## **I INTRODUCTION**

### **A. RISK FACTORS**

#### **Standard Risk Factors:**

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the scheme can go up or down depending on various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee the future performance of the Scheme.
- The name of the Scheme does not in any manner indicate its quality or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme. In addition, the scheme does not guarantee or assure any Income Distribution Cum Capital Withdrawal and also does not guarantee or assure that it will make any Income Distribution Cum Capital Withdrawal, though it has every intention to make the same in the Income Distribution Cum Capital Withdrawal option. Income Distribution Cum Capital Withdrawal will be subjected to the investment performance of the Scheme

#### **Scheme Specific Risk Factors**

##### **Risks Associated with Debt & Money Market Instruments**

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.

- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- **Concentration Risk:** The Scheme portfolio may have higher exposure to a single sector, subject to maximum of 20% of net assets, depending upon availability of issuances in the market at the time of investment, resulting in higher concentration risk. Any change in government policy / businesses environment relevant to the sector may have an adverse impact on the portfolio.
- Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.

#### **Risk Factors associated with Scheme:**

- **Passive Investments:** As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.
- **Tracking Error Risk:** Tracking Error is divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Based on that the availability of issuances, it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said, the risk parameters of the portfolio of the Scheme and underlying index could be similar. The Fund will endeavor to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum.

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or non- availability of securities which are part of the Index
- Delay in liquidation of bonds which have been removed by the Index
- Due to timing of transactions either on RFQ platforms or in open market
- Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPs
- Due to over-weight / under-weight investment in bonds of issuers at ISIN level which are part of the Index
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.
- Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, or corporate actions or otherwise
- Fees and expenses of the Scheme.
- The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities.
- Interest/Payout of Income Distribution cum capital withdrawal Option.
- Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an

opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.

While the intent of the scheme is to track the performance of the underlying index by investing in the bond forming part of the index, due to issues pertaining to liquidity of the debt market in India, the SEBI has prescribed guidelines within which the passive scheme may manage the allocation in the bonds and issuers which may or may not form part of the index, with same or different weightages, in order to ensure the risk replication of the underlying index within the allowed range. This will result in fund portfolio different from the index portfolio with difference in the performance and volatility of the scheme.

Due to lack of liquidity in the underlying bonds, the scheme may not be able to deploy the subscription in the desired bonds and issuers, leading to tracking error. During redemption, the scheme may not be able to liquidate the underlying bonds, resulting in delay in investor realizing the redemption proceeds. Though, AMC shall strive to do so within the regulatory guidelines on the same.

#### **Trade Execution Risk on RFQ Platforms:**

Current SEBI regulations mandate Mutual Funds to execute certain % of their monthly trading volume in corporate bonds on RFQ platforms. RFQ platforms are peer-to-peer platforms and are still in development stage. Therefore, they have lower level of secondary market liquidity. Mandatory execution of trades on RFQ among MFs may hamper trade execution efficiency during periods of heavy outflows.

#### **Risks associated with segregated portfolio**

- 1) Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- 2) Security comprising of segregated portfolio may not realize any value.
- 3) Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

## **B. RISK MITIGATION MEASURES**

### **Concentration Risk**

The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.

### **Liquidity Risk**

The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.

**Credit Risk** - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

### **Risk associated with Government securities:**

Investment in Government securities like all other debt instruments is subject to price and interest rate risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates

Scheme Information Document - Mirae Asset Nifty SDL Jun 2027 Index Fund

drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to Government securities but is true for all fixed income securities. Despite a high degree of liquidity in comparison with other debt instruments on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

### **Risks associated with investing in Tri-Party Repo through CCIL (TREPS)**

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the “Default Waterfall”. As per the waterfall mechanism, after the defaulter’s margins and the defaulter’s contribution to the default fund have been appropriated, CCIL’s contribution is used to meet the losses. Post utilization of CCIL’s contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus, the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower. Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

### **C. REQUIREMENT OF MINIMUM NUMBER OF INVESTORS AND MINIMUM HOLDING BY SINGLE INVESTOR**

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days’ notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

### **Overview of Debt Markets in India**

Indian fixed income market, one of the largest and most developed in South Asia, is well integrated with the global financial markets. Screen based order matching system developed by the Reserve Bank of India (RBI) for trading in government securities, straight through settlement system for the same, settlements guaranteed by the Clearing Corporation of India and innovative instruments like TREPS have contributed in reducing the settlement risk and increasing the confidence level of the market participants.

