Part II. INFORMATION ABOUT THE SCHEME

A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, the asset allocation will be as follows:

Instruments	Indicative allocations (% of total assets)	
	Minimum	Maximum
Money Market Instruments and Debt instruments with Macaulay duration of the portfolio between 1 year to 3 years	0%	100%
Units issued by REITs & InvITs	0	10%

*Investment in Securitized debt (excluding foreign securitized debt), if undertaken, would not exceed 20% of the net assets of the Scheme.

The Scheme may invest in repo/reverse repo in corporate bonds. The gross exposure of the scheme to 'corporate bonds repo transactions' shall not be more than 10% of the net assets of the concerned scheme.

The Cumulative Gross Exposure to Money Market Instruments, Debt instruments, REITs and InvITs will not exceed 100% of the Net Assets of the Scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. As per clause 12.25 of SEBI Master Circular date May 19, 2023, Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities having residual maturity of less than 91 days.

Debt securities include, but are not limited to, Debt securities of the Government of India, State and Local Governments, Government Agencies, Statutory Bodies, Public Sector Undertakings, Public Sector Banks or Private Sector Banks or any other Banks, Financial Institutions, Development Financial Institutions, and Corporate Entities, collateralized debt securities or any other instruments as may be prevailing and permissible under the Regulations from time to time).

The Debt Securities (including money market instruments) referred to above could be fixed rate or floating rate, listed, unlisted, privately placed, among others, as permitted by regulation.

Pending deployment of funds of a Scheme in securities in terms of investment objectives of the Scheme a mutual fund can invest the funds of the Scheme in short term deposits of scheduled commercial banks in terms of clause 12.16 of SEBI Master Circular dated May 19, 2023.

Further, the Scheme may, pending deployment of funds invest in units of money market/liquid schemes of Mirae Asset Mutual Fund and/or any other mutual fund. Such investments will be within the limits specified under SEBI (MF) Regulations. The AMC shall not charge any investment management fees with respect to such investment.

Investment by scheme in the units of CDMDF

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Investment by the AMC in the units of Corporate Debt Market Development Fund

'Pursuant to regulation 43A of SEBI (Mutual Funds) Regulations, 1996 and SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, AMC shall make a one-time contribution equivalent to 2 bps of the AUM of the specified debt oriented schemes as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days of request from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

In case of delay in contribution by the Scheme and AMC, the AMC shall be liable to pay interest at fifteen percent (15%) per annum for the period of delay.'

Rebalancing due to passive breach

In the event of deviation from mandated asset allocation mentioned above due to passive breaches, the rebalancing will be carried out in 30 business days. Where the portfolio is not rebalanced within 30 business days, justification for the same including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period in accordance with clause 2.9 of SEBI Master Circular dated May 19, 2023. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

Rebalancing of deviation due to short term defensive consideration

Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. As per clause 1.14.1.2 of SEBI Master Circular dated May 19, 2023 such changes in the investment pattern will be for short term and for defensive consideration only. In the event of deviations, portfolio rebalancing will be carried out within 30 calendar days in such cases.

B. WHERE WILL THE SCHEME INVEST?

1. Investment in Debt & Money Market Instruments Units issued
2. Units issued by REITs & InvITs
3. Investment in the units of Corporate Debt Market Development Fund

Detailed definition and applicable regulations/guidelines for each instrument shall be included in **Section II**.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme shall be constructed and actively managed according to the investment objective. The Scheme seeks to generate returns through investments in a range of debt and money market instruments with Macaulay duration of the portfolio between 1 year to 3 years. The fund will be managed according to the investment objective, thereby seeking to generate reasonable returns commensurate with low risk.

The Scheme may also invest in securities issued by corporate (both private sector and public sectors) including banks and financial institutions and Money Market Instruments across maturities / yield curve and ratings. The fund may also invest in government securities across maturities / yield curve. The fund may also look for opportunities from credit spreads among the range of available debt & money market instruments. The investment strategy of this scheme aims to optimize risk adjusted returns. The Scheme has a short term duration investment option that provides the flexibility to respond to continuously changing market scenario by managing its portfolio in line with current yield curve.

- The credit quality of the portfolio will be maintained and monitored using in-house research capabilities as well as inputs from external sources such as independent credit rating agencies.
- The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security / instrument selection.
- The bottom up approach will assess the quality of security / instrument (including the financial health of the issuer) as well as the liquidity of the security.
- Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification techniques.

The Scheme does not propose to underwrite issuances of securities of other issuers.

The Scheme shall not invest in unrated debt instruments and derivatives. The Scheme shall not advance any loans. The Scheme does not invest in overseas/foreign securities. The scheme does not intend to participate in Stock Lending. The Scheme shall not participate in short lending, credit default swaps and Securities Lending & Borrowing.

The **Macaulay duration** is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Macaulay duration can be calculated:

$$\sum_{t=1}^n \frac{t \cdot C}{(1+y)^t} + \frac{n \cdot M}{(1+y)^n}$$

P

Where:

t = respective time period
C = periodic coupon payment
y = periodic yield
n = total number of periods
M = maturity value
P = market price of bond

Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification. The Scheme shall aim to generate better returns than bank fixed deposits and government securities and may follow an accrual based strategy. The Scheme shall be based on Accrual strategy.

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools like but not limited to calculating risk ratios, tracking error etc. The AMC has implemented Quantis as the Front Office and Settlement System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and “soft” warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner.

The risk control measures for managing the debt portion of the scheme are:

1. Monitoring risk adjusted returns performance of the fund with respect to its peers and its benchmark.
2. Tracking analysis of the fund on various risk parameters undertaken by independent fund research / rating agencies or analysts and take corrective measures if needed.
3. Interest rate risk is a function of the maturity profile or the tenure of the security in the portfolio. This is proactively monitored by managing average maturity in line with our view on the market.
4. Credit analysis plays an important role at the time of purchase of bond and then at the time of regular performance analysis. Our internal research anchors the credit analysis. Sources for credit analysis include Capital Line, CRISIL, ICRA updates etc. Debt ratios, financials, cash flows are analysed at regular intervals to take a call on the credit risk.
5. We have different maturity buckets for corporate bonds. By being in different maturity buckets, we avoid concentration of the portfolio in a maturity bucket. We define individual limits for G Sec, money market instruments, MIBOR linked debentures and corporate bonds exposure, for diversification reasons.

Policy for Investment decisions

The investment policy of the AMC has been determined by the Investment Committee (“IC”) which has been ratified by the Boards of the AMC and Trustee. At the strategic level, the broad investment

philosophy of the AMC and the authorized exposure limits are spelt out in the Investment Policy of the AMC. During trading hours, the Fund Managers have the discretion to take investment decisions for the Scheme within the limits defined in the Investment Policy, these decisions and the reasons thereof are communicated to the CEO for post facto approval.

The designated Fund Manager(s) of the Scheme will be responsible for taking day-to-day investment decisions and will inter-alia be responsible for asset allocation, security selection and timing of investment decisions.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the scheme will be benchmarked to the performance of the CRISIL Short Duration Debt A - II Index.

The above benchmark is in accordance with clause 1.9 of SEBI Master Circular dated May 19, 2023 on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' and the list published by AMFI in this regard on Tier 1 benchmark for debt schemes.

Rationale for adoption of benchmark:

CRISIL Short Duration Debt A - II Index seeks to track the performance of a debt portfolio that includes government securities, AAA/AA rated corporate bonds, Commercial Papers and Certificates of Deposit.

The Scheme intends to have a portfolio mix of instruments, which are mainly captured by the Benchmark Index.

