daily net assets of respective Scheme.

(c) Brokerage and transaction cost incurred for the purpose of execution shall be charged to the schemes (a) up to 12 bps and 5 bps for cash market transactions and derivatives transactions respectively. Any payment towards brokerage & transaction costs, over and above the said 12 bps and 5 bps for cash market transactions and derivatives transactions respectively may be charged to the Scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations, 1996

The current expense ratios will be updated on the AMC website <https://miraeassetmf.co.in/downloads/regulatory> at least 3 working days prior to the effective date of the change.

Further, the notice of change in base TER (i.e. TER excluding additional expenses provided in Regulation 52(6A) (b) and 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996) in comparison to previous base TER charged to the scheme will be communicated to investors of the scheme through notice via email or SMS at least three working days prior to effecting such change.

However, any decrease in TER due to decrease in applicable limits as prescribed in Regulation 52 (6) (i.e. due to increase in daily net assets of the scheme) would not require issuance of any prior notice to the investors. Further, such decrease in TER will be immediately communicated to investors of the scheme through email or SMS and uploaded on the AMC website.

The above change in the base TER in comparison to previous base TER charged to the scheme shall be intimated to the Board of Directors of AMC along with the rationale recorded in writing.

The changes in TER shall also be placed before the Trustees on quarterly basis along with rationale for such changes.

Net 1 Year Return	$D/A - 1$	7.95%

The above calculation is provided to illustrate the impact of expenses on the scheme returns and should not be construed as indicative Expense Ratio, yield or return.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (<https://www.miraeassetmf.co.in/>) or may call at '1800 2090 777' or your distributor.

Type of Load	Load chargeable (as %age of NAV)
Exit	Nil

For any change in load structure AMC will issue an addendum and display it on the website/Investor Service Centres.

No Exit Load shall be levied in case of switch transactions from Regular Plan to Direct Plan

As per clause 10.6 of SEBI Master Circular dated June 27, 2024, no load would be charged on Bonus units.

The Mutual Fund may charge the load within the stipulated limit of 5% and without any discrimination to any specific group. The Repurchase Price however, will not be lower than 95% of the NAV.

The exit load charged if any shall be credited to the scheme.

The Trustee reserves the right to modify/alter the load structure and may decide to charge an exit load on the Units with prospective effect, subject to the maximum limits as prescribed under the SEBI Regulations. At the time of changing the load structure, the AMC shall take the following steps:

- Arrangements shall be made to display the changes/modifications in the SID in the form of a notice in all the Mirae Asset ISCs' and distributors' offices and on the website of the AMC.
- The notice-cum-addendum detailing the changes shall be attached to SIDs and Key Information Memoranda. The addendum will be circulated to all the distributors so that the same can be attached to all SIDs and Key Information Memoranda already in stock.
- The introduction of the exit load along with the details shall be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load.
- Any other measures which the mutual funds may feel necessary.

The AMC may change the load from time to time and in case of an exit/repurchase load this may be linked to the period of holding. It may be noted that any such change in the load structure shall be applicable on prospective investment only. The exit load (net off GST, if any, payable in respect of the same) shall be credited to the Scheme of the Fund.

The distributors should disclose all the commissions (in the form of trail commission or any other mode) payable to them for the different competing schemes of various mutual funds from amongst which the scheme is being recommended to the investor.

Section II

I. Introduction

A. Definitions/interpretation

Please refer the definitions/interpretation as disclosed under:
<https://www.miraeassetmf.co.in/downloads/statutory-disclosure/other-disclosure/offer-documents-data>

B. Risk factors

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the scheme can go up or down depending on various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee the future performance of the Scheme.
- The name of the Scheme does not in any manner indicate its quality or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme. In addition, the scheme does not guarantee or assure any Income Distribution Cum Capital Withdrawal and also does not guarantee or assure that it will make any Income Distribution Cum Capital Withdrawal, though it has every intention to make the same in the Income Distribution Cum Capital Withdrawal option. Income Distribution Cum Capital Withdrawal will be subjected to the investment performance of the Scheme

Scheme Specific Risk Factors

Risks Associated with Debt & Money Market Instruments

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force

the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.

- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- **Concentration Risk:** The Scheme portfolio may have higher exposure to a single sector, subject to maximum of 20% of net assets, depending upon availability of issuances in the market at the time of investment, resulting in higher concentration risk. Any change in government policy / businesses environment relevant to the sector may have an adverse impact on the portfolio.
- **Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk.** Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.

Risk Factors associated with Scheme:

- **Passive Investments:** As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.
- **Tracking Difference Risk:** Tracking difference is the annualized difference of daily returns between the Index and the NAV of the Index Fund. The annualized tracking difference averaged over one year period shall not exceed 1.25%. In case the average annualized tracking difference over one year period for Debt ETFs/ Index Funds is higher than 1.25%, the same shall be brought to the notice of trustees with corrective actions taken by the AMC, if any.

Trade Execution Risk on RFQ Platforms:

Current SEBI regulations mandates Mutual Funds to execute certain % of their monthly trading volume in corporate bonds on RFQ platforms. RFQ platforms are peer-to-peer platforms and are still in development stage. Therefore, they have lower level of secondary market liquidity. Mandatory execution of trades on RFQ among MFs may hamper trade execution efficiency during periods of heavy outflows.

Risks associated with segregated portfolio

- 1) Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- 2) Security comprises of segregated portfolio may not realize any value.
- 3) Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risk Associated while transacting through Email:

The AMC allows investors for transacting in mutual fund units through email. This may involve certain risks which the investor should carefully consider. Investors should note that email based instructions are inherently vulnerable to risks such as interception, unauthorised access, phishing, spoofing, failed delivery and unintended transmission and should ensure appropriate safeguards are in place when using such mode of transaction. The

AMC does not accept any responsibility or liability for any loss, damages or inconvenience caused due to errors, delays, non - receipt or unauthorised access associated with transacting through email.

C. Risk Mitigation Measures

Risks Associated with Debt & Money Market Instruments

Risk & Description specific to the Scheme	Risk mitigants / Management Strategy
Market/Volatility Risk: Risk arising due to price fluctuations and volatility, having material impact on the overall returns of the Scheme.	The Scheme, being a Target Duration structure, is expected to replicate the index in a passive manner. Based on that, we expect to mitigate intermittent price volatility in the underlying assets.
Credit risk: Risk associated with repayment of investment	The Scheme intends to invest in G-Sec securities which carry sovereign guarantee and hence no credit risk
Interest rate risk: Price volatility due to movement in interest rates	The Scheme being passively managed and a Target Duration structure, is expected to replicate the index in a passive manner. However, this will continue to expose investor to relatively higher interest rate risk because the scheme intends to invest in on the run 10 Year G-Sec security as identified by the index provider
Concentration risk: Risk arising due to over exposure in few securities	The index intends to invest in a single paper representing the highest outstanding and liquidity in the Indian debt market
Event risk: Price risk due to company or sector specific event	The Scheme intends to invest in G-Sec. These bonds are perceived to be relatively safe
Performance risk: Risk arising due to change in factors affecting the market	The scheme is passively managed

Risk associated with Government securities:

Investment in Government securities like all other debt instruments is subject to price and interest rate risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to Government securities but is true for all fixed income securities. Despite a high degree of liquidity in comparison with other debt instruments on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus, the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default

fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower. Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

Risk Management & Liquidity Management tools:

Potential Risk Matrix (PRC) & Risk-o-meter: Investors are requested to review this scheme's Potential Risk Matrix (PRC) to understand the maximum risk that this scheme will run as per design and & Risk-o-meter to understand periodical measurement of that risk on a regular basis. Investors are suggested to read about various disclosures under the section "PERIODIC DISCLOSURES" pertaining to "Potential Risk Class Matrix" & "Product Labelling and Risk-o-meter" to understand in detail the disclosure frequency and remedial measures in case of breaches in the boundaries

Mandatory Liquidity requirement: The scheme adopts the Liquidity Risk Management framework mandated by SEBI and AMFI which helps estimates liquidity requirement by determining liquidity risk arising from the liability side and tries to covers all potential liquidity risk scenarios up to agreed confidence interval and has mandated remedial measures both for managing the risk on an ongoing basis (LRaR & LCRaR) as well as action plan in case there is a difference between actual outcome and projected outcome. Investors can refer to the circular 135/ BP/93/ 2021-22 dated July 24, 2021 and subsequent circulars for detail understanding on the Liquidity Risk Management Framework.