The RBI reviews the monetary policy six times a year giving the guidance to the market on direction of interest rate movement, liquidity and credit expansion. The central bank has been operating as an independent authority, formulating the policies to maintain price stability and adequate liquidity. Bonds are traded in dematerialized form. Credit rating agencies have been playing an important role in the market and are an important source of information to manage the credit risk.

Government (Central and State) is the largest issuer of debt in the market. Public sector enterprises, quasi government bodies and private sector companies are other issuers. Insurance companies, provident funds, banks, mutual funds, financial institutions, corporates and FPIs are major investors in the market. Government loans are available up to 40 years maturity. Variety of instruments available for investments including plain vanilla bonds, floating rate bonds, money market instruments, structured obligations and interest rate derivatives make it possible to manage the interest rate risk effectively.

- a. In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:
  - i. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
  - ii. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
  - iii. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
  - iv. The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.
- b. In order to avoid mis-use of segregated portfolio, trustees will ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including clawback of such amount to the segregated portfolio of the scheme.

### Mandatory Swing Pricing Framework for market dislocation:

Swing pricing refers to a process for adjusting a fund's Net Asset Value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e. flows into or out of a scheme) to the investors associated with that activity. It is aimed at reducing the impact of large redemptions on existing investors by reducing dilution of the value of a fund's units.

Accordingly, mandatory full swing during market dislocation times shall apply as under:

- Swing pricing framework will be applicable only for scenarios related to net outflows from the schemes.

- Market dislocation will be determined by SEBI either based on AMFI’s recommendation or suo moto. Once market dislocation is declared, it will be notified by SEBI that swing pricing will be applicable for a specified period.
- Thereafter, mandatory swing pricing will be applicable to Schemes which:
  - a. have ‘High’ or ‘Very High’ risk on the risk-o-meter (as of the most recent period at the time of declaration of market dislocation); AND
  - b. classify themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix.
- **Swing factor** as per below matrix shall be made applicable to the above mentioned schemes and the NAV will be adjusted for the swing factor.

Swing factor			
Max Credit Risk of the scheme→	Class A (CRV>=12)	Class B (CRV>=10)	Class C (CRV<10)
Max Interest Rate Risk of the scheme↓			
Class I: (Macaulay Duration <=1 year)	--	--	1.5%
Class II: (Macaulay Duration <=3 years)	--	1.25%	1.75%
Class III: Any Macaulay Duration	1%	1.5%	2%
*CRV – Credit Risk Value			

- Once swing pricing framework is triggered and swing factor is made applicable, both the incoming and outgoing investors shall get NAV adjusted for swing factor.
- Swing pricing shall be made applicable to all unitholders at PAN level with an exemption for redemptions upto Rs. 2 lacs for each scheme of MAMF.
- The scheme performance shall be computed based on unswung NAV.
- **Disclosures:** Disclosures pertaining to NAV adjusted for swing factor along with the performance impact shall be made by the AMC in the SID, Scheme wise Annual Reports and Abridged summary and on website prominently if swing pricing framework has been made applicable for the said mutual fund scheme.
- **Illustration:** Below is the example on how the swing pricing framework works, under which circumstances it is triggered and the effect on the NAV for incoming and outgoing investors:

**Impact of Swing Pricing on incoming and outgoing unitholders/investors:**

1. Unswung NAV – Rs.100/- (This is before applying the swing factor).
2. Mandatory Swing Factor - 1.50%

3. NAV after Adjustment of swing factor :  $(100 - 1.5\% \text{ of } 100) = (100 - 1.50) = \text{Rs. } 98.50$

Subscription Amount	Rs.100,00,000/-
No of units to be allotted	$(100,00,000/98.50) = 101,522.843$
Redemption Amount	Rs.100,00,000/-
No of units to be redeemed	$(100,00,000/98.50) = 101,522.843$

Further, in line with the aforesaid SEBI circular, the inclusion of above-mentioned provisions pertaining to mandatory swing factor would not be considered as a Fundamental Attribute change. However, optional swing factor or higher than as specified in the Table above shall be considered as a Fundamental Attribute change of the Scheme in terms of Regulation 18(15A) of SEBI (Mutual Funds) Regulations, 1996.