The Trustees may change the benchmark in future if a benchmark better suited to the investment objective of the Scheme is available.

f. Investments of AMC in the Scheme –

<https://www.miraeassetmf.co.in/downloads/statutory-disclosure/other-disclosure/offer-documents-data>

The AMC shall not invest in any of the schemes unless full disclosure of its intention to invest has been made in the Scheme Information Document and that the AMC shall not be entitled to charge any fees on such investment

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under the Options there under can be calculated as shown below:

$$\text{NAV} = \frac{(\text{Market or Fair Value of Scheme's investments} + \text{Current assets including Accrued Income} - \text{Current Liabilities and provisions including accrued expenses})}{\text{No. of Units outstanding under the Scheme/Option.}}$$

The NAV of the Units will be calculated and announced at the close of each working day. The NAVs of the Scheme will be computed and units will be allotted upto 4 decimals.

Computation of NAV will be done after taking into account IDCWs paid, if any, and the distribution tax thereon, if applicable. Therefore, once IDCWs are distributed under the IDCW Option, the NAV of the Units under the IDCW Option would always remain lower than the NAV of the Units issued under the Growth Option. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.

The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time

Illustration on Computation of NAV:

If the net assets of the Scheme are Rs.10,65,44,345.34 and units outstanding are 1,00,00,000 then the NAV per unit will be computed as follows:

$$10,65,44,345.34 / 1,00,00,000 = \text{Rs. } 10.654 \text{ p.u. (rounded off to three decimals)}$$

The Mutual Fund may charge the load within the stipulated limit of 5% and without any discrimination to any specific group. The Repurchase Price however, will not be lower than 95% of the NAV.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. NFO expenses were borne by the AMC. No NFO expenses were charged to the Scheme.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the Scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that upto 2.00% of the daily net assets of the Scheme will be charged to the scheme as expenses. As per the Regulations, the maximum recurring expenses including investment management and advisory fee that can be charged to the Scheme shall be subject to a percentage limit of daily net assets as in the table below:

First Rs. 500 crores	2.00%
Next Rs. 250 crores	1.75%
Next Rs. 1250crores	1.50%
Next Rs. 3000 crores	1.35%
Next Rs. 5000 crores	1.25%
on the next Rs. 40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs 5,000 crores of daily net assets or part thereof,
Balance of assets	0.80%

The recurring expenses of operating the Scheme on an annual basis, which shall be charged to the Scheme, are estimated to be as follows (each as a percentage per annum of the daily net assets)

Particulars	% p.a. of daily net assets
Investment Management & Advisory Fee	Upto 2.00%
Trustee fee	
Audit fees	
Custodian fees	
RTA Fees	
Marketing & Selling expense incl. agent commission**	
Cost related to investor communications	
Cost of fund transfer from location to location	
Cost of providing account statements and redemption cheques and IDCW warrants	
Costs of statutory Advertisements	
Cost towards investor education & awareness (2 bps)	
Brokerage & transaction cost over and above 12 bps for cash market transactions@@	
GST on expenses other than investment and advisory fees	
GST on brokerage and transaction cost	
Other Expenses*	
Maximum total expense ratio (TER) permissible under Regulation 52 (6) (c)	
\$ Additional expenses for gross new inflows from specified cities***	Upto 0.30%

*Other expenses: Any other expenses which are directly attributable to the Scheme, may be charged with approval of the Trustee within the overall limits as specified in the Regulations except those expenses which are specifically prohibited.

@@ Brokerage and transaction costs which are incurred for the purpose of execution of trade and is included in the cost of investment shall not exceed 0.12 per cent in case of cash market transactions.

The purpose of the above table is to assist the investor in understanding the various costs & expenses that the investor in the Scheme will bear directly or indirectly. These estimates have been made in good faith as per the information available to the AMC and the above expenses (including investment management and advisory fees) are subject to inter-se change and may increase/decrease as per actual and/or any change in the Regulations, as amended from time to time.

All scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of the Asset Management Companies (AMC), its associate, sponsor, trustee or any other entity through any route.

All fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a regular plan. The TER of the Direct Plan will be lower to the extent of the distribution expenses/commission which is charged in the Regular Plan and no commission for distribution of Units will be paid / charged under the Direct Plan.

In addition to the limits as specified in Regulation 52(6) of SEBI (Mutual Funds) Regulations 1996 [‘SEBI Regulations’] or the Total Recurring Expenses (Total Expense Limit) as specified above, the following costs or expenses may be charged to the scheme namely:-

\$ Additional expenses for gross new inflows from specified cities:

(a) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by SEBI/AMFI from time to time are at least -

(i) 30 per cent of gross new inflows in the scheme, or;

(ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from such cities is less than the higher of sub-clause (i) or subclause (ii), such expenses on daily net assets of the Scheme shall be charged on proportionate basis.

Provided further that, expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities.

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the Scheme in case the said inflows are redeemed within a period of one year from the date of investment.

Currently, SEBI has specified that the above additional expenses may be charged for inflows from beyond ‘Top 30 cities.’ The top 30 cities shall mean top 30 cities based on Association of Mutual Funds in India (AMFI) data on ‘AUM by Geography – Consolidated Data for Mutual Fund Industry’ as at the end of the previous financial year.

This sub clause (a) shall be applicable for inflows received during the NFO period.

Provided further that, additional TER can be charged based on inflows only from retail investors from B30 cities in terms of clause 10.1 of SEBI Master Circular dated May 19, 2023.

‘Retail investors’ are defined as individual investors with an inflow of an amount upto Rs 2,00,000/- per transaction.

*** Note: SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023 and AMFI letter dated No. 35P/ MEM-COR/ 85/ 2022-23 dated March 02, 2023 has directed AMCs to keep B-30 incentive structure in abeyance with effect from March 01, 2023 till further notice.

(b) GST payable on investment and advisory service fees (‘AMC fees’) charged by Mirae Asset Investment Managers (India) Private Limited (‘Mirae Asset AMC’);

Within the Total Expense Limit chargeable to the Scheme, following will be charged to the Scheme:

(a) GST on other than investment and advisory fees, if any, (including on brokerage and transaction costs on execution of trades) shall be borne by the Scheme;

(b) Investor education and awareness initiative fees of 2 basis points on daily net assets of respective Scheme.

The current expense ratios will be updated on the AMC website <https://miraeassetmf.co.in/downloads/regulatory>.

Further, the notice of change in base TER (i.e. TER excluding additional expenses provided in Regulation 52(6A) (b) and 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996) in comparison to previous base TER charged to the scheme will be communicated to investors of the scheme through notice via email or SMS at least three working days prior to effecting such change.

However, any decrease in TER due to decrease in applicable limits as prescribed in Regulation 52 (6) (i.e. due to increase in daily net assets of the scheme) would not require issuance of any prior notice to the investors. Further, such decrease in TER will be immediately communicated to investors of the scheme through email or SMS and uploaded on the AMC website.

The above change in the base TER in comparison to previous base TER charged to the scheme shall be intimated to the Board of Directors of AMC along with the rationale recorded in writing.

The changes in TER shall also be placed before the Trustees on quarterly basis along with rationale for such changes.

**Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc and no commission for distribution of Units will be paid / charged under Direct Plan. The TER of the Direct Plan will be lower to the extent of the abovementioned distribution expenses/ commission which is charged in the Regular Plan.

Illustration of impact of expense ratio on scheme's returns (by providing simple example)

Particulars		Regular Plan	Direct Plan
Opening NAV per unit	A	10.0000	10.0000
Gross Scheme Returns @ 8.75%	B	0.8750	0.8750
Expense Ratio @ 1.50 % p.a.	C = (A x 1.50%)	0.1500	0.1500
Distribution Expense Ratio @ 0.25 % p.a. *	D = (A x 0.25%)	0.0250	0.0000
Total Expenses	E = C + D	0.1750	0.1500
Closing NAV per unit	F = A + B - E	10.7000	10.7250
Net 1 Year Return	F/A - 1	7.00%	7.25%

*Distribution/Brokerage expense is not levied

The above calculation is provided to illustrate the impact of expenses on the scheme returns and should not be construed as indicative Expense Ratio, yield or return.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (<https://www.miraeassetmf.co.in/>) or may call at '1800 2090 777' or your distributor.