Further Investment manager also evaluates and monitors the Asset Liability Mismatch (ALM) which addresses the gap in the estimated potential liquidity requirement over a 90-day period and schemes investment / assets liquidity to meet the potential requirement and best ensures that scheme has necessary liquidity to meets its liability obligations

Stress testing the scheme portfolio: The investment manager periodically stress tests the scheme portfolio to address the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level and evaluate the stress in terms of its impact on the NAV of the scheme. The stress test is performed using the methodology and periodicity as mandated by AMFI in consultation to SEBI.

Swing Pricing: The AMC has a Swing Pricing policy in place to help in case of severe liquidity stress at an AMC level or a severe dysfunction at market level, the Swing Pricing offers the contingency plan in case of extreme exigencies. Investors are suggested to read the detail disclosure pertaining to this policy in "**Swing Pricing Framework**".

II. Information about the scheme:

A. Where will the scheme invest

Investment in Government Securities (G-Sec): The Scheme would invest in G-Sec comprising part of CRSIL IBX Gilt Index – April 2033.

Investment in money market instruments: The Scheme may also invest in money market instruments, in compliance with Regulations. Money Market Instruments will include only treasury bills and government securities having a residual maturity up to one year, Tri-party Repo on government securities or T-bills and any other like instruments as specified by the Reserve Bank of India from time to time. The Scheme will not invest in Commercial Paper, Certificate of Deposits, Bill – rediscounting (BRDS).

Overview of Debt Markets in India

Indian fixed income market, one of the largest and most developed in South Asia, is well integrated with the global financial markets. Screen based order matching system developed by the Reserve Bank of India (RBI) for trading in government securities, straight through settlement system for the same, settlements guaranteed by the Clearing Corporation of India and innovative instruments like TREPS have contributed in reducing the settlement risk and increasing the confidence level of the market participants.

The RBI reviews the monetary policy six times a year giving the guidance to the market on direction of interest rate movement, liquidity and credit expansion. The central bank has been operating as an independent authority, formulating the policies to maintain price stability and adequate liquidity. Bonds are traded in dematerialized form. Credit rating agencies have been playing an important role in the market and are an important source of information to manage the credit risk.

Government (Central and State) is the largest issuer of debt in the market. Public sector enterprises, quasi government bodies and private sector companies are other issuers. Insurance companies, provident funds, banks, mutual funds, financial institutions, corporates and FPIs are major investors in the market. Government loans are available up to 40 years maturity. Variety of instruments available for investments including plain vanilla bonds, floating rate bonds, money market instruments, structured obligations and interest rate derivatives make it possible to manage the interest rate risk effectively.

Indicative levels of the instruments as on April 30, 2025 are as follows:

Instrument	Maturity	Tenure	Yield	Liquidity
TREPS / Repo	Short	Overnight	6	Very High
CP / CD / T Bills	Short	3 months CP*	6.8	High
		3 months CD	6.56	
		1 Year CP*	6.88	
		1 Year CD	6.75	
Central Government securities	Low to High	10 years	6.36	Medium

B. What are the investment restrictions?

The AMC uses a “passive” approach to try and achieve Scheme’s investment objective. Unlike other Fund, the Scheme does not try to “beat” the markets. The AMC does not make any judgments about the investment merit of a particular instrument or a particular industry segment nor will it attempt to apply any economic, financial or market analysis.

Subject to the Regulations and the applicable guidelines the Scheme may invest in the schemes of Mutual Funds. The investment strategy shall be in line with the asset allocation mentioned under “Section II (c): How will the Scheme allocate its assets”.

Though every endeavor will be made to achieve the objective of the Scheme, the AMC/Sponsors/Trustee does not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

#Pursuant to Clause 3.5 of SEBI Master Circular dated June 27, 2024, replication of the Index by the Scheme shall be as follows:

The Scheme shall be considered to be replicating the underlying index, provided:

- iii. The duration of the portfolio of Scheme replicates the duration of the underlying index within a maximum permissible deviation of +/- 10%.
- iv. The following norms for permissible deviation in duration shall apply:
 - a. Either +/- 6 months or +/- 10% of duration, whichever is higher.

- b. However, at no point of time, the residual maturity of any security forming part of the portfolio shall be beyond the target maturity date of the Scheme.