#### **D. WHERE THE SCHEME WILL INVEST?**

Investment in State Development Loans (SDLs): The Scheme would invest in State Development Loans representing the State Development Loans comprising Nifty SDL Jun 2027 Index and endeavor to track the benchmark index.

Investment in money market instruments: The Scheme may also invest in money market instruments, in compliance with Regulations. Money Market Instruments will include only treasury bills and government securities having a residual maturity up to one year, Tri-party Repo on government securities or T-bills and any other like instruments as specified by the Reserve Bank of India from time to time. The Scheme will not invest in Commercial Paper, Certificate of Deposits, Bill – rediscounting (BRDS).

#### **E. WHAT ARE THE INVESTMENT STRATEGIES?**

The fund is a passively managed index fund which will employ an investment approach designed to track the performance of Nifty SDL Jun 2027 Index.

The Scheme will follow Buy and Hold investment strategy in which existing SDLs will be held till maturity unless sold for meeting redemptions requirement.

Pursuant to SEBI Circular no. SEBI/HO/IMD/DF3/CIR/P/2019/147 dated November 29, 2019, replication of the Index by the Scheme shall be as follows:

- (a) The Scheme shall replicate the index completely.
- (b) In the event, if the condition laid down in para (a) above is not feasible due to non-availability of issuances of the issuer forming part of the index, the Scheme may invest in other issuances issued by the same issuer having deviation of +/- 10% from the weighted average duration of issuances forming part of the index, subject to single issuer limit of 15%. Further, at aggregate portfolio level, the duration of the Scheme shall not deviate +/- 5% from the duration of the index.
- (c) In the event, if the conditions laid down in para (a) and para (b) above are not feasible, the Scheme shall invest in issuances of other issuer(s) within the index having duration, yield and credit rating in line with that of the non-available issuances of the issuer(s) forming part of the index, subject to single issuer limit of 15%. The duration of the Scheme shall not deviate +/- 5% from the duration of the index.
- (d) In the event, if the conditions laid down in para (a), para (b) and para (c) above are not feasible, the Scheme shall invest in issuances of issuer(s) not forming part of the index with duration, yield and credit

rating in line with that of the non-available issuances of issuer(s) forming part of the index. Such investment in issuances of issuer(s) not forming part of the index shall be maximum of 20% of the aggregate portfolio of the Scheme.

(e) The rationale for any deviation from para (a) above shall be recorded.

(f) In an event where the credit rating of an issuance falls below the investment grade or rating mandated in the index methodology, rebalancing by the Scheme shall be done within a period of 5 working days.

During normal circumstances, the Scheme's exposure to money market instruments will be in line with the asset allocation table. However, in case of maturity of SDLs in the Scheme portfolio, the reinvestment will be in line with the index methodology.

Further, the norms as indicated in para (1) of SEBI circular no. SEBI/HO/IMD/DF3/CIR/P/2019/147 dated November 29, 2019 reproduced below shall be adopted –

- a. The constituents of the index shall be aggregated at issuer level.
- b. The index shall have a minimum of 8 issuers.
- c. No single issuer shall have more than 15% weight in the index.
- d. The rating of the constituents of the index shall be investment grade.
- e. The constituents of the index shall have a defined credit rating and defined maturity as specified in the index methodology.

## RISK CONTROL

The Scheme will predominantly invest in SDLs which are constituents of the underlying Index viz. Nifty SDL Jun 2027 Index. Based on the availability of issuances, it is expected that the portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said broad risk parameters of the portfolio of the Scheme such as credit rating, weighted average YTM, weighted average maturity, asset allocation etc. are expected to be similar to the Underlying Index.