Type of Load	Load chargeable (as %age of NAV)
Exit	Nil

As per clause 10.6 of SEBI Master Circular dated May 19, 2023, no load would be charged on Bonus units and of units allotted on reinvestment of IDCW.

For any change in load structure AMC will issue an addendum and display it on the website/Investor Service Centres.

The Mutual Fund may charge the load within the stipulated limit of 5% and without any discrimination to any specific group. The Repurchase Price however, will not be lower than 95% of the NAV.

The Trustee reserves the right to modify/alter the load structure and may decide to charge an exit load or introduce a differential load structure on the Units with prospective effect, subject to the maximum limits as prescribed under the SEBI Regulations. At the time of changing the load structure, the AMC shall take the following steps:

- Arrangements shall be made to display the changes/modifications in the SID in the form of a notice in all the Mirae Asset ISCs' and distributors' offices and on the website of AMC.
- The notice-cum-addendum detailing the changes shall be attached to SID and KIM. The addendum will be circulated to all the distributors so that the same can be attached to all SIDs and KIM already in stock.
- The introduction of the exit load along with the details shall be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load.
- Any other measures which the mutual funds may feel necessary.

The AMC may change the load from time to time and in case of an exit/repurchase load this may be linked to the period of holding. The load charged could also be different as regards the amount/tenor of investment, etc. It may be noted that any such change in the load structure shall be applicable on prospective investment only.

The distributors should disclose all the commissions (in the form of trail commission or any other mode) payable to them for the different competing schemes of various mutual funds from amongst which the scheme is being recommended to the investor.

Section II

I. Introduction

A. Definitions/interpretation

Please refer the definitions/interpretation as disclosed under:

<https://www.miraeassetmf.co.in/downloads/statutory-disclosure/other-disclosure/offer-documents-data>

B. Risk factors

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the scheme can go up or down depending on various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee the future performance of the Scheme.
- The name of the Scheme does not in any manner indicate its quality or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme. In addition, the scheme does not guarantee or assure any dividend and also does not guarantee or assure that it will make any dividend distribution, though it has every intention to make the same in the distributions of Income Distribution cum Capital Withdrawal option. All distributions of Income Distribution cum Capital Withdrawal will be subjected to the investment performance of the Scheme.

Scheme Specific Risk Factors

Risks Associated with Debt & Money Market Instruments

• Price-Risk or Interest-Rate Risk:

From the perspective of coupon rates, debt securities can be classified in two categories, i.e., Fixed coupon bearing securities and Floating coupon bearing securities. In Fixed coupon bearing securities, the coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the floating coupon bearing securities, on the other hand, the coupon rate changes –‘floats’ – with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury bill.

Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in

interest rates in the financial system and liquidity. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof.

- **Credit Risk:**

- **Default Risk**

- Securities carry a risk of repayment of principal or interest by the borrower. This is called as default risk. The default risk depends on micro economic factors such as financial soundness and ability of the borrower and macro-economic factors such as industry performance, competition, trade barriers etc.

- **Downgrade Risk**

- It is the risk that credit rating agency downgrades the rating of an issuer based on earnings and cash flows generating capacity. The credit rating migration of issuance leads to increase in the credit spread and thus reduces the price of corporate bond.

- **Spread Risk**

- Though the sovereign yield curve might remain constant, investments in corporate bonds are exposed to the risk of spread widening between corporate bonds and gilts. Typically, if this spread widens, the prices of the corporate bonds tend to fall and so could the NAV of the Debt Schemes. Similar risk prevails for the investments in the floating rate bonds, where the benchmark might remain unchanged, but the spread over the benchmark might vary. In such an event, if the spread widens, the price and the NAV could fall.

- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of these investments. Different segments of the Indian financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances. The length of time for settlement may affect the Scheme in the event it has to meet an inordinately large number of redemption or of restructuring of the Scheme's investment portfolio. The inability of the Portfolio to make purchases in intended securities due to settlement problems could cause the Portfolio to miss certain investment opportunities.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- **Regulatory Risk:** The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation, and other developments in the laws and regulations.

- **Concentration Risk:** The Scheme portfolio may have higher exposure to a single sector, subject to the regulatory limit, depending upon availability of issuances in the market at the time of investment, resulting in higher concentration risk. Any change in government policy / business environment relevant to the sector may have an adverse impact on the portfolio.
- Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.

Risk Associated with Securitized Debt

The Scheme may invest in domestic securitized debt such as Asset Backed Securities (ABS) or Mortgage Backed Securities (MBS). ABS are securitized debts where the underlying assets are receivables arising from various loans including automobile loans, personal loans against consumer durables, etc. MBS are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential/ commercial properties. At present in Indian market, following types of loans are securitized:

1. Auto Loans (cars / commercial vehicles / two wheelers)
2. Residential Mortgages or Housing Loans
3. Consumer Durable Loans
4. Personal Loans
5. Corporate Loans

In terms of specific risks attached to securitization, each asset class would have different underlying risks. Residential Mortgages generally have lower default rates than other asset classes, but repossession becomes difficult. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Asset classes like personal loans, credit card receivables are unsecured and in an economic downturn may witness higher default. A corporate loan/ receivable, depend upon the nature of the underlying security for the loan or the nature of the receivable and the risks correspondingly fluctuate.

The rating agencies define margins, over collateralisation and guarantees to bring risk in line with similar AAA rated securities. The factors typically analyzed for any pool are as follows:

- a. Assets securitized and Size of the loan: This indicates the kind of assets financed with the loan and the average ticket size of the loan. A very low ticket size might mean more costs in originating and servicing of the assets.
- b. Diversification: Diversification across geographical boundaries and ticket sizes might result in lower delinquency

c. Loan to Value Ratio: Indicates how much % value of the asset is financed by borrower's own equity. The lower this value the better it is. This suggests that where the borrowers own contribution of the asset cost is high; the chances of default are lower.

d. Average seasoning of the pool: This indicates whether borrowers have already displayed repayment discipline. The higher the number, the more superior it is. The other main risks pertaining to Securitised debt are as follows:

Prepayment Risk: This arises when the borrower pays off the loan sooner than expected. When interest rates decline, borrowers tend to pay off high interest loans with money borrowed at a lower interest rate, which shortens the average maturity of ABSs. However, there is some prepayment risk even if interest rates rise, such as when an owner pays off a mortgage when the house is sold or an auto loan is paid off when the car is sold.

Reinvestment Risk: Since prepayment risk increases when interest rates decline, this also introduces reinvestment risk, which is the risk that the principal can only be reinvested at a lower rate.

Risk Factors Associated with Investments in REITs and InvITS:

- **Risk of lower than expected distributions:** The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/InvIT receives as dividends on the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate primarily based on the below, amongst other things:
 - i) Success and economic viability of tenants and off-takers
 - ii) Economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
 - iii) Force majeure events related such as earthquakes, floods, etc. rendering the portfolio assets inoperable
 - iv) Debt service requirements and other liabilities of the portfolio assets
 - v) Fluctuations in the working capital needs of the portfolio assets
 - vi) Ability of portfolio assets to borrow funds and access capital markets
 - vii) Changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
 - viii) Amount and timing of capital expenditures on portfolio assets
 - ix) Insurance policies may not provide adequate protection against various risks associated with operations of the REIT/InvIT such as fire, natural disasters, accidents, etc.
 - x) Taxation and regulatory factors
- **Price Risk:** The valuation of REIT/InvIT units may fluctuate based on economic conditions, fluctuations in markets (eg. Real estate) in which the REIT/InvIT operates and resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events, etc. REITs and InvITS may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian Law in the event of insolvency or liquidation of any of the portfolio assets.