During normal circumstances, the Scheme's exposure to money market instruments will be in line with the asset allocation table. However, in case of maturity of G-Secs in the Scheme portfolio, the reinvestment will be in line with the index methodology.

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weights as the securities have in the Underlying Index. However, deviations from the stated index replication may occur due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, delay in purchase or non-availability of underlying securities forming part of the index etc. The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or non-availability of securities which are part of the Index
- Due to timing of transactions either on RFQ platforms or in open market
- Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPs
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying securities by the Index Provider and AMC's valuation providers.
- Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, or corporate actions or otherwise
- Fees and expenses of the Scheme.
- The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities.
- Interest/Payout of Income Distribution cum capital withdrawal Option.
- Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.

While the intent of the scheme is to track the performance of the underlying index by investing in the securities forming part of the index, due to issues pertaining to liquidity of the debt market in India, the SEBI has prescribed guidelines within which the passive scheme may manage the allocation in the securities which may or may not form part of the index, with same or different weightages, in order to decrease the risk replication of the underlying index within the allowed range. This will result in fund portfolio different from the index portfolio with difference in the performance and volatility of the scheme.

C. Fundamental Attributes

Following are the Fundamental Attributes of the scheme, in terms of Clause 1.14 of SEBI Master Circular for Mutual Funds dated June 27, 2024:

(i) Type of a scheme

- Open ended
- Any other type of Fund –Index Fund- An open-ended target maturity Index Fund investing in the constituents of CRISIL IBX Gilt Index – April 2033.

Investment Objective The investment objective of the scheme is to track the CRISIL IBX Gilt Index – April 2033 by investing in dated Government Securities (G-Sec), maturing on or before April 29, 2033, subject to tracking errors. **However, there is no assurance that the investment objective of the Scheme will be realized and the Scheme does not assure or guarantee any returns.**

- **Main Objective** - Growth

- **Investment pattern** -

Types of Instruments	Indicative allocation (% of total assets)	
Government Securities (G-Secs) representing CRISIL IBX Gilt Index – April 2033	95%	100%
Money market instruments and/or units of debt/liquid schemes of domestic Mutual Funds*	0	5%

*Money Market Instruments will include only treasury bills and government securities having a residual maturity upto one year, Tri-party Repo on government securities or T-bills and any other like instruments as specified by the Reserve Bank of India from time to time.

Change in Asset Allocation and Portfolio Rebalancing:

Subject to the Regulations, the asset allocation pattern indicated above may deviate depending on factors as follows:

1. After the launch of the Scheme and until full deployment is achieved.
2. In case of the process of rebalancing of the portfolio in the following events:
 - a. Event of credit rating changes,
 - b. Corporate events,
 - c. Generating liquidity for IDCW payout.

In the event that the asset allocation of the Scheme should deviate from the ranges as noted in the asset allocation table above, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table above within a period of 7 days. Such changes in the asset allocation will be for short term and defensive considerations. However, in case of deviation in the asset allocation beyond 7 Days, the justification for the same shall be provided by the Fund Manager of the Scheme to the Investment Committee and the reason for the same shall be recorded in writing. Subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be affected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the Regulations, as detailed later in this document.

(ii) Terms of Issue

(a) Listing:

The Scheme being open ended; the Units are not proposed to be listed on any stock exchange.

(b) Redemption of Units:

The Unit Holder has the option to request for Redemption either in amount in rupees or in number of Units. In case the request for Redemption specifies both, i.e. amount in rupees as well the number of Units to be redeemed, then the latter will be considered as the redemption request and redemption will be processed accordingly. The minimum redemption amount shall be 'any amount' or 'any number of units' as requested by the investor at the time of redemption request. The Trustees have authorized the AMC to suo moto redeem such fractional balance units (less than 1 unit), on periodic basis across all schemes, as and when decided by the AMC. Units can be redeemed (sold back to the Fund) at the Redemption Price during the Ongoing Offer Period. If an investor has purchased Units of a Scheme on more than one Business Day the Units will be redeemed on a first-in-first-out basis. If multiple Purchases are made on the same day, the Purchase appearing earliest in the account statement will be redeemed first.

Redemption Price:

The Redemption Price of the Units is the price at which a Unit Holder can redeem Units of a scheme. It will be calculated as described below:

Redemption Price = Applicable NAV - (Applicable NAV x Exit Load*)

* Exit Load, whatever is applicable, will be charged.