The Scheme's exposure to money market instruments will be in line with the asset allocation table.

This allocation will be monitored periodically and it shall be ensured that investments are made in accordance with the Scheme objective and within the regulatory and internal investment restrictions prescribed from time to time.

Since disciplined investing requires risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The Scheme has a detailed process to identify, measure, monitor and manage various portfolio risks.

The objective is to understand these risks and mitigate them wherever possible.

Risk & Description specific to the Scheme	Risk mitigants / Management Strategy
<b>Market/Volatility Risk:</b> Risk arising due to price fluctuations and volatility, having material impact on the overall returns of the Scheme.	The Scheme, being a Target Maturity Date index fund structure, is expected to follow a Buy and Hold investment strategy in a passive manner. Based on that, we expect to mitigate intermittent price volatility in the underlying assets. Investors who remain invested until the maturity of the Scheme are expected to mitigate market / volatility risk to large extent.
<b>Credit risk:</b> Risk associated with repayment of investment	The Scheme intends to invest predominantly in State Development Loans (SDL) issued and serviced by Reserve Bank of India (RBI). SDLs are eligible for SLR investment
<b>Interest rate risk:</b> Price volatility due to movement in interest rates	The Scheme being passively managed and a Target Maturity Date index fund structure, is expected to follow a Buy and Hold

	investment strategy in a passive manner. All investments are within the maturity date of the Scheme and the underlying Index. This should help mitigate the interest rate risk.
<b>Concentration risk:</b> Risk arising due to over exposure in few securities	The index intends to invest across SDLs issued by different states.
<b>Event risk:</b> Price risk due to company or sector specific event	The Scheme intends to invest in predominantly SDLs issued by State governments. These bonds SDLs are perceived to be relatively safe with quasi sovereign risk due their government ownership.
<b>Performance risk:</b> Risk arising due to change in factors affecting the market	The scheme is passively managed

### Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weights as the securities have in the Underlying Index. However, deviations from the stated index replication may occur due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, delay in purchase or non-availability of underlying securities forming part of the index etc. The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or non- availability of securities which are part of the Index
- Delay in liquidation of bonds which have been removed by the Index
- Due to timing of transactions either on RFQ platforms or in open market
- Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPs
- Due to over-weight / under-weight investment in bonds of issuers at ISIN level which are part of the Index
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.
- Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, or corporate actions or otherwise
- Fees and expenses of the Scheme.
- The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities.
- Interest/Payout of Income Distribution cum capital withdrawal Option.
- Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.

While the intent of the scheme is to track the performance of the underlying index by investing in the bond forming part of the index, due to issues pertaining to liquidity of the debt market in India, the SEBI has prescribed guidelines within which the passive scheme may manage the allocation in the bonds and

Scheme Information Document - Mirae Asset Nifty SDL Jun 2027 Index Fund

issuers which may or may not form part of the index, with same or different weightages, in order to decrease the risk replication of the underlying index within the allowed range. This will result in fund portfolio different from the index portfolio with difference in the performance and volatility of the scheme.

## **F. FUNDAMENTAL ATTRIBUTES**

Following are the fundamental attributes of the scheme, in terms of Regulation 18(15A) of the SEBI (MF) Regulations:

### **a. Type of Scheme:**

An open-ended target maturity Index Fund investing in the constituents of Nifty SDL Jun 2027 Index. A scheme with relatively high interest rate risk and relatively low credit risk.

### **b. Investment Objective:**

The investment objective of the scheme is to track the Nifty SDL Jun 2027 Index by investing in State Development Loans (SDL), maturing on or before June 15, 2027, subject to tracking errors. However, there is no assurance that the investment objective of the Scheme will be realized and the Scheme does not assure or guarantee any returns.

**c. Asset allocation:** Please refer to ‘Section II - C. Asset Allocation and Investment Pattern’ of this SID for details.

### **d. Terms of Issue:**

#### **(a) Listing:**

The Scheme being open ended; the Units are not proposed to be listed on any stock exchange.