- **Market Risk:** REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager’s investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.
- **Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme’s investment objectives will be achieved, or that there will be no loss of capital.

Risks associated with segregated portfolio

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- Security comprises of segregated portfolio may not realise any value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risk factors associated with instruments having special features

- The scheme may invest in certain debt instruments with special features which may be subordinated to equity and thereby such instruments may absorb losses before equity capital. The instrument is also convertible to equity upon trigger of a pre-specified event for loss absorption as may be decided by the RBI.
- The debt instruments with special features are considered as Non-Convertible Debentures, may be treated as debt instruments until converted to equity.
- The instruments are subject to features that grant issuer a discretion in terms of writing down the principal/coupon, to skip coupon payments, to make an early recall etc. Thus debt instruments with special features are subject to “Coupon discretion”, “Loss Absorbency”, “Write down on Point of Non-viability trigger(PONV) event” and other events as more particularly described as per the term sheet of the underlying instruments.
- The instrument is also subject to Liquidity Risk pertaining to how saleable a security is in the market. The particular security may not have a market at the time of sale due to uncertain/insufficient liquidity in the secondary market, then the scheme may have to bear an impact depending on its exposure to that particular security.

C. Risk mitigation strategies

Concentration Risk: The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.

Liquidity Risk

The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.

Risks Associated with Debt & Money Market Instruments

Credit Risk - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

Risks Associated with Repo in Corporate Debt

- **Illiquidity Risk**

The repo market for corporate debt securities is over the counter (OTC) and illiquid. Hence, repo obligations cannot be easily sold to other parties. Therefore, to mitigate such risks, it has been stipulated that gross exposure to Repo in corporate bonds would be limited to 10% of net assets of the concerned scheme. Further, the tenor of repo would be taken based on nature and unit holders' pattern of the scheme.

- **Counter-party risk**

Credit risk would arise if the counter-party fails to repurchase the security as contracted or if counterparty fails to return the security or interest received on due date. To mitigate such risks, the schemes shall carry out repo transactions with only those counterparties, which has a credit rating of 'A1+' or 'AA- and above'. In case of lending of funds as a repo buyer, minimum haircuts on the value of the collateral security have been stipulated, and we would receive the collateral security in the scheme's account before the money is lent to the counter-party. Overall, we would have a limited number of counter-parties, primarily comprising of Mutual Funds, Scheduled Commercial banks, Financial Institutions and Primary dealers. Similarly, in the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter-party may hurriedly dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Scheme. Thus, the Scheme may suffer losses in such cases. Sufficient funds flow management systems are in place to mitigate such risks.

- **Collateral Risk (as a repo buyer)**

Collateral risks arise due to fall in the value of the security (change in credit rating and/or interest rates) against which the money has been lent under the repo arrangement. To mitigate such risks, we have stipulated the minimum credit rating of the issuer of collateral security.

(‘AA’ for long-term instruments/A1+ for money market instruments), maximum duration of the collateral security (10 years) and minimum haircuts on the value of the security.

Risk Management & Liquidity Management tools:

Potential Risk Matrix (PRC) & Risk-o-meter: Investors are requested to review this scheme’s Potential Risk Matrix (PRC) to understand the maximum risk that this scheme will run as per design and & Risk-o-meter to understand periodical measurement of that risk on a regular basis. Investors are suggested to read about various disclosures under the section “PERIODIC DISCLOSURES” pertaining to “Potential Risk Class Matrix” & “Product Labelling and Risk-o-meter” to understand in detail the disclosure frequency and remedial measures in case of breaches in the boundaries

Mandatory Liquidity requirement: The scheme adopts the Liquidity Risk Management framework mandated by SEBI and AMFI which helps estimates liquidity requirement by determining liquidity risk arising from the liability side and tries to covers all potential liquidity risk scenarios up to agreed confidence interval and has mandated remedial measures both for managing the risk on an ongoing basis (LRaR & LCRaR) as well as action plan in case there is a difference between actual outcome and projected outcome. Investors can refer to the circular 135/ BP/93/ 2021-22 dated July 24, 2021 and subsequent circulars for detail understanding on the Liquidity Risk Management Framework.

Further Investment manager also evaluates and monitors the Asset Liability Mismatch (ALM) which addresses the gap in the estimated potential liquidity requirement over a 90-day period and schemes investment / assets liquidity to meet the potential requirement and best ensures that scheme has necessary liquidity to meets its liability obligations

Stress testing the scheme portfolio: The investment manager periodically stress tests the scheme portfolio to address the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level and evaluate the stress in terms of its impact on the NAV of the scheme. The stress test is performed using the methodology and periodicity as mandated by AMFI in consultation to SEBI.

Swing Pricing: The AMC has a Swing Pricing policy in place to help in case of severe liquidity stress at an AMC level or a severe dysfunction at market level, the Swing Pricing offers the contingency plan in case of extreme exigencies. Investors are suggested to read the detail disclosure pertaining to this policy in “**Swing Pricing Framework**”.

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund (‘AIF’) in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 (“AIF Regulations”). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during

times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the aforementioned schemes shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

We would further like to bring to the notice of the investors that investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Investors are requested to read details disclosure on investment of the schemes in the CDMDF as listed in sub-section 'C. How will the Scheme allocate its assets? And sub-section D. Where will the Scheme Invest' in Section 'Section II- Information about the scheme'.

Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its

contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower. Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

II. Information about the scheme:

A. Where will the scheme invest

Debt & Money Market Instruments:

The Scheme will invest in accordance with the investment objective in any (but not exclusively) of the following securities:

Debt instruments (in the form of non-convertible debentures, bonds, secured premium notes, zero interest bonds, deep discount bonds, floating rate bond / notes, securitised debt, pass through certificates, asset backed securities, mortgage backed securities and any other domestic fixed income securities including structured obligations etc.) include, but are not limited to:

1. Debt issuances of the statutory bodies (which may or may not carry a state / central government guarantee),
2. Debt securities that have been guaranteed by Government of India and State Governments,
3. Debt securities issued by Corporate Entities (Public / Private sector undertakings),
4. Debt securities issued by Public / Private sector banks and development financial institutions.

Money Market Instruments include:

1. Commercial papers
2. Commercial bills
3. Tri-party repo
4. Certificate of deposit
5. Permitted securities under a repo / reverse repo agreement
6. Any other like instruments as may be permitted by RBI / SEBI for liquidity requirements from time to time.

Securitized Assets: Securitization is a structured finance process which involves pooling and repackaging of cashflow producing financial assets into securities that are then sold to investors. They are termed as Asset Backed Securities (ABS) or Mortgage Backed Securities (MBS). ABS are backed by other assets such as credit card, automobile or consumer loan receivables, retail installment loans or participations in pools of leases. Credit support for these securities may be based on the underlying assets and/or provided through credit enhancements by a third party. MBS is an asset backed security whose cash flows are backed by the principal and interest payments of a set of mortgage loans. Such Mortgage could be either residential or commercial properties. ABS/MBS instrument reflect the undivided interest in the underlying assets and do not represent the obligation of the issuer of ABS/MBS or the originator of underlying receivables. Securitization often utilizes the services of SPV.

The following are certain additional disclosures w.r.t. investment in securitized debt:

1. How the risk profile of securitized debt fits into the risk appetite of the scheme

Securitized debt is a form of conversion of normally non-tradable loans to transferable securities. This is done by assigning the loans to a special purpose vehicle (a trust), which in turn issues Pass-Through-Certificates (PTCs). These PTCs are transferable securities with fixed income characteristics. The risk of investing in securitized debt is similar to investing in debt securities. However it differs in two respects.