Redemption Price will be calculated for up to four decimal places for the Scheme.

For example, if the Applicable NAV of a Scheme is Rs.10.5550, and it has a 2% Exit Load, the Redemption Price will be calculated as follows:

Redemption Price = 10.5550 - (10.5550 X 2.00%) i.e. 10.4550 - 0.2110 = 10.3440

If the Scheme has no Exit Load, the Redemption Price will be equal to the Applicable NAV.

The Securities Transaction Tax levied under the Income Tax Act, 1961, at the applicable rate on the amount of redemption will be reduced from the amount of redemption.

To illustrate:

If a Redemption of 4,900 units is sought by the Unit Holder at a Redemption Price of Rs. 10.3440 (as calculated above), the redemption amount is Rs. 50,685.60. Securities Transaction Tax (STT) for instance is 0.001%. This will be further reduced by the STT of Re. 0.50 (i.e. Rs. 50,685.60 x 0.001%), making the net redemption amount Rs. 50,685.10.

If a Redemption of Rs. 10,000 is sought by the Unit Holder at a Net Redemption Price of Rs. 10.3440 (as calculated above), which will give 966.744 Units; the effective redemption amount will be grossed up to Rs. 10,204.08 (i.e. $10,000 \div (1-2\%)$) and 966.744 units ($10,204.08 \div 10.555$) will be redeemed. This is to ensure that the Unit Holder receives the net amount of Rs. 10,000 as desired.

Investors may note that the Trustee has a right to modify the existing Load structure in any manner subject to a maximum as prescribed under the Regulations and with prospective effect only.

Please refer section – LOAD STRUCTURE.

Applicable NAV for Redemption / Switch-Out / Systematic Transfer Plan:

- In respect of valid Redemption applications accepted at a Designated Collection Centre up to 3 p.m. on a Business Day, the NAV of such day will be applicable.
- In respect of valid Redemption applications accepted at a Designated Collection Centre after 3 p.m. on a Business Day, the NAV of the next Business Day will be applicable.

(c) Aggregate fees and expenses charged to the scheme:

For detailed fees and expenses charged to the scheme please refer to section 'Fees and Expenses'.

(d) The Scheme does not provide any safety net or guarantee to the investors. There is no assurance OR guarantee of returns.

D. Index methodology

Introduction

CRISIL IBX Gilt Index – April 2033 seeks to track the performance of gilt issuers near to the maturity date of the index. CRISIL IBX Gilt Index – April 2033 seeks to invest in securities maturing in 12-month period ending 29th April 2033.

Methodology

The methodology is in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds as per Clause 3.5 of SEBI Master circular dated June 27, 2024.

Security Selection:

1. All Securities in the eligible period as evaluated on the inception date of the index will be selected.
2. The index constituents are valued on a daily basis using CRISIL Valuations
3. Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertiliser bonds and UTI Special Bonds), STRIPS and Floating rate bonds are excluded from eligible securities.

Weighing Approach:

1. Weights to individual securities as evaluated on each rebalancing date and inception date will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage). The weights to the individual securities may change due to relative price movement of securities and will be reset during index rebalancing
2. Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Rebalancing, Review:

1. The index constituents will be reviewed on quarterly basis and the eligible securities will be added every quarter.
2. If any security becomes eligible, it will be added during the rebalancing process, and the weights will be reset as per weighing approach explained above.
3. Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
4. As the index includes securities that shall mature during the 12-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach -
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason it is not possible to reinvest as per the above criteria, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the month.

In case the index the maturity date falls on a holiday, or on an unplanned market holiday, the Index will mature on the next working day.

The constituents of CRISIL IBX Gilt Index – April 2033 as on March 31, 2025 is as under:

ISIN	Issue Name	Daily Weights
IN0020220060	Central Government 7.26% Taxable 22-Aug-2032	25.66%
IN0020220151	Central Government 7.26% Taxable 06-Feb-2033	55.49%
IN0020070044	Central Government 8.32% Taxable 02-Aug-2032	7.80%
IN0020070077	Central Government 8.33% Taxable 21-Sep-2032	0.21%
IN0020020106	Central Government 7.95% Taxable 28-Aug-2032	10.84%