#### **(b) Redemption of Units:**

The Unit Holder has the option to request for Redemption either in amount in rupees or in number of Units. The minimum redemption amount shall be ‘any amount’ or ‘any number of units’ as requested by the investor at the time of redemption request.

#### **Redemption Price:**

The Redemption Price of the Units is the price at which a Unit Holder can redeem Units of a scheme. It will be calculated as described below:

Redemption Price = Applicable NAV - (Applicable NAV x Exit Load\*)

\* Exit Load, whatever is applicable, will be charged.

Redemption Price will be calculated for up to four decimal places for the Scheme.

For example, if the Applicable NAV of a Scheme is Rs.10.5550, and it has a 2% Exit Load, the Redemption Price will be calculated as follows:

Redemption Price = 10.5550 - (10.5550 X 2.00%) i.e. 10.4550 - 0.2110 = 10.3440

If the Scheme has no Exit Load, the Redemption Price will be equal to the Applicable NAV.

The Securities Transaction Tax levied under the Income Tax Act, 1961, at the applicable rate on the amount of redemption will be reduced from the amount of redemption.

**To illustrate:**

If a Redemption of 4,900 units is sought by the Unit Holder at a Redemption Price of Rs. 10.3440 (as calculated above), the redemption amount is Rs. 50,685.60. Securities Transaction Tax (STT) for instance is 0.001%. This will be further reduced by the STT of Re. 0.50 (i.e. Rs. 50,685.60 x 0.001%), making the net redemption amount Rs. 50,685.10.

If a Redemption of Rs. 10,000 is sought by the Unit Holder at a Net Redemption Price of Rs. 10.3440 (as calculated above), which will give 966.744 Units; the effective redemption amount will be grossed up to Rs. 10,204.08 (i.e.  $10,000 \div (1-2\%)$ ) and 966.744 units ( $10,204.08 \div 10.555$ ) will be redeemed. This is to ensure that the Unit Holder receives the net amount of Rs. 10,000 as desired.

Investors may note that the Trustee has a right to modify the existing Load structure in any manner subject to a maximum as prescribed under the Regulations and with prospective effect only.

Please refer section – LOAD STRUCTURE.

Applicable NAV for Redemption / Switch-Out / Systematic Transfer Plan:

- In respect of valid Redemption applications accepted at a Designated Collection Centre up to 3 p.m. on a Business Day, the NAV of such day will be applicable.
- In respect of valid Redemption applications accepted at a Designated Collection Centre after 3 p.m. on a Business Day, the NAV of the next Business Day will be applicable.

**(c) Aggregate fees and expenses charged to the scheme:**

For detailed fees and expenses charged to the scheme please refer to section ‘Fees and Expenses’.

- (d)** The Scheme does not provide any safety net or guarantee to the investors. There is no assurance OR guarantee of returns.

**Change in the fundamental attributes of the Schemes:**

In accordance with Regulation 18(15A) of the Regulations, the Trustee shall ensure that no change in the fundamental attributes of the Scheme or the Fund or the fees and expenses payable or any other change which would modify the Scheme and affect the interest of the Unit Holders will be carried out unless:

- A written communication about the proposed change is sent to each Unit Holder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a Marathi daily newspaper with wide circulation published in Mumbai (as the head office of the Fund is situated there); and
- The Unit holders are given an option to exit for a period of 30 days to exit at the prevailing Net Asset Value without any exit Load.

Further, before effecting any such change, the Trustees shall obtain comments from SEBI.

Fundamental attributes will not cover changes to the Scheme made in order to comply with changes in regulation with which the Scheme has been required to comply.

## **G. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?**

The performance of the scheme will be benchmarked to the Nifty SDL Jun 2027 Index.

### **Introduction**

Nifty SDL Jun 2027 Index seeks to measure the performance of portfolio of 20 State Development Loans (SDLs) maturing during the twelve month period ending June 15, 2027.

The index is computed using the total return methodology including price return and coupon return.

The index has a base date of March 09, 2022 and a base value of 1000.