Typically the liquidity of securitized debt is less than similar debt securities. For certain types of securitized debt (backed by mortgages, personal loans, credit card debt, etc.), there is an additional pre-payment risk. Pre-payment risk refers to the possibility that loans are repaid before they are due, which may reduce returns if the re-investment rates are lower than initially envisaged.

Because of these additional risks, securitized debt typically offers higher yields than debt securities of similar credit rating and maturity. If the fund manager judges that the additional risks are suitably compensated by the higher returns, he may invest in securitized debt up to the limits specified in the asset allocation table above.

2. Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc.

The originator is the person who has initially given the loan. The originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). An analysis of the originator is especially important in case of retail loans as this affects the credit quality and servicing of the PTC. The key risk is that of the underlying assets and not of the originator. For example, losses or performance of earlier issuances does not indicate quality of current series. However such past performance may be used as a guide to evaluate the loan standards, servicing capability and performance of the originator.

Originators may be: Banks, Non-Banking Finance Companies, Housing Finance Companies, etc. The fund manager / credit analyst evaluates originators based on the following parameters

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:

- Outlook for the economy (domestic and global)
- Outlook for the industry
- Company specific factors

In addition a detailed review and assessment of rating rationale is done including interactions with the originator as well as the credit rating agency.

The following additional evaluation parameters are used as applicable for the originator / underlying issuer for pool loan and single loan securitization transactions:

- Default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios of the ultimate borrower (for single-sell downs) – both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of re-schedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

3. Risk mitigation strategies for investments with each kind of originator

An analysis of the originator is especially important in case of retail loans as the size and reach affects the credit quality and servicing of the PTC. In addition, the quality of the collection process, infrastructure and follow-up mechanism; quality of MIS; and credit enhancement mechanism are key risk mitigants for the better originators / servicers.

In case of securitization involving single loans or a small pool of loans, the credit risk of the underlying borrower is analyzed. In case of diversified pools of loans, the overall characteristic of the loans is analyzed to determine the credit risk. The credit analyst looks at ageing (i.e. how long the loan has been with the originator before securitization) as one way of evaluating the performance potential of the PTC. Securitization transactions may include some risk mitigants (to reduce credit risk). These may include interest subvention (difference in interest rates on the underlying loans and the PTC serving as margin against defaults), overcollateralization (issue of PTCs of lesser value than the underlying loans, thus even if some loans default, the PTC continues to remain protected), presence of an equity / subordinate tranche (issue of PTCs of differing seniority when it comes to repayment - the senior tranches get paid before the junior tranche) and / or guarantees.

4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

In case of securitization involving single loans or a small pool of loans, the credit risk of the borrower is analyzed. In case of diversified pools of loans, the overall characteristic of the loans is analyzed to determine the credit risk.

The credit analyst looks at ageing (i.e. how long the loan has been with the originator before securitization) as one way of judging the performance potential of the PTC. Additional risk mitigants may include interest subvention, over collateralization, presence of an equity / subordinate tranche and / or guarantees. The credit analyst also uses analyses by credit rating agencies on the risk profile of the securitized debt.

Currently, the following parameters are used while evaluating investment decision relating to a pool securitization transaction. The Investment Review Committee may revise the parameters from time to time.

Characteristics/ Type of Pool	Mort gage Loan	Commercial Vehicle and Construction Equipment	CAR	2 wheelers	Micro Finance Pools*	Personal Loans*	Single Sell Downs	Others
Approximate Average maturity (in Months)	Up to 10 years	Up to 3 years	Up to 3 years	Up to 3 years	NA	NA	Refer Note 1	Refer Note 2
Collateral margin (including cash ,guarantees, excess interest spread , subordinate tranche)	>10%	>10%	>10%	>10%	NA	NA	“	“
Average Loan to Value Ratio	<90%	<80%	<80%	<80%	NA	NA	“	“
Average seasoning of the Pool	>3 month s	>3 months	>3 months	>3 months	NA	NA	“	“
Maximum single exposure range	<1%	<1%	<1%	<1%	NA	NA	“	“
Average single exposure range %	<1%	<1%	<1%	<1%	NA	NA	“	“

* Currently, the Schemes will not invest in these types of securitized debt

Note 1: In case of securitization involving single loans or a small pool of loans, the credit risk of the borrower is analyzed. The investment limits applicable to the underlying borrower are applied to the single loan sell-down.

2: Other investments will be decided on a case-to-case basis

The credit analyst may consider the following risk mitigating measures in his analysis of the securitized debt:

- Size of the loan
- Average original maturity of the pool
- Loan to Value Ratio
- Average seasoning of the pool
- Default rate distribution
- Geographical Distribution
- Credit enhancement facility
- Liquid facility
- Structure of the pool

5. Minimum retention period of the debt by originator prior to securitization

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements. In addition, RBI has proposed minimum holding period of between nine and twelve months for assets before they can be securitized.

The minimum holding period depends on the tenor of the securitization transaction. The Fund will invest in securitized debts that are compliant with the laws and regulations.

6. Minimum retention percentage by originator of debts to be securitized

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements, including maximum exposure by the originator in the PTCs. In addition, RBI has proposed minimum retention requirement of between five and ten percent of the book value of the loans by the originator. The minimum retention requirement depends on the tenor and structure of the securitization transaction. The Fund will invest in securitized debt that are compliant with the laws and regulations.

7. The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund

The key risk is securitized debt relates to the underlying borrowers and not the originator. In a securitization transaction, the originator is the seller of the debt(s) and the fund is the buyer. However, the originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). As the originators may also invest in the scheme, the fund manager shall ensure that the investment decision is based on parameters as set by the Investment Review Committee (IRC) of the Asset Management Company and IRC shall review the same at regular interval.

8. The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The fund management team including the credit analyst has the experience to analyze securitized debt. In addition, credit research agencies provide analysis of individual instruments and pools. On an on-going basis (typically monthly) the servicer provides reports regarding the performance of the pool. These reports would form the base for ongoing evaluation where applicable. In addition, rating reports indicating rating changes would be monitored for changes in rating agency opinion of the credit risk.

When issued

When, as and if issued" (commonly known as "**when-issued**" (**WI security**)) refers to a security that has been authorized for issuance but not yet actually issued. WI trading takes place between the time a new issue is announced and the time it is actually issued. All "when issued" transactions are on an "if" basis, to be settled if and when the actual security is issued.

SEBI has on April 16, 2008 in principle allowed Mutual Funds to undertake „When Issued (WI)“ transactions in Central Government securities, at par with other market participants.

• Open Position in the "WI" market is subject to the following limits:

Category	Reissued Security	Newly Issued Security
Non-PDs	Long Position, not exceeding 5 percent of the notified amount.	Long Position, not exceeding 5 percent of the notified amount.

The Scheme may invest in other schemes managed by the AMC or in the schemes of any other mutual funds, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing SEBI (MF) Regulations. As per the SEBI (MF) Regulations, no investment management fees will be charged for such investments and the aggregate inter scheme investment made by all the schemes of Mirae Asset Mutual Fund or in the schemes of other mutual funds shall not exceed 5% of the net asset value of the Mirae Asset Mutual Fund.

Investment in debt securities will usually be in instruments, which have been assessed as “high investment grade” by at least one credit rating agency authorized to carry out such activity under the applicable regulations. The AMC may constitute committee(s) to approve proposals for investments in unrated debt instruments.

The AMC Board and the Trustee shall approve the detailed parameters for such investments.

Credit Evaluation Policy

Credit risk management at MAMF is an independent function performed by the Risk Management (RM) team. The RM team sets up and monitors lending limits for each debt issuer. Issuer risk limits cover the quantum of exposure, maximum tenor and in some instances the type of instruments that can be purchased by the Investment Manager. An individual scheme’s access to the issuer limit is dependent on its investment objectives, regulatory restrictions and assets under management. Risk limits for issuers are assigned and reviewed regularly at an internal investment Committee Meetings.

Credit evaluation process:

With the aim of controlling risks, rigorous in depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC. The credit evaluation process includes analysis of the operating and financial strength of the issuer as well as management and industry risk evaluation. For structured obligations, in addition to the above, the evaluation also covers originator analysis, collateral analysis, structure analysis and embedded risk analysis. Each credit proposal is discussed by an internal Investment Committee and a limit is assigned, if the issuer/structure is suitable. The AMC will also be guided by the ratings of Rating Agencies approved by SEBI for this purpose.

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools like but not limited to calculating risk ratios, tracking error etc. The AMC has a Front Office System (FOS) and that has incorporated all the investment restrictions as per SEBI guidelines and “soft” warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner.

Investment in CDMDF-

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM in units of Corporate Debt Market Development Fund.

CDMDF Framework-

CDMDF shall comply with the Guarantee Scheme for Corporate Debt (GSCD) as notified by Ministry of Finance vide notification no. G.S.R. 559(E) dated July 26, 2023 and SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/128 dated July 27, 2023 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time, which includes the framework for corporate debt market development fund. The framework will be inclusive of following points-

- a) The CDMDF shall deal only in following securities during normal times:
 - Low duration Government Securities
 - Treasury bills
 - Tri-party Repo on G-sec
 - Guaranteed corporate bond repo with maturity not exceeding 7 days
- b) The fees and expenses of CDMDF shall be as follows:
 - During Normal times: (0.15% + tax) of the Portfolio Value charged on daily pro-rata basis.
 - During Market stress: (0.20% + tax) of the Portfolio Value charged on daily pro-rata basis.
 - "Portfolio Value" means the aggregate amount of portfolio of investments including cash balance without netting off of leverage undertaken by the CDMDF.
- c) Corporate debt securities to be bought by CDMDF during market dislocation include listed money market instruments. The long term rating of issuers shall be considered for the money market instruments. - d) CDMDF shall follow the Fair Pricing document, while purchase of corporate debt securities during market dislocation as specified in SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/128 dated July 27, 2023 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time.
- e) CDMDF shall follow the loss waterfall accounting and guidelines w.r.t. purchase allocation and trade settlement of corporate debt securities bought by CDMDF, specified in SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/128 dated July 27, 2023 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time.

Overview of Debt Markets in India

Indian fixed income market, one of the largest and most developed in South Asia, is well integrated with the global financial markets. Screen based order matching system developed by the Reserve Bank of

India (RBI) for trading in government securities, straight through settlement system for the same, settlements guaranteed by the Clearing Corporation of India and innovative instruments like TREPS have contributed in reducing the settlement risk and increasing the confidence level of the market participants.

The RBI reviews the monetary policy six times a year giving the guidance to the market on direction of interest rate movement, liquidity and credit expansion. The central bank has been operating as an independent authority, formulating the policies to maintain price stability and adequate liquidity. Bonds are traded in dematerialized form. Credit rating agencies have been playing an important role in the market and are an important source of information to manage the credit risk.

Government (Central and State) is the largest issuer of debt in the market. Public sector enterprises, quasi government bodies and private sector companies are other issuers. Insurance companies, provident funds, banks, mutual funds, financial institutions, corporates and FPIs are major investors in the market. Government loans are available up to 40 years maturity. Variety of instruments available for investments including plain vanilla bonds, floating rate bonds, money market instruments, structured obligations and interest rate derivatives make it possible to manage the interest rate risk effectively.

Indicative levels of the instruments as on May 31, 2024 are as follows:

Instrument	Maturity	Tenure	Yield	Liquidity
TREPS / Repo	Short	Overnight	6.76	Very High
CP / CD / T Bills	Short	3 months CP*	7.65	High
		3 months CD	7.15	
		1 Year CP*	8.12	
		1 Year CD	7.71	
Central Government securities	Low to High	10 years	6.98	Medium

B. What are the investment restrictions?

The following investment limitations and other restrictions, inter-alia, as contained in the Trust Deed and the Regulations apply to the Scheme:

- The total exposure of debt schemes in a particular sector (excluding investments in Bank CDs, Tri-party repo, G-Secs, T-Bills and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme. However, the scheme(s) may have an additional exposure to financial services sector (over and above the sectoral limit of 20%) not exceeding 10% of its net assets by way of increase in exposure to Housing Finance Companies (HFCs) registered with National Housing Bank. Such additional exposure shall be to securities issued by HFCs which are rated AA and above. Further, the Scheme may have an additional exposure of 5% of the net assets of the scheme for investments in securitized debt instruments based on retail housing loan portfolio and/or affordable housing loan portfolio. The total investment / exposure in HFCs shall not exceed 20% of the net assets of the scheme(s).
- The Mutual Funds/AMCs shall ensure that total exposure of debt schemes in a group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public

Sector Banks) shall not exceed 20% of the net assets of the scheme. Such investment limit may be extended to 25% of the net assets of the scheme with the prior approval of the Board of Trustees.

The investments by the Scheme in debt and money market instruments of group companies of both the sponsor and the asset management company shall not exceed 10% of the net assets of the scheme. Such investment limit may be extended to 15% of the net assets of the scheme with the prior approval of the Board of Trustees.

A group means a group as defined under regulation 2(mm) of SEBI (Mutual Funds) Regulations, 1996 and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

- The scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorized to carry out such activity under the Act. Such investment limit may be extended to 12% of the NAV of the scheme with the prior approval of the Board of Trustees and the Board of directors of the asset management company.

Further, in accordance with clause 12.8 of SEBI Master Circular dated May 19, 2023, the Scheme shall not invest more than:

- a) 10% of its NAV in debt and money market securities rated AAA; or
- b) 8% of its NAV in debt and money market securities rated AA; or
- c) 6% of its NAV in debt and money market securities rated A and below

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified above.

Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and collateralized borrowing and lending obligations. Provided further that investment within such limit can be made in mortgaged backed securitised debts which are rated not below investment grade by a credit rating agency registered with the Board.

- Investment in unrated debt and money market instruments, other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. shall be subject to the following:
 - i. Investments shall only be made in such instruments, including bills rediscounting, usance bills, etc., that are generally not rated and for which separate investment norms or limits are not provided in SEBI (Mutual Fund) Regulations, 1996 and various circulars issued thereunder.
 - ii. Exposure in such instruments shall not exceed 5% of the net assets of the scheme.
 - iii. All such investments shall be made with the prior approval of the Board of AMC and the Board of trustees.
- The Scheme shall not invest in unlisted debt instruments including commercial papers (CPs), other than (a) government securities, (b) other money market instruments and (c) derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc.

However, the scheme may invest in unlisted Non-Convertible debentures (NCDs) not exceeding 10% of the debt portfolio of the scheme subject to the condition that such unlisted NCDs have a simple structure (i.e. with fixed and uniform coupon, fixed maturity period, without any options, fully paid up upfront, without any credit enhancements or structured obligations) and are rated and secured with coupon payment frequency on monthly basis.

- The investment of mutual fund schemes in below instruments shall not exceed 10% of the debt portfolio of the schemes and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the schemes:
 - a) Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade and
 - b) Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.
- Investment in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares.
- Debentures, irrespective of any residual maturity period (above or below one year), shall attract the investment restrictions as applicable for debt instruments.
- The Scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the management or in schemes under the management of any other asset management company shall not exceed 5% of the NAV of the mutual fund.
- Pending deployment of funds of a scheme in securities in terms of investment objectives of the scheme a mutual fund can invest the funds of the scheme in short term deposits of scheduled commercial banks. The investment in these deposits shall be in accordance with clause 12.16 of SEBI Master Circular dated May 19, 2023.
- The mutual fund shall not borrow except to meet temporary liquidity needs of the mutual funds for the purpose of repurchase, redemption of units or payment of interest or dividend to the unitholders. Provided that the mutual fund shall not borrow more than 20 per cent of the net asset of the scheme and the duration of such a borrowing shall not exceed a period of six months.
- The Scheme shall hold at least 10% of their net assets in liquid assets. For this purpose, 'liquid assets' shall include Cash, Government Securities, T-bills and Repo on Government Securities.
- The below mentioned limits shall apply for instruments with special features:
 1. The Fund under all its schemes shall own more than 10% of such instruments issued by a single issuer.
 2. The scheme shall not invest:
 - more than 10% of its NAV of the debt portfolio of the scheme in such instruments; and
 - more than 5% of its NAV of the debt portfolio of the scheme in such instruments issued by a single issuer.