### **Methodology**

The methodology is in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DF3/CIR/P/2019/147 on November 29, 2019

### **Eligibility Norms**

SDL should not be a special security

### **State/UT Selection**

Twenty (20) states/UTs are selected based on their highest outstanding amount as on January 31, 2022 maturing during the twelve month period ending June 15, 2027

### **Security Selection**

As on January 31, 2022, for every selected state/UT, SDL with the longest maturity maturing during the twelve month period ending June 15, 2027 is selected to be part of the index

### **Weight Assignment**

- Each state/UT that is part of the index is given equal weight as on the base date of the index
- Subsequently, the security level weights may drift due to price movement and will not be reset
- Any coupon amount received is assumed to be reinvested in the portfolio on the same date, in the proportion of the existing weights

### **Index Rebalancing and Reconstitution**

- On a quarterly basis, index will be screened for compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DF3/CIR/P/2019/147 on November 29, 2019. In case of non-compliance, suitable corrective measures will be taken to ensure compliance with the norms.
- Index will be reviewed at the end of each calendar quarter with data cut-off date being 15 working days (T-15) before last working day of calendar quarter (T). Changes, if any, shall be effective from last working day of calendar quarters.
- During the quarterly review if there is an eligible SDL available with a longer maturity of the same state/UT, maturing during the twelve month period ending June 15, 2027, the existing SDL of that state/UT will be replaced by the available longer maturity SDL of the same state/UT with the same weight, otherwise the existing SDL of that state/UT will continue to be part of the index.
- As the index includes securities that shall mature during the twelve month period ending on the final maturity date of the index, any proceeds from the SDL redemption prior to the final maturity date of the index shall be re-invested using the following waterfall approach:
  - The proceeds from SDL redemption will be reinvested in the longest maturity outstanding SDL issued by the same state/UT and maturing on or just before the index maturity date with the same weightage. This will be subject to 15% single issuer limit.

- In case a replacement in the form of outstanding SDL of the same state/UT cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms (minimum 8 issuers and single issuer weight cap of 15%).
- In case due to any reason it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date. This will be subject to 15% single issuer limit except for T-Bill.
- If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

### **Index Termination**

The index shall mature on June 15, 2027

### **Tentative Portfolio**

**i. Interscheme Switching**

The Transaction Slip can be used by investors to make inter-scheme switches (during the NFO Period and the ongoing offer period) within the Fund. All valid applications for switch-out shall be treated as Redemption and for switch-in as Purchases with the respective Applicable NAVs of the Scheme / option.

**ii. Intrascheme Switching**

Investors can switch between different options under the same Plan of the Scheme, at the Applicable NAV. All valid applications for switch-out shall be treated as Redemption and for switch-in as Purchases with the respective Applicable NAVs of the option. As per current Load structure, no Entry or Exit Loads will be charged for intra-scheme switching. However, AMC may change the Loads prospectively as indicated in section on LOAD STRUCTURE FOR THE SCHEME in this Scheme information document.

**iii. Folio Number**

Unless otherwise requested by the Unit Holder, a single folio number may be assigned if an investor invests in different schemes of the Fund, and a consolidated account statement will then be provided for investments in all the schemes.

**iv. Fractional Units**

Since a request for Purchase or Redemption is generally made in rupee amounts and not in terms of a fixed number of Units of the Scheme, an investor may be left with fractional Units. Fractional Units will be computed and accounted for up to four decimal places for the Scheme.

**v. Consolidation of folios**

In case an investor holds investments in multiple folios under the Fund, the AMC reserves the right to consolidate all the folios belonging to the same investor into one folio.

However, investors intending to take benefit of these facilities should note that they should use these services at their own risk. The Fund, the AMC, the Trustee, along with its directors, employees and representatives shall not be liable for any damages or injuries arising out of or in connection with the use of internet, mobile phones, Kiosk, etc. or its non-use including, without limitation, non-availability or failure of performance, loss or corruption of data, loss of or damage to property (including profit and goodwill), work stoppage, computer failure or malfunctioning, or interruption of business; error, omission, interruption, deletion, defect, delay in operation or transmission, computer virus, communication line failure, unauthorized access or use of information.