As per clause 12.16 of SEBI Master Circular dated May 19, 2023 on investments in Short Term Deposits (STDs) of Scheduled Commercial Banks:

- Total investment of the Scheme in Short term deposit(s) of all the Scheduled Commercial Banks put together shall not exceed 15% of the net assets. However, this limit can be raised upto 20% of the net assets with prior approval of the trustees. Further, investments in Short Term Deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
- “Short Term” for parking of funds by Mutual Funds shall be treated as a period not exceeding 91 days
- The Scheme shall not invest more than 10% of the net assets in short term deposit(s), of any one scheduled commercial bank including its subsidiaries.
- The Scheme shall not invest in short term deposit of a bank which has invested in that Scheme. AMC shall also ensure that the bank in which a scheme has Short term deposit do not invest in the said scheme until the scheme has Short term deposit with such bank.
- Asset Management Company (AMC) shall not be permitted to charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

The investments in short term deposits of scheduled commercial banks will be reported to the Trustees along with the reasons for the investment which, inter-alia, would include comparison with the interest rates offered by other scheduled commercial banks. Further, AMC shall ensure that the reasons for such investments are recorded in the manner prescribed in clause 12.23 of SEBI Master Circular dated May 19, 2023.

- The Scheme will comply with SEBI regulations and any other regulations applicable to the investments of Funds from time to time. The Trustee may alter the above restrictions from time to time to the extent that changes in the regulations may allow. All investment restrictions shall be applicable at the time of making investment.
- The aforesaid limits shall not be applicable to term deposits placed as margins for trading in cash and derivatives market.
- Inter scheme transfers (ISTs) of investments from one scheme to another scheme in the same Mutual Fund shall be allowed only if such transfers are done at the prevailing market price for quoted instruments on spot basis. Explanation -“Spot basis” shall have same meaning as specified by stock exchange for spot transactions. The securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.

Pursuant to Clause 12.30 of SEBI Master Circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, ISTs may be allowed in the following scenarios:

- i. for meeting liquidity requirement in a scheme in case of unanticipated redemption pressure
- ii. for Duration/ Issuer/ Sector/ Group rebalancing

No IST of a security shall be done, if there is negative news or rumors in the mainstream media or an alert is generated about the security, based on internal credit risk assessment. The Scheme shall comply with the guidelines for inter-scheme transfers as specified under clause 12.30 of SEBI Master Circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023.

- The scheme shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relative securities and in all cases of sale, deliver the securities; Further, the scheme shall not engage in short selling or securities lending and borrowing scheme. Provided that the scheme shall also not enter into derivatives transactions.
- The Scheme shall get the securities purchased or transferred in the name of the mutual fund on account of the concerned scheme, wherever investments are intended to be of long-term nature.
- The Scheme shall not make any investment in: a) Any unlisted security of an associate or group company of the Sponsor; or b) Any security issued by way of private placement by an associate or group company of the sponsor; or c) The listed securities of group companies of the Sponsor which is in excess of 25% of the net assets.
- The scheme shall not make any investment in any fund of funds scheme.
- The Mutual Fund having an aggregate of securities which are worth Rs.10 crores or more, as on the latest balance sheet date, shall subject to such instructions as may be issued from time to time by SEBI, settle their transactions entered on or after January 15, 1998 only through dematerialized securities. Further, all transactions in government securities shall be in dematerialized form.

Participation in Repo in Corporate Debt

In accordance with clause 12.18 of SEBI Master Circular dated May 19, 2023 on 'Participation of mutual funds in repo in corporate debt securities', Mirae Asset Mutual Fund shall participate in repo transactions in Corporate Debt Securities within the following overall framework, as per the guidelines of Securities and Exchange Board of India and Boards of Mirae Asset Trustee Co. Pvt. Ltd. & Mirae Asset Investment Managers (India) Pvt. Ltd.

1) Gross Exposure Norms

- (i) The gross exposure of the scheme to 'corporate bonds repo transactions' shall not be more than 10% of the net assets of the concerned scheme.
- (ii) The cumulative gross exposure through repo transactions in corporate debt, equity, debt and derivative positions should not exceed 100% of the net assets of the Scheme. However, cash or cash equivalents with residual maturity of less than 91 days shall be treated as not creating any exposure.
- (iii) In addition to investment restrictions specified in SEBI (Mutual Funds) Regulations 1996, the counter-party exposure in a scheme, considering the investments held in the debt securities and value of collaterals held through repo transactions (as a lender), shall not be more than 10% of the Net Assets of the Scheme.

2) Category of the counter-party to be considered for making investment

Eligible Counterparties: In accordance with the RBI Circular No. RBI/2009- 10/284 idmd.dod.05/11.08.38/2009- 10 dated January 8, 2010, the following categories of entities shall be deemed to be the eligible counterparties to undertake repo transactions in corporate debt securities, provided, they form part of the Fixed Income Investment Universe of Mirae Asset Mutual Fund, and subject to execution of master repo agreement:

- a. Any scheduled commercial bank excluding RRBs and LABs;
- b. Any Primary Dealer authorized by the Reserve Bank of India;
- c. Any non-banking financial company registered with the Reserve Bank of India (other than Government companies as defined in section 617 of the Companies Act, 1956);
- d. All-India Financial Institutions, namely, Exim Bank, NABARD, NHB and SIDBI;
- e. Other regulated entities, subject to the approval of the regulators concerned, viz.,
 - (1) Any mutual fund registered with the Securities and Exchange Board of India;
 - (2) Any housing finance company registered with the National Housing Bank; and
 - (3) Any insurance company registered with the Insurance Regulatory and Development Authority.
- vi) other entities specifically permitted by the Reserve Bank.

(C) Credit Rating of Counterparty to be considered for making investment

The scheme/s shall carry out repo transactions with only those counterparties, who have a credit rating of 'AA and above' (Long term rating) or 'A1+' (Short term rating) which are part of our approved Debt Universe on which we have approved Credit Limits.

(D) Tenor of Repo

As a repo seller, the scheme/s can borrow for a period not more than six months as per the existing Regulation 44(2) of the SEBI (Mutual Funds) Regulations, 1996. As a repo buyer, the scheme/s can lend for a maximum period of one year, subject to provision/s of the Scheme Information Document (SID).

(E) Tenor and Credit Rating of the Collateral

The scheme/s shall participate in repo transactions in Corporate Bonds rated 'AA and above' and Commercial Papers (CPs) and Certificate of Deposits (CDs). The tenor of the collateral shall not be more than 10 years.

(F) Minimum Haircut

Haircut/ margins will be decided either by the clearing house or may be bilaterally agreed upon, in terms of the documentation governing repo transactions, subject to the following stipulations:

Listed corporate bonds and debentures shall carry a minimum haircut of 2% of market value. Additional haircut may be charged based on tenor and illiquidity of the security.

CPs and CDs shall carry a minimum haircut of 1.5% of market value.

Securities issued by a local authority shall carry a minimum haircut of 2% of market value. Additional haircut may be charged based on tenor and illiquidity of the security.

The above are minimum stipulated haircuts where the repo period is overnight or where the re-margining frequency (in case of longer tenor repos) is daily. In all other cases, Fund Manager may adopt appropriate higher haircuts.

For the purpose of consideration of credit rating of exposure on repo transactions for various purposes including for Potential Risk Class (PRC) matrix, liquidity ratios, Risk-o-meter etc., the same shall be as that of the underlying securities, i.e., on a look through basis. For transactions where settlement is guaranteed by a Clearing Corporation, the exposure shall not be considered for the purpose of determination of investment limits for single issuer, group issuer and sector level limits.

Apart from the investment restrictions prescribed under SEBI (MF) Regulations, the Fund does not follow any internal norms vis-à-vis limiting exposure to a particular scrip or sector etc.

C. Fundamental Attributes

Following are the Fundamental Attributes of the scheme, in terms of Clause 1.14 of SEBI Master Circular for Mutual Funds dated May 19, 2023:

(i) **Type of a scheme**

An open ended short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 year to 3 years (please refer to page no. 12).

(ii) **Investment Objective:** The investment objective of the scheme is to seek to generate returns through an actively managed diversified portfolio of debt and money market instruments with Macaulay duration of the portfolio is between 1 year to 3 years. However, there is no assurance that the investment objective of the Scheme will be realized and the Scheme does not assure or guarantee any returns.

(iii) **Main Objective - Growth**

- **Investment pattern**

Asset allocation:

Instruments	Indicative allocations (% of total assets)	
	Minimum	Maximum
Money Market Instruments and Debt instruments with Macaulay duration of the portfolio between 1 year to 3 years	0%	100%
Units issued by REITs & InvITs	0	10%

Rebalancing of deviation due to short term defensive consideration

Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. As per clause 1.14.1.2 of SEBI Master Circular dated May 19, 2023 such changes in the investment pattern will be for short term and for defensive consideration only. In the event of deviations, portfolio rebalancing will be carried out within 30 calendar days in such cases.

(iv) **Terms of Issue**

- **Listing:**

The Scheme being open ended, the Units are not proposed to be listed on any stock exchange and no transfer facility is provided.

Redemption of Units:-

The Unit Holder has the option to request for Redemption either in amount in rupees or in number of Units. In case the request for Redemption specifies both, i.e. amount in rupees as well the number of Units to be redeemed, then the latter will be considered as the redemption request and redemption will be processed accordingly. The minimum redemption amount shall be 'any amount' or 'any number of units' as requested by the investor at the time of redemption request. The Trustees have authorized the AMC to suo-moto redeem such fractional balance units (less than 1 unit), on periodic basis across all schemes, as and when decided by the AMC. Units can be redeemed (sold back to the Fund) at the Redemption Price during the Ongoing Offer Period. If an investor has purchased Units of a Scheme on more than one Business Day the Units will be redeemed on a first-in-first-out basis. If multiple Purchases are made on the same day, the Purchase appearing earliest in the account statement will be redeemed first.

Redemption Price:

The Redemption Price of the Units is the price at which a Unit Holder can redeem Units of a scheme. It will be calculated as described below:

Redemption Price = Applicable NAV - (Applicable NAV x Exit Load*)

* Exit Load, whatever is applicable, will be charged.

Redemption Price will be calculated for up to three decimal places for the Scheme.

For example, if the Applicable NAV of a Scheme is Rs.10.555, and it has a 2% Exit Load, the Redemption Price will be calculated as follows:

Redemption Price = 10.555 - (10.555 X 2.00%) i.e. 10.455 - 0.211 = 10.344

If the Scheme has no Exit Load, the Redemption Price will be equal to the Applicable NAV.

The Securities Transaction Tax levied under the Income Tax Act, 1961, at the applicable rate on the amount of redemption will be reduced from the amount of redemption.

To illustrate:

If a Redemption of 4,900 units is sought by the Unit Holder at a Redemption Price of Rs. 10.344 (as calculated above), the redemption amount is Rs. 50,685.60. Securities Transaction Tax (STT) for instance is 0.001%. This will be further reduced by the STT of Re. 0.50 (i.e. Rs. 50,685.60 x 0.001%), making the net redemption amount Rs. 50,685.10.

If a Redemption of Rs. 10,000 is sought by the Unit Holder at a Net Redemption Price of Rs. 10.344 (as calculated above), which will give 966.744 Units; the effective redemption amount will be grossed up to Rs. 10,204.08 (i.e. $10,000 \div (1-2\%)$) and 966.744 units ($10,204.08 \div 10.555$) will be redeemed.

This is to ensure that the Unit Holder receives the net amount of Rs. 10,000 as desired.

Investors may note that the Trustee has a right to modify the existing Load structure in any manner subject to a maximum as prescribed under the Regulations and with prospective effect only. Please refer section - LOAD STRUCTURE.

- **Aggregate fees and expenses charged to the scheme:** For detailed fees and expenses charged to the scheme please refer to section 'Fees and Expenses'.
- **Any safety net or guarantee provided:** There is no assurance OR guarantee of returns.

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations and Clause 1.14.1.4 of SEBI Master Circular for Mutual Funds dated May 19, 2023 the Trustees shall ensure that no change in the fundamental attributes of the Scheme(s) and the Plan(s) / Option(s) thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme(s) and the Plan(s) / Option(s) thereunder and affect the interests of Unitholders is carried out unless:

- SEBI has reviewed and provided its comments on the proposal
- A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- The Unitholders are given an option for a period of atleast 30 calendar days to exit at the prevailing Net Asset Value without any exit load.

The policy regarding reissue of repurchased units, including the maximum extent, the manner of reissue, the entity (the scheme or the AMC) involved in the same.	All units can be reissued without any limit by the Scheme.
Restrictions, if any, on the right to freely retain or dispose of units being offered.	As the units of the Scheme are mandatorily to be held in demat mode, the same are freely transferable. Further, the unit holders will have to approach their DP for transfer,

transmission, pledge related requests etc. which shall be done by the DP in accordance with the procedural requirements laid down by the Depositories, viz. NSDL/ CDSL and/or in accordance with the provisions laid under the Depositories Act, 1996 and the Regulations thereunder.

RIGHT TO RESTRICT REDEMPTION AND / OR SUSPEND REDEMPTION OF THE UNITS:

The Fund at its sole discretion reserves the right to restrict Redemption (including switchout) of the Units (including Plan /Option) of the Scheme of the Fund upon occurrence of the below mentioned events for a period not exceeding ten (10) working days in any ninety (90) days period subject to approval of the Board of Directors of the AMC and the Trustee. The restriction on Redemption (including switch-out) shall be applicable where the Redemption (including switch-out) request is for a value above Rs. 2,00,000/- (Rupees Two Lakhs). Further, no restriction shall be applicable to the Redemption / switch-out request upto Rs. 2,00,000/- (Rupees Two Lakhs). It is further clarified that, in case of redemption request beyond Rs. 2,00,000/- (Rupees Two Lakhs), no restriction shall be applicable on first Rs. 2,00,000/- (Rupees Two Lakhs).

The Trustee / AMC reserves the right to restrict Redemption or suspend Redemption of the Units in the Scheme of the Fund on account of circumstances leading to a systemic crisis or event(s) that severely constrict market liquidity or the efficient functioning of the markets. A list of such circumstances under which the restriction on Redemption or suspension of Redemption of the Units in the Scheme of the Fund may be imposed are as follows:

1. Liquidity issues- when market at large becomes illiquid affecting almost all securities rather than any issuer specific security; or
2. Market failures / Exchange closures; or
3. Operational issues; or
4. If so directed by SEBI.

It is clarified that since the occurrence of the abovementioned eventualities have the ability to impact the overall market and liquidity situation, the same may result in exceptionally large number of Redemption requests being made and in such a situation the indicative timelines (i.e. within 3-4 Business Days) mentioned by the Fund in the scheme offering

	documents, for processing of requests for Redemption may not be applicable.
